Leganto August 2023 Release Notes

September 2023 Sneak Preview

- Access to the new UI for all customers

Main Features

UK Digital Content Store (DCS) Support for Lists Linked to Multiple Courses

August 2023 Fulfillment - Course Reserves

The integration between Leganto and the UK CLA Digital Content Store (DCS) now supports lists linked to multiple courses. Items submitted to the DCS that are associated with multiple courses are sent to the DCS as individual requests, one for each course. The requests are associated if a new course is associated with an existing request. When an item is linked to multiple courses, the **DCS Status** in Alma remains **Request in progress** until Alma receives a collective approval/rejection for all requests submitted for the item. The synchronization job between the DCS and Alma can be scheduled to run up to four times a day to update DCS request statuses. The DCS request statuses are updated using the current synchronization job between the DCS and Alma, which can be scheduled to run.

Note

Currently, when a list is associated with one or more courses and one of the citations has DCS request, users cannot add/remove the course. The option to add/remove a course will be available in a future release.

DCS Status

Note

If there is a DCS failure when extracting a citation, the Citation **Alerts** tab contains a **Details** column that includes the course code.
If multiple notes are received for the request, the value assigned to the **Note** field is `multiple`. You may need to check the DCS for more information.

For more information, see [Integrating with the UKs Digital Content Store (DCS)](#).
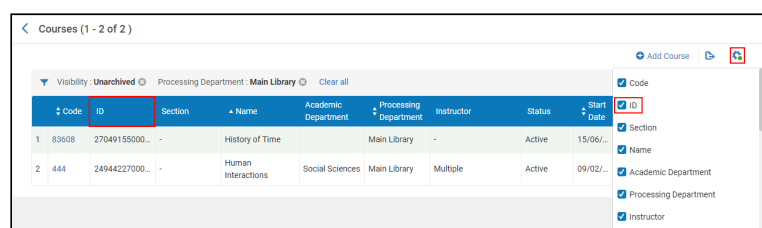

Additional Enhancements

- **August 2023 Leganto**
  Leganto now displays availability information filtered by library view based on your Primo settings. When the parameter **filter_holdings_by_library_view** (**Configuration > Leganto > Discovery > Primo Settings**) is set to **true** (default **false**), when a holding is available at a location that is disabled (**Configuration > Discovery > GetIt Configuration > Primo View to Libraries**), Leganto will no longer display availability for those holdings.

  For more information, see [Configuring Leganto UI Elements](#).

- **August 2023 Fulfillment - Course Reserves**
  It is now possible to use the customization wheel to add the Course **ID** to the Alma courses table display. Additionally, this column is included in the Excel file export. The **ID** column is hidden by default.

Course ID

Resolved Issues

- **August 2023 Leganto** SF: 06771585
  When adding an **E** record that also has a **P** record related to the record, the message indicated that the item was available at **more locations** rather than just one location. This was fixed.
- **August 2023 Leganto** SF: 06696021
  When opening a **Find Lists** share link, Leganto did not open a full search query results. This was fixed.
- **August 2023 Leganto** SF: 06793923
  Leganto did not return Rapido results when enabled in the **Primo View**. This was fixed.
- **August 2023 Leganto** SF: 06784918 06792641 06792653 06796541
  In some cases, the **Section** menu was cut off. This was fixed.
- **August 2023 Leganto** SF: 06782004
  After locking a section, the menu option drop down did not immediately appear. This was fixed.
- **August 2023 Leganto** SF: 06757414
  When updating the citation status from Alma, the modification date did not change. This was fixed.
- **August 2023 Leganto** SF: 06755465
  In some cases, physical items were hidden in student view. This was fixed.
- **August 2023 Leganto** SF: 06757180
  The **Notifications - instructors** (**Configuration > Leganto > Features**) table did not include the "You have joined a new reading list as a collaborator" message. This was fixed.
- **August 2023 Leganto** SF: 06757762
  It was not possible to run the **Activate/Deactivate courses** job using the API. This was fixed.
- **August 2023 Leganto** SF: 06726695
  In some cases, the DCS Synchronize job did not update the **DCS Status** to **Approved**. This was fixed.
- **August 2023 Leganto** SF: 05331127

Leganto sources were excluded from the Alma Link Resolver Usage report. This was fixed.
