Current Challenges On and Off Campus

Unexpected Changes

Return to campus is subject to changes beyond the control of the university

New Norm & Regulations

How to comply with new norm and regulations

Engagement Analysis

Engagement and retention initaitives are harder to measure

Outdated Communications

Latest information and news are published on webpages but require students and staff to actively check for updates
Overload of Irrelevant Details

Static, all-encompassing information for students, staff, faculty is overwhelming and challenging to digest

Remote Support

Support for enquiries can be done online only

Many Data Points

Resources are found in different webpages and portals

Attendance in a Hybrid Teaching & Learning

In current days, students attend classes remotely, in-person, and a combination of models

campusM Attendance delivers a **central repository** for all classroom attendance, regardless of Teaching & Learning models

- Quick **access to data**
- Daily **review of insights**
- Triggering **intervention actions** (calls, etc.)
- Instantly **adapt to change** in models
- **Feedback** through Quick Polls

Workflow Overview

Reminder → **Check-in** → **Validation** → **Upload** → **Extract**

Student receives reminder notification about upcoming classes

Student triggers a check in using the campusM app interface

campusM uses the technologies available to validate the check-in

Check-in is uploaded to the cloud when the student student is online

Customers extract check-in data using APIs, or view aggregated through OBI

Attendance Partners

Worth Noting

- If you have Timetable set up (with unique identifier) **<mark>you can already try it today for student check-in!</mark>**

- No additional services required

- No implementation process

- Just enable and test (or contact us to get it working together)
