

# Citation Metadata: From Library Data to Student View

Jessie Ransom

Kevin Lane-Cummings

EX LIBRIS  
*Knowledge Days*

Leganto

ExLibris<sup>®</sup>  
Part of Clarivate

# Welcome and Introduction

## Jessie Ransom

- Lead Product Manager for Leganto
- Denver, USA
- ExL / CLVT for 8 years; previous 6 years as a librarian

## Kevin Lane-Cummings

- Senior Customer Education Trainer, Global Education
- Seattle, USA
- SerSol / PQ / ExL / CLVT for 14 years

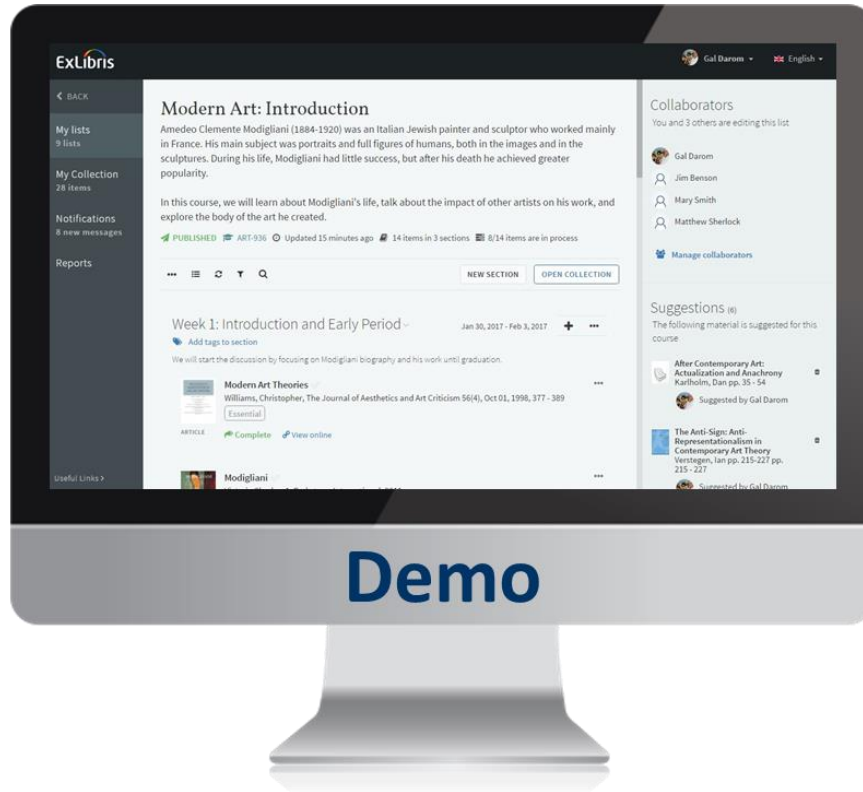

# Agenda

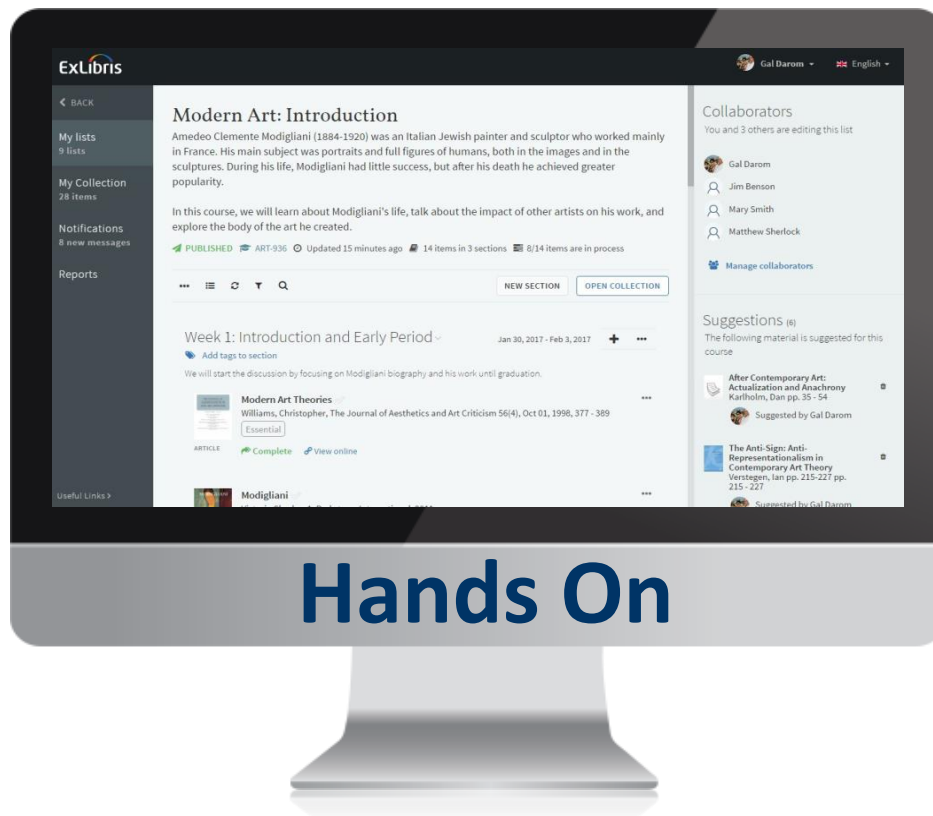

- **Overview: How Leganto Leverages Library Data**
- Configure Leganto to Work for You
- Leverage Leganto to Support Your Workflows

# How Citations Link to Inventory

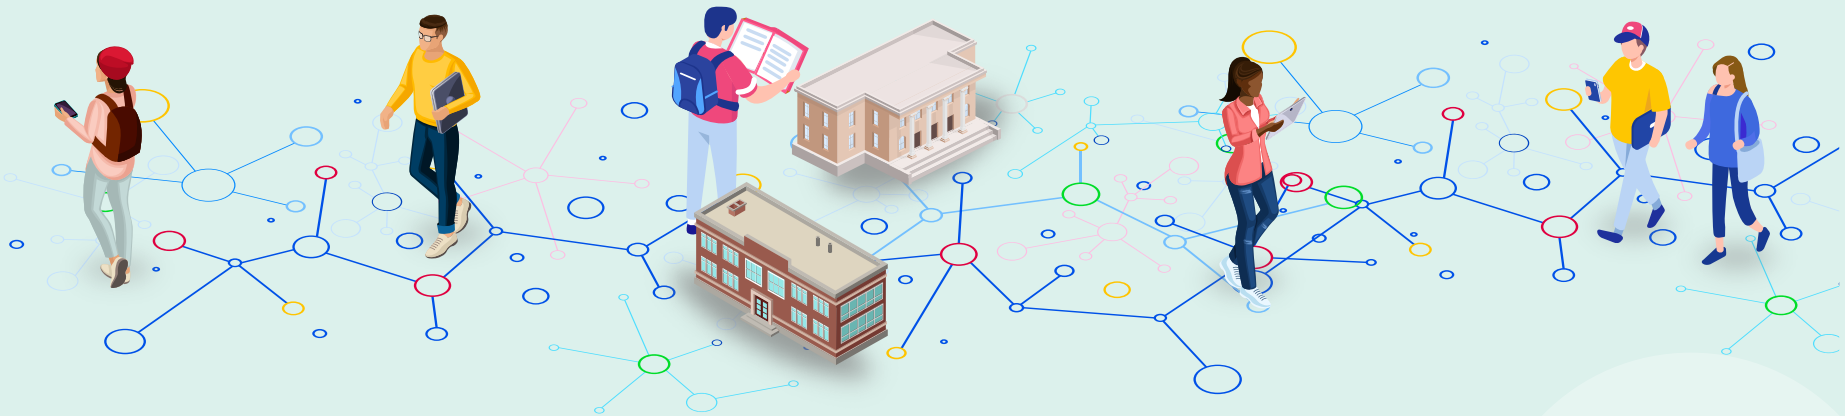

# How Citations Link at Your Institution

# Hands-On Exercise

1. In your Alma, find a physical item in your IZ that is a book
2. Note the title and ISBN
3. In your Leganto, create a new reading list (or open an unused or test list)
4. Add Items > Blank Form
5. Fill in metadata:
  - Title: [enter the wrong title]
  - Type: Book
  - ISBN: [use the correct ISBN]
  - Add & Close

# How the magic happens

# Items added directly from discovery

Items added directly from discovery are automatically linked to library collections

The screenshot shows a library catalog item page for "Introduction to Landscape Design". The page includes a title, publication information (PUBLISHED LAA 150 (2022)), and a "More info" link. Below the title, there are buttons for "LIBRARY REVIEW", "NEW SECTION", and "ADD ITEMS +". A red box highlights the "Library Search" button in the top right corner of the page. The main content area shows "Weeks 1-2: Introduction" with a list of items, including "Landscape Architecture" and "Claiming Landscape as Architecture".

The screenshot shows a search dropdown menu titled "Search Library Resources". The menu is open, showing a list of search options. The "Library Catalog" option is highlighted in blue. The options listed are: "Search everything", "Library Catalog", "Articles and more", "Digital", "Newspapers", and "Alma". There is also an "Advanced Search" link at the bottom of the menu.

# Items added without checking library collections

For items added in other ways (using Blank form, Cite it!, File upload, etc) Leganto attempts to locate the resource in the library.

The screenshot shows the Leganto interface for a book titled "Introduction to Landscape Design". The book is published by LAA 150 (2022). The interface includes a "LIBRARY REVIEW" button, a "NEW SECTION" button, and an "ADD ITEMS +" button. A red box highlights the "Blank Form" button in the right-hand sidebar. Below the main title, there are sections for "Weeks 1-2: Introduction (6)" and "Landscape Architecture" by Steven Moorhead, Massachusetts, Rockport, 1997, Total Pages 220. A note indicates to "Read chapter 6" and it is marked as "Essential". The book is "Complete Available" at Main Library Reserves. A second entry for "Claiming Landscape as Architecture" by Charles Waldheim is also visible.

The screenshot shows the "Add this to my list" dialog box in Leganto. The dialog box has a title bar with the ExLibris logo. A red box highlights the "Covered by your library" checkbox, which is checked. The dialog box contains the following information:

- Title: Landscape planning and environmental impact d...
- Author: Turner, Tom.
- Personal copy:
- Type: Book
- URL:  + Add URL
- Public note:
- Due Date:
- ISBN: 1-280-40268-7; 0-203-21453-6; 1-135-36703-5; 9780203214534; 0...
- Add to:  Collection  List
- Dropdowns: Introduction to Landscape Architect... and Weeks 1-2: Introduction
- Buttons: Add and ADD & CLOSE

# Why connect bibliographic record and citation?

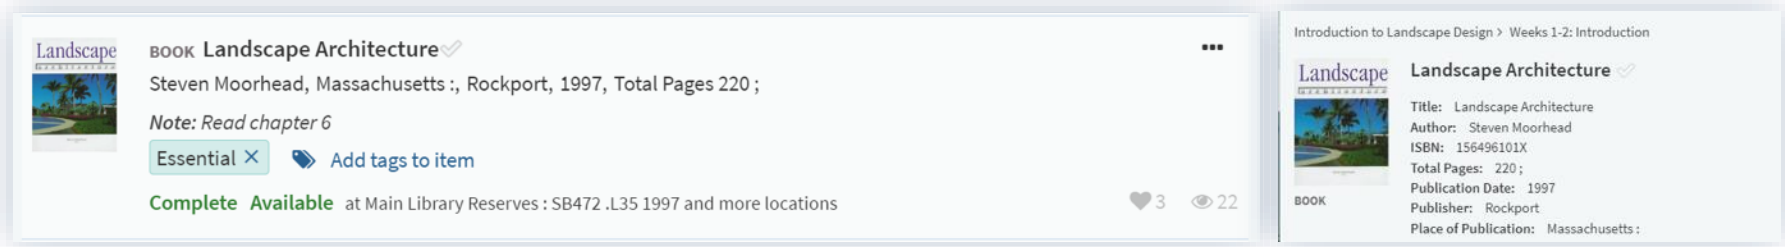

The connection automatically adds:

## 1 | Availability

library inventory is added automatically -  
students always know what your library  
has and how to access it

## 2 | Metadata

no need to manually update citation  
information where instructors might  
not have added enough information  
(or added wrong information)

- > Enable/disable specific fields
- > Move fields priority up/down (relevant only for OR operator)
- > Configure AND or OR mode between fields  
(*resource\_locate\_mode*, **Fulfillment Configuration > General > Other Settings**)

Recommend ISBN/ISSN only or ISBN/ISSN AND Title

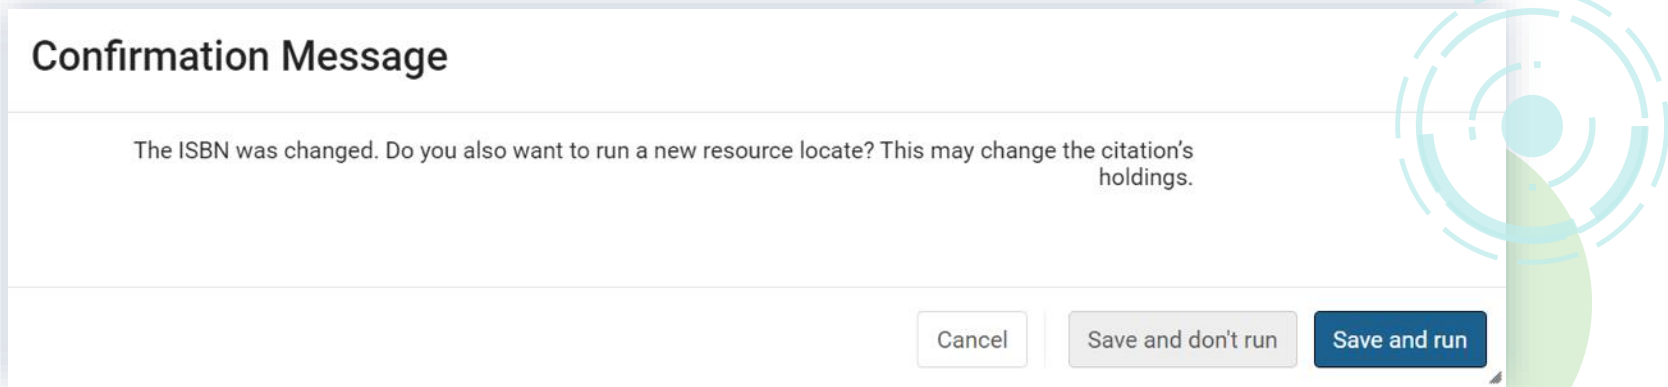

**Fulfillment Configuration > Courses > Locate Citation By Fields**

# Configure locate to run when a citation is updated

You can configure whether another resource locate is performed on an already located citation when the citation's resource identifier, such as ISBN, is changed.

When you change any of the citation metadata listed in the Match by Fields table (in [Fulfillment Configuration > Courses > Locate Citation by Fields](#)), a new resource locate is performed.

Configure **relocate\_modified\_citation** parameter in [Configuration Menu > Leganto > General > Settings](#)

A screenshot of a confirmation message dialog box. The dialog has a title bar that says "Confirmation Message". The main text area contains the message: "The ISBN was changed. Do you also want to run a new resource locate? This may change the citation's holdings." At the bottom of the dialog, there are three buttons: "Cancel", "Save and don't run", and "Save and run". The "Save and run" button is highlighted in blue. There is a decorative graphic on the right side of the dialog consisting of concentric circles and a green shape at the bottom right.

**Confirmation Message**

The ISBN was changed. Do you also want to run a new resource locate? This may change the citation's holdings.

Cancel Save and don't run Save and run

# What happens if there are multiple matches?

If there are multiple matches you can:

**manually** select the correct match:  
potentially more accurate, but more  
manual work

OR

**set priority by inventory type**

If you set priority by inventory type, set the priority between **electronic**, **physical**, and **digital**.

For example, first look for a match to electronic inventory, then physical, then digital.

[Configuration Menu > Fulfillment > General > Other Settings](#)

`resource_locate_multiple_matches`  
`resource_locate_multiple_matches_priority`

# Connect only material types you need

You may not want to locate all material types if you don't manage them in your Alma repository (consider ignoring blogs, legislation documents, poems, transcripts, websites, etc.)

Minimize mismatched items by configuring that only specific material types will be located

Configure with *resource\_locate\_by\_type* in [Fulfillment Configuration > General > Other Settings](#)

# Configure how the citation metadata is updated

Upon locate, metadata from the bibliographic record is copied to the citation.  
The system can be configured to:

## OVERLAY

Override information in the citation with information in the bib

## MERGE

Only missing citation information is filled in using information from the bib

## IGNORE

Ignore the information in the bib, keeping only the citation metadata

Recommend Overlay or Merge, to take advantage of cataloging work already done

Define with *on\_locate* parameter in

[Configuration Menu > Fulfillment > General > Other Settings](#)

# Customize how metadata is mapped to citations

After a match is found, you can configure what fields are copied to the citation

For Primo – [Configuration Menu > Leganto > Discovery > Primo Mapping](#)

For Summon – [Configuration Menu > Leganto > Discovery > Summon Mapping](#)

For Alma - [Configuration Menu > Fulfillment > Courses > Bibliographic Mapping Rules](#)

Configure what happens to Source URL after adding citation using Cite it!

In `move_source_url` in  
[Configuration Menu > Leganto > General > Settings](#)

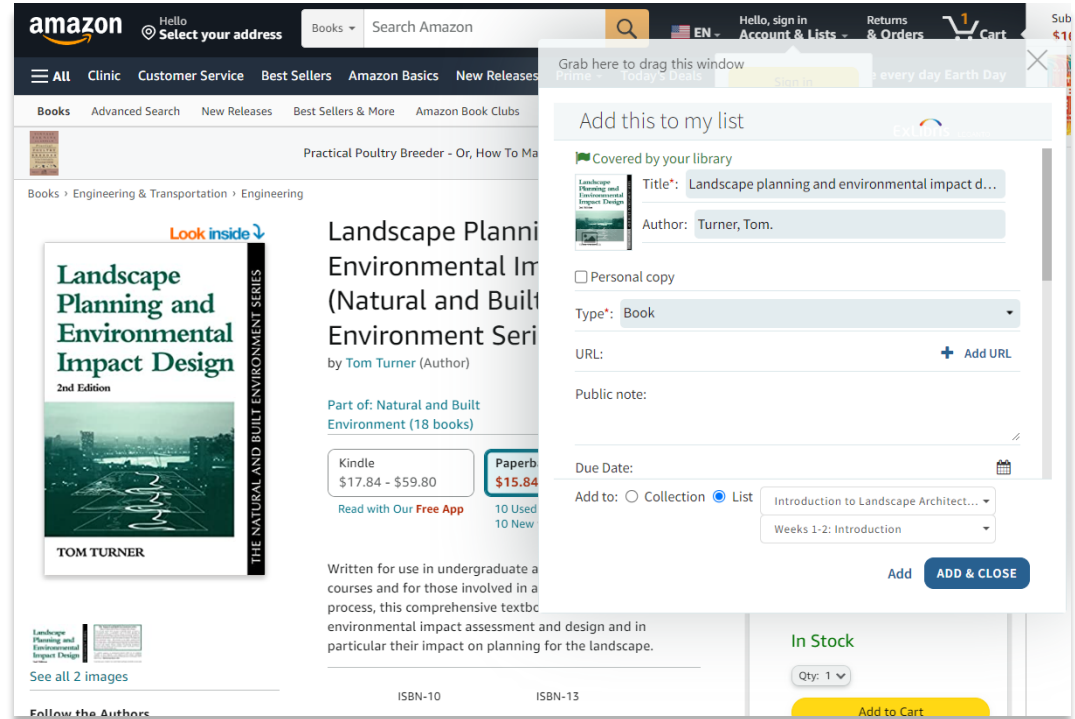

# Configure what happens to the source URL after adding citation using Cite it!

After a match is found, you can configure that the source URL is automatically moved to the note field.

- When matched to bib record
- When matched to CDI record
- When matched to either bib or CDI record (recommended)
- Disabled (keep source URL)

In `move_source_url` in  
[Configuration Menu > Leganto > General > Settings](#)
