ProQuest Alma Accessibility Conformance Report

International Edition

(Based on VPAT® Version 2.4)

Name of Product/Version: Ex Libris Alma / December 2021 release

Report Date: January 2022

Product Description:

Library services platform that unifies your library resources management: electronic, print, and digital. Consolidates your library processes, such as acquisition, purchasing, and digitization, for improved efficiency. Supports evidence-based decision making using advanced analytics to optimize your collection.

At Ex Libris, we make every effort to ensure Alma can be used by everyone. Alma is continually designed and developed to meet Level A and AA of the W3C Web Content Accessibility Guidelines (WCAG 2.1) and Section 508 of the US Rehabilitation Act for features and functions. Ex Libris is initiating every year an annual audit performed by the leading digital accessibility assessment company Deque systems. We are investing significant time in fixing the main issues reported by Deque. Ex Libris implements these corrections and enhancements on an ongoing, month by month basis.

This document illustrates the status of Alma's compliance with WCAG by December 2021 release.

This report does not cover the following product areas:

- **Alma Analytics** uses Oracle Business Intelligence (OBI), a third-party tool. Please see Oracle's accessibility statement.
- **Alma Mobile** an optional application for limited functionality which exist in the Alma web-based application

Note: The Search Results Custom Display functionality is used rarely and is going to be replaced with a different capability which will be comply with WCAG 2.1 standard.

For additional details see [Alma Accessibility Statement](#).

Contact Information:

- Current customers: submit questions or issues by opening a case using the [Support Portal](#).
- Prospective customers: contact [AlmaAccessibility@exlibrisgroup.com](#).

Notes:

This report was created upon completion of accessibility evaluations performed between July 2020 and December 2021 and was limited only to evaluation of specific accessibility issues that were already reported.

The report is considered accurate at the time of publishing.
