
Leganto May 2021 Release Notes

Issues to Note

June 2021 Sneak Peek

- New design for the reading list header (see [Upcoming Behavior and Design Changes in Leganto](#))
- Description field for Leganto Questions
- Annotations usage added to Analytics

Main Features

Add Item Menu

May 2021 Leganto

The new Add Items menu highlights the multiple options for adding citations, such as uploading a file and adding a citation from a reference manger, if configured. The Add Items menu will only display options which have been enabled for your institution. The available options are:

- Library Search - Search and add resources from your discovery system.
- Manual Form - Manually enter metadata to create a citation.
- File - Select a file from your computer to upload. The drop-down list includes a section at the top of the list for the most commonly used file types. This option is hidden if the **max_file_size_allowed_faculty_MB** parameter is set to 0. For more information, see [Configuring Whether Instructors Can Upload Files that Contain Reading Lists](#).
- Collection - Add a resource from your Leganto collection.
- RefWorks - Add a resource from your RefWorks account. This option is hidden if RefWorks is not enabled. To enable RefWorks, the **refworks_group_code** parameter (Configuration menu > General > External Integrations) must contain a value and the user must have a username and password in their settings.
- Mendeley - Add a resource from your Mendeley account. The option is hidden if Mendeley is not enabled. To enable Mendeley, the **mendeley_client_id** and **mendeley_secret** parameters ([Leganto Configurations > General > External Integrations](#)) must contain a value.
- Zotero - Add a resource from your Zotero account. This option is hidden if Zotero is disabled. To enable Zotero, the Zotero User ID and Zotero API key (in User Settings in the Leganto interface) must contain a value.

Add Items Menu

Unsupported Browser Message

May 2021 Leganto

Internet Explorer is no longer a supported browser for Leganto. Now, when attempting to access Leganto while using Internet Explorer, a warning message displays advising the user to select a different browser.

Internet Explorer Message

See [Product Accessibility](#).

New Bolk Copyright Request API

May 2021 Leganto

Leganto integrates with Bolk to support Norwegian copyright requests, and a new API is available for Bolk imports. There are three possible return responses, **Using HE license**, **Using mandate**, and **Rights clearance required**. A new status field on the citation, **Bolk Status**, reflects the status of the Bolk request as follows:

- **Using HE license - Bolk Status is Approved.**
- **Using mandate - Bolk Status is Approved**, with the **Price per page** appended to the field.
- **Rights Clearance Required - Copyright Status is Rejected** with the Bolk rejection message immediately following. **Bolk Status is Rejected** and the the message recieved from **Bolk will be displayed to the user as is**.

The API will include additional functionality in a coming release.

See [Integrating with Bolk](#).

Leganto Course Copyrights

May 2021 Leganto

The instructor can now associate or remove course associations from a list in Leganto even if there are approved copyright

requests. An overnight job will run to recalculate the copyright on any lists in which the course association was changed. To enable this feature, the **associate_course_approved_copyright** parameter must be set to **true** ([Configuration Menu > Fulfillment > Copyright Management > Leganto Copyright Settings](#)). The parameter defaults to false. See [Configuring Leganto Copyright-Related Procedures](#).

Hide Page Annotations

May 2021 Leganto

You can now hide annotations on PDF files. When annotations are on the page, click the eye icon to hide the annotations. Click the icon again to display the annotations.

Hide Annotations Icon

See [Creating Private Annotations](#).

Additional Enhancements

- **May 2021 Leganto**
You can now create an annotation shape without adding a comment. See [Creating Private Annotations](#).
- **May 2021 Leganto**
You can now use Citel! from Esploro to create a citation in Leganto. See [Configuring Recommendation Services](#).
- **May 2021 Leganto SF: 00924102**
If a Leganto permalink is used in an iFrame and 3rd party cookies are blocked by the browser, a message will be displayed requesting to open the link in a new tab. This is the same message that is displayed for embedded LTI links when 3rd party cookies are blocked.
- **May 2021 Leganto**
The **display_sticker_price** parameter ([Configuration Menu > Leganto > Features > Leganto Features](#)), which determines who can see the sticker price, now supports the following values: **all**, **librarians**, **instructors**, and **students**, in addition to **true** and **false**. The **true** value is equivalent to **librarians**. Multiple values can be entered, separated by commas.
- **May 2021 Leganto SF: 00843808**
Section notes now automatically receive a status of Complete. See [Adding a Note to a Reading List](#).

Resolved Issues

- **May 2021 Leganto SF: 00923506**
The label on a citation, **Less Details**, was changed to **Fewer Details**.
- **May 2021 Leganto SF: 00909013**
Previously, when the license type was **No Declaration, No Declaration (not listed)** was displayed in the **Creative Commons** dropdown list on the Edit Citation page. This was fixed. Now, in this situation, a blank value is selected in the dropdown list.
- **May 2021 Leganto SF: 00924957 00930534 00931536 00931910**
The Instructor Search option in Leganto Find Lists Advanced Search was returning incorrect results. This was fixed.
- **May 2021 Leganto SF: 00925259**
Previously, when landing on a page from an LTI link, the librarian could not view lists in draft mode. This was fixed.
- **May 2021 Leganto SF: 00922179**
In some cases, changes made to the Copyright Status/Request Status of citations in duplicated reading lists were not saved. This was fixed.
- **May 2021 Leganto SF: 00921663**
The Leganto General Message was not translated. This was fixed.
- **May 2021 Leganto SF: 00911361**
In the preview mode for the Leganto Create List - Reminder Email letter, The **Update Now** link appeared in a different place in Preview mode than what was actually sent. This was fixed.
- **May 2021 Leganto SF: 00924086**
When the **email_notifications_group** parameter was disabled for a user group (left blank), the **Receive Notifications by Email** check box still appeared for instructors. This was fixed.
- **May 2021 Leganto SF: 00922240 00923866**
In some cases, when adding items from Primo, the wrong question was displayed. This was fixed.
- **May 2021 Leganto SF: 00918631**
When exporting to LGN, the review requester name and date was not included in the export. This was fixed.
- **May 2021 Leganto SF: 00921728**
If a URL in Help Pages cannot be opened in embedded mode, it will now be opened in a new tab.
- **May 2021 Leganto SF: 00841343**
Citation processing rules did not always calculate the availability correctly. This was fixed.
- **May 2021 Leganto SF: 00916815 00920146**
Previously, if the secondary citation type changed, the primary citation type was not updated. This was fixed..
- **May 2021 Leganto SF: 00870893**
In some cases lists could not be created when course code included a "/". This was fixed.
- **May 2021 Leganto SF: 00888808**
Leganto could not successfully delete reading lists with more than 1000 items. This was fixed.
- **May 2021 Leganto SF: 00895008**
When creating a purchase request from a citation, the requester field was not populated correctly according to the list assignee or logged in user. This was fixed.
- **May 2021 Leganto SF: 00909275**
Citations added from external records in Primo VE did not have a link. This was fixed.
