

A peek into the future: Controlled Digital Lending in libraries

Judith Fraenkel, September 2022

Digital Innovations

“Digital innovations are more of a human science than computer science”

What is Controlled Digital Lending?

Controlled Digital Lending enables a library to circulate a digitized title in place of a physical one in a controlled manner. Principles:

- “owned-to-loaned” ratio
 - Circulate exact number of copies of a specific title the library owns
 - Prevent users from redistributing
- Mimic restraints on physical material – for example, one reader at a time

Controlled Digital Lending

The screenshot shows a laptop displaying the website 'Controlled Digital Lending by Libraries'. The page has a dark blue header with the title and navigation links: 'Position Statement', 'White Paper', 'ILL Statement', 'FAQ', and 'Further Reading'. The main content area features a photograph of a person using a tablet in a library. A context menu is overlaid on the right side of the photo, listing actions: 'Read', 'Move to Bookshelf', 'Item Info', 'Show File in Finder', 'Return Borrowed Item' (highlighted in blue), 'Remove from Bookshelf', and 'Remove from Library'. Below the photo is a paragraph of text explaining the concept of Controlled Digital Lending (CDL).

Controlled Digital Lending (CDL) is an emerging method that allows libraries to loan print books to digital patrons in a "lend like print" fashion. Through CDL, libraries use technical controls to ensure a consistent "owned-to-loaned" ratio, meaning the library circulates the exact number of copies of a specific title it owns, regardless of format, putting controls in place to prevent users from redistributing or copying the digitized version. When CDL is appropriately tailored to reflect print book market conditions and controls are properly implemented, CDL may be permissible under existing copyright law. CDL is not intended to act as a substitute for existing electronic licensing services offered by publishers. Indeed, one significant advantage of CDL is addressing the "Twentieth Century Problem" of older books still under copyright but unlikely ever to be offered digitally by commercial services.

IFLA releases a statement on Controlled Digital Lending

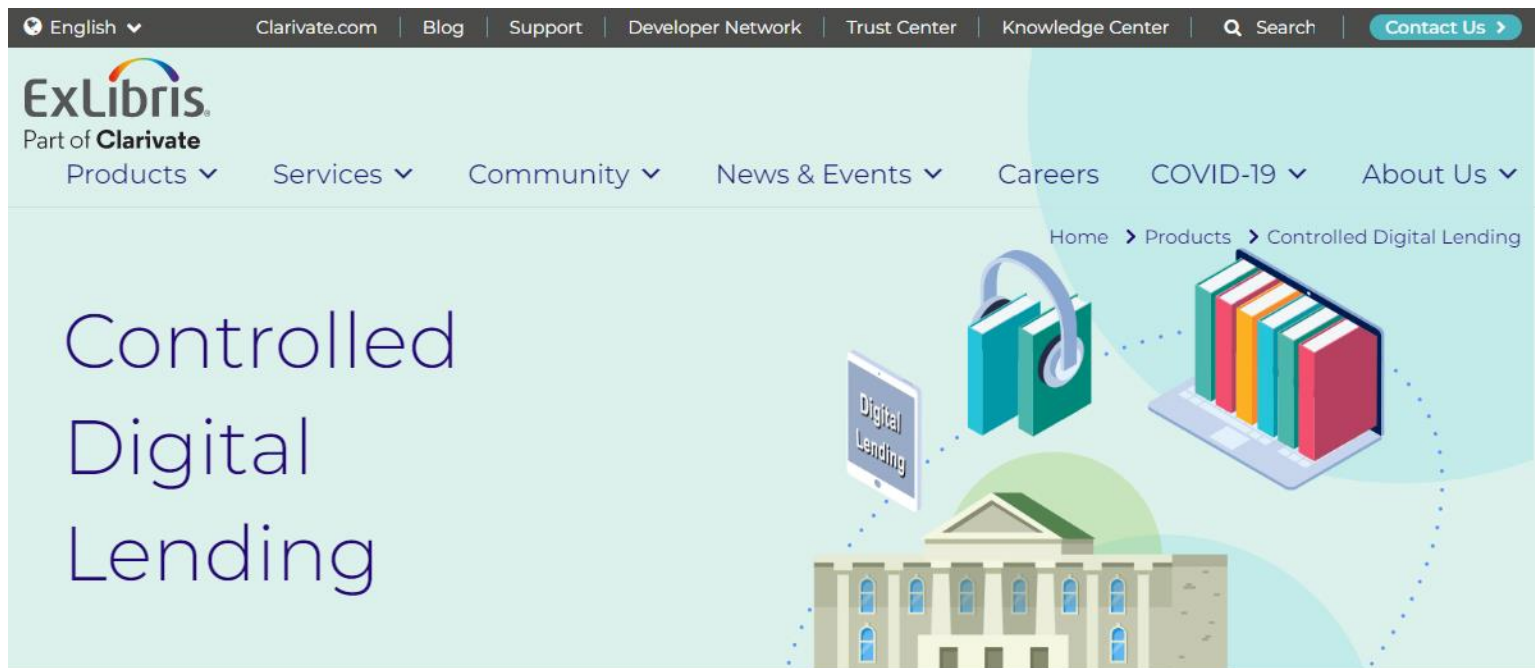

16 June 2021

CDL – Why do academic libraries need it?

- Make it possible for libraries to fulfill their “vital function in society” by providing easy online **access to learning & research** material
- **Digital aides** for readers with print disabilities, research efficiency needs and more
- The “Twentieth Century Problem” - older books still under copyright but **unlikely ever to be offered digitally** by commercial services
- **Additional:**
 - Quick lending turnaround
 - Print conservation
 - Ecological awareness – saving shipments for resource sharing

CDL as a Service

Controlled Digital Lending (CDL) is a developing practice which allows libraries to lend a digital copy of a physical resource in a “lend like print” manner—that is, in the same way in which they lend the physical resource itself. CDL can give libraries and patrons the option of accessing materials in a more flexible manner.

CDL Focus Areas

Course Resources – Alma D

- Short term access
- Patron waitlist management

Available
Now!

General Circulation – Alma

- Long term lending
- Sync digital / physical fulfillment

Inter Library Loan (ILL) – Rapido

- Consortia
- Single institutions
- ISO ILL for CDL conformance

CDL for Course Resources

- Limit number of **concurrent users** according to number of items on shelf
- Limit viewing session to X hours
- Enable **patron waitlist** for digital resources
- Any viewer, any discovery layer – Primo, Leganto etc

Long-term Loans – Roadmap Plans

- Long term loans with CDL copy
- Integrate with physical circulation / fulfilment flows (including Terms of Use)
- Sync physical and digital fulfillment, maintaining own-to-loan ratio
- Leverage Alma as a unified resource management system

Resource Sharing – Roadmap Plans

- Enable libraries to share CDL resources
- Ensuring the physical copy cannot be circulated until the CDL copy is “returned” and maintaining the own-to-loan ratio
- Offering patrons visibility upon discovery of CDL available options
- Conformance with ILL CDL

CDL General Areas of Work

Copyright

- Own-to-loan ratio
- Prevent redistribution
- Exempt specific user groups from CDL
- Other: Advanced copyright statement management; Watermarks

Fulfillment

- Limit session period
- Waiting list
- Any viewer, any discovery layer – Primo, Leganto etc.
- Other: Closed captions / subtitles for patron accessibility

Administration

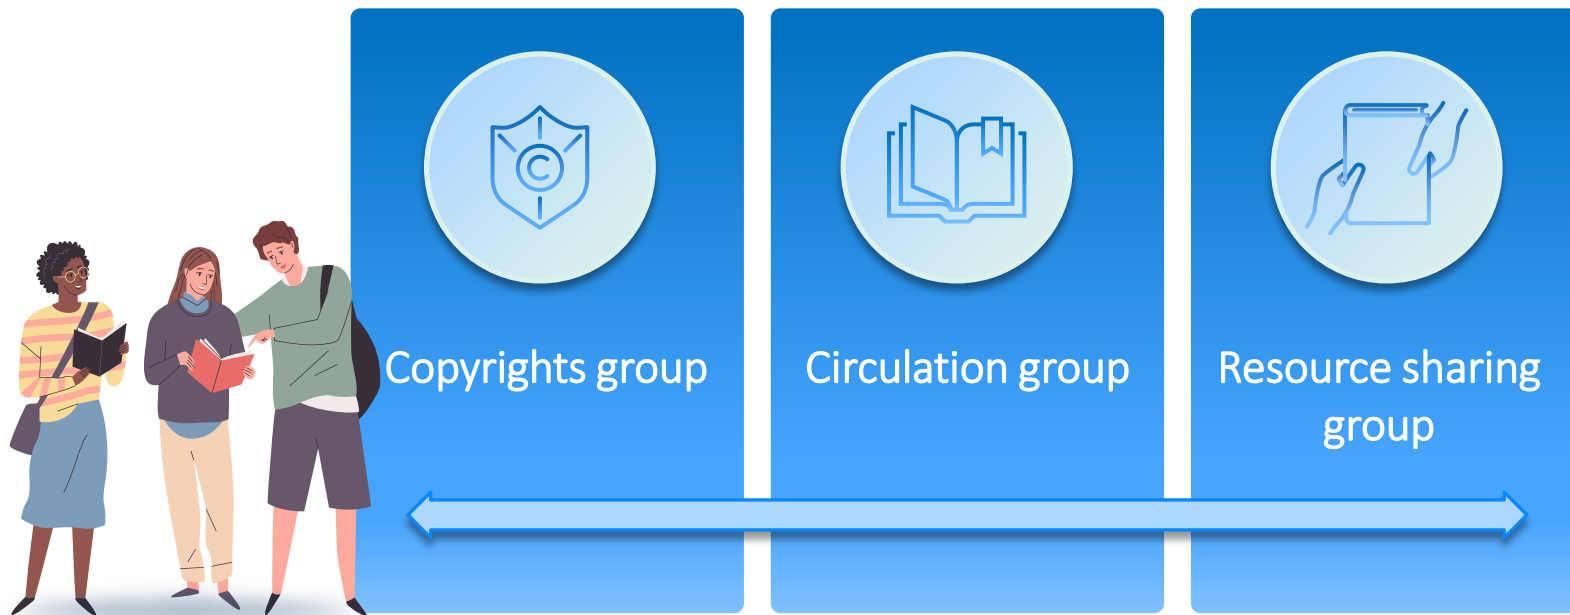

- Waitlist control
- Analytics:
 - Average waiting time per resource
 - Early returns

CDL – You can't do it on your own..

Community driven approach

The Ex Libris community formed The CDL Advisory Group, providing advice, user stories, workflows and shared experiences on the various areas related to CDL mainly focused on three areas relevant for Controlled Digital Lending:

The CDL Advisory Group

But who really wants CDL?

- Together with the Advisory Group we launched a survey with very interesting results and broad participation
- 94 institutions provided responses

CDL Survey

Is your institution interested in controlled digital lending?

110 responses

- Yes
- No
- We have already implemented a CDL solution

CDL and Library Usage

Please indicate for which use cases you would like to apply CDL

82 responses

CDL – Decision Making

Please rank in order of priority in deciding to implement a controlled digital solution for course reserves or general circulation at this time.

CDL and Resource Sharing

Is your institution interested in implementing CDL flows for inter-library loans (ILL)?

109 responses

CDL – Decision Making

Please rank in order of priority in deciding to implement a controlled digital solution for inter-library lending at this time.

What is happening now?

Working with a group of
development partners
