
Leganto July 2023 Release Notes

August 2023 Sneak Preview

- Leganto will offer DCS (UK copyright system) support for lists with multiple courses

Main Features

Search for Citations Within a Reading List

July 2023 Fulfillment - Course Reserves

You can now search for a citation within a reading list in Alma. You can search by the following criteria (for descriptions, see [Managing Citations](#)):

- Keyword (default selection) — When selected, this option searches the following citations' metadata fields for a match:
 - Additional Person Name, Author, Book Author, Book Title, Chapter Author
 - Chapter Title, Citation ID, DOI, Edition, Editor
 - ISBN, ISSN, Issue, Journal Title, LCCN
 - MMS ID, OCLC Number, Pages, Place of Publication, Publication Date
 - Publisher, Resource Note, Source, Title, and Volume

Note

- Keyword searches for citations do not support the use of Boolean operators (such as **AND** or **OR**), and if these operators are specified, they are treated as keywords.
- When special characters (such as hyphen, dash, slash, and so forth) are specified as search terms, the search will return results that both include and exclude the special characters.

-
- Citation ID
 - Creator — The citation author's name. Note: Additional person names are not included in the search.
 - ISBN
 - ISSN
 - MMS Id
 - Title — Citation title

Citation search list

For more information, see [Managing Reading Lists](#).

Filter Approval Requests by Date Range

July 2023 Fulfillment - Course Reserves SF: 06676661

To filter approval requests by relevance, the Approval Requests List ([Fulfillment > Resource Requests > Approval Requests List](#)) now includes a **Creation date** filter. The default date range displayed is for requests from the most recent year.

Citation Creation date filter

For more information, see [Digitization Approval Requests](#).

Additional Enhancements

- **July 2023 Leganto**

When automatically enrich citations containing a DOI with additional metadata. For institutions whose **AUGMENTATION** profile ([Configuration > General > External Systems > Integration Profiles](#)) is configured to work with CrossRef so that citations containing a DOI with additional metadata can be enriched automatically when a citation containing a DOI is added, the DOI URL is now supported.

- **July 2023 Analytics**

As a reminder, the language field was added as an optional metadata field in the June release. In July, the **Language** field was also added to the following locations. It displays the language of the citation:

- Course Reserves > Citation Metadata Details
- Leganto Instructor Usage > Citation Metadata Details
- Leganto Student Usage > Citation Metadata Details

Resolved Issues

- **July 2023 Leganto SF: 06757525**

Previously, the **Year**, **Month**, and **Day** labels were missing from the blank form. This was fixed.

- **July 2023 Leganto SF: 05321084**

In some cases, the **Student View** included information that should not have been viewable to the student. This was fixed.

- **July 2023 Leganto SF: 06749610**

Previously, the **Other Formats & Editions** section was displayed for electronic items. This was fixed.

- **July 2023 Leganto SF: 06696021**

When sharing a link to a predefined **Find Lists** search, the **Simple/Advanced Search** button did not work. This was fixed.

- **July 2023 Leganto SF: 06740203**

In some cases, you were able to add an item to a locked list. This was fixed.

- **July 2023 Leganto SF: 06748050**

In some cases, Analytics was missing from Leganto. This was fixed.

- **July 2023 Leganto SF: 06736463 06698900 06698908 06719324**

When using the **Enrich by DOI** feature, fields were missing from the item. This was fixed.

- **July 2023 Leganto SF: 06722839**

Previously, when the **Citation's Total Pages** value for a Digitization Request was too complicated to be normalized properly, the **Resource Total Pages** showed **0** rather than returning an unmodified value so that digitization staff can resolve it manually. This was fixed.

- **July 2023 Leganto SF: 06729082**

Previously, the **Your search did not match any physical resource in the library. In order to request the resource from other libraries, please sign in.** message was not translated to the selected language. This was fixed.

- **July 2023 Analytics**

The Leganto dashboards failed after a new prompt was added to them. This was fixed.
