Leganto September 2023 Instructor Highlights

November 2023 Sneak Preview

- NERS: Message for students when no list expected
- Student usage overview dashboard
- New UI: Configure list templates in Alma
- New UI: Branding

Main Features

Leganto's New User Experience is Now Available to All Customers

September 2023 Leganto

All customers can now begin testing and using the new user experience. The new user experience represents over two years of research and over a year of development, and we cannot wait for you to try it out. You can test the new UI while still using the classic UI.

See our Getting Started Guide for more information about accessing and beginning to use the new user experience.

When you are ready to switch completely to the new user experience, change the parameter **leganto_new_ui** (**Configuration > Leganto > General Settings > Settings**) to `true`. Once set to **true**, all links to Leganto, including LTI links and shareable links, point to the new UI for all users.

We also have a Frequently Asked Questions page and a Known Issues page, which you can use to check the status of upcoming development.

Many thanks to our customer community for supporting us through this project, and a very special thanks to our 15 early adopters for spending the past three months working with the new UI and sharing their feedback with us.

We want to highlight a few new features that were added to the new UI.

Formatting Notes for Students

Easily add bold, italic, and, underline formatting and links when adding notes for students (formerly public notes).

Formatting options in Note for students

Favorites

My Collection has been renamed to **Favorites**. You can now view the availability information from the brief view of the **Favorites** screen. You can add Favorites to lists from the **Favorites** menu and use the **Quick Cite** feature. You can also export items to a list from the Bulk actions menu.

Favorites bulk actions

Analytics

You can now export Analytics reports from Leganto. Additionally, analytics reports now include the number of loans for physical items.

Export analytics option

Copyrights

You can now configure that instructors must check a **File Upload Copyright** option when uploading a file. Previously, a default option was automatically selected.

File upload copyright option not selected by default

Filter By Status

You can now filter reading lists by item status.
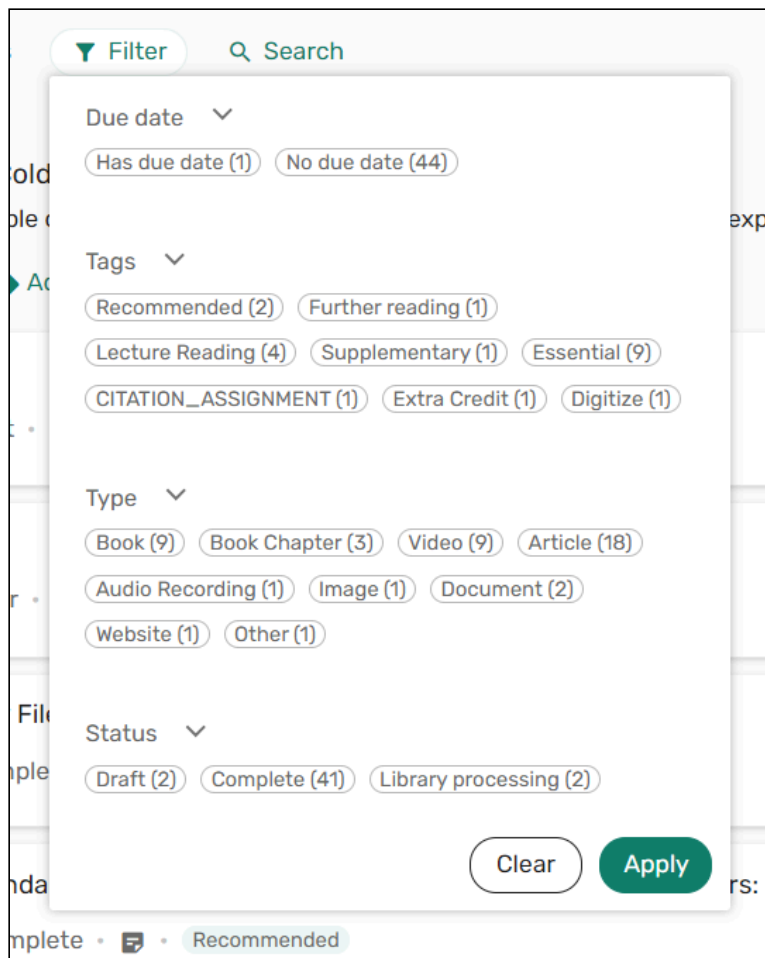

Filter options, including item status

Citation ID

When opening an item's full details, the citation ID is added to the URL. When closing the item, the URL reverts back to the list ID.

List ID

Additional Enhancements

- **September 2023 Leganto**
  You can now configure which materials types can be marked as personal copies. When **instructor_personal_copy_exclusions** is configured (**Configuration > Leganto > Features > Leganto Features**) with any of the codes listed in the Reading List Citation Secondary Types table (**Configuration > Fulfillment > Courses > Citation Material Type**), those citation types do not have the option to be set as **Personal copy**.

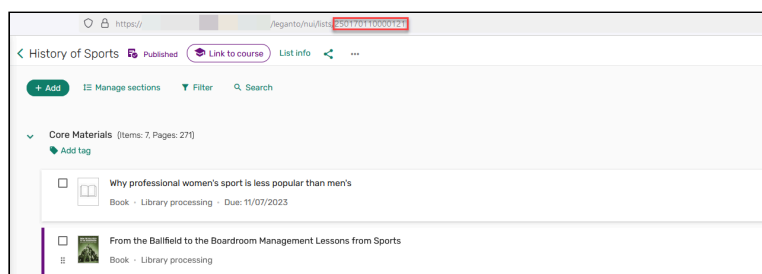

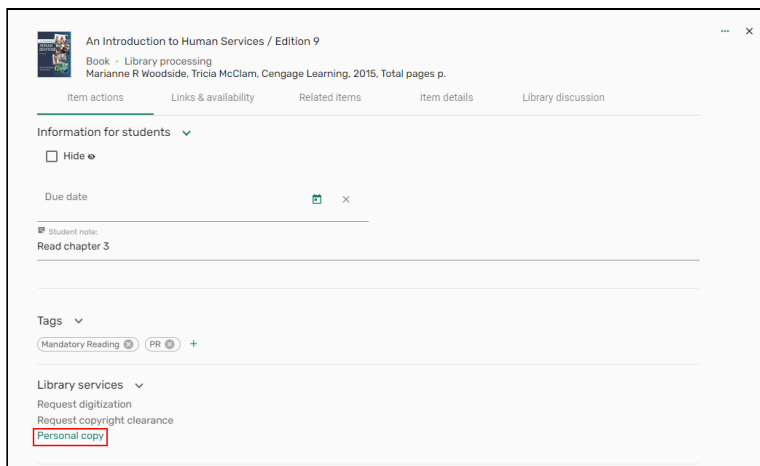

Personal copy

- **September 2023 Leganto**
  If there are changes to CDI links that are part of a collection, when **Update URLs from CDI** is checked when the **Reading List Citation Update Task** (**Admin > Manage Jobs and Sets > Monitor Jobs**) job runs, those links are now updated on Leganto lists.

Note

In cases where a hidden link changed, when the update job runs, the list link will no longer be hidden after receiving the update.
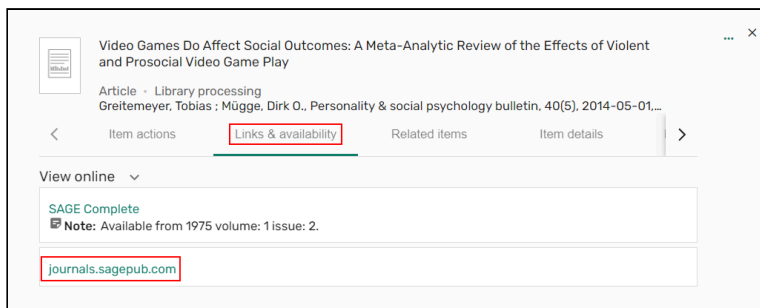

Link to update

For more information, see Manual Jobs on Defined Sets.

- **September 2023 Leganto**
  When **Expiration Days** (**Configuration > Leganto > LTI > Course Management System Roles**) is set for a role, if a user with that role accesses Leganto after the expiration date, Leganto automatically extends that expiration date to

enable those user roles to continue accessing Leganto.

Expiration Days

For more information, see Mapping CMS Roles to Instructors in Leganto.

- **September 2023 Leganto**
When accessing Leganto from an LMS, if browser settings are set to block third-party cookies, the **OPEN NEW TAB** button is now only displayed until it is selected. After selecting the button, the page must be refreshed for the button to be available again.

Open Leganto in a new tab

For more information, see Direct Access to Reading List, Section, or Citation from a CMS.

- **September 2023 Leganto**
Since the embedded file type handling table is no longer in use, the table was removed from Leganto.

Resolved Issues

- **September 2023 Leganto SF: 06823261**
When automatically enriching data using the DOI, the DOI URL format was not correct. This was fixed.

- **September 2023 Leganto SF: 06803495**
In some cases, the Primo Mapping **Concat** option did not concat subfields. This was fixed.

- **September 2023 Leganto SF: 06812405**
Some help videos pointed to the wrong place. This was fixed.

- **September 2023 Leganto SF: 06764265 06815513**
Previously, the Resource Locate process did not run when an item was manually added to a list and **Title_Author** was enabled in the Locate Citation by Fields table (**Configuration > Fulfillment > Courses > Locate Citation by Fields**). This was fixed.

- **September 2023 Leganto SF: 06807751**
When adding an article using a DOI number, the **Publication date** was incorrect. This was fixed.

- **September 2023 Leganto SF: 06731958**
In some cases, changes to a course Name were not saved. This was fixed.

- **September 2023 Leganto SF: 06769624**
When rolling over a list, if the rollover copyright status was set to Copy, the Grace Period After End Date information was not included in the rolled over list. This was fixed.

- **September 2023 Leganto SF: 06476206**
In some cases, the **Reading List Citation Process and Enrich** job (**Admin > Manage Jobs and Sets > Run a Job**) located types that should not have been located. This was fixed.

- **September 2023 Leganto SF: 06759323**

For some styles, Quick Cite generated citations with double quotes (" ") rather than single quotes (' '). This was fixed.

- **September 2023 Leganto** **SF: 06706429**
  In some cases, the **Reading List Citation Process and Enrich** (**Admin > Manage Jobs and Sets > Run a Job**) Job Report indicated **Resource locate match found** even in cases where the resource was not located. This was fixed.

- **September 2023 Leganto** **SF: 06717650**
  Previously, the My list **Sort by**: `Title` was sorted according to Alma titles. Now, when the parameter **list_name_sort_natural_order** (**Configuration > Leganto > List Management > Settings**) is set to `true`, the titles sort alphabetically according to Leganto titles.

- **September 2023 Leganto** **SF: 06597964**
  In some cases, Owners were not added to reading lists courses. This was fixed.

- **September 2023 Leganto** **SF: 05331127**
  Leganto sources were excluded from the Alma Link Resolver Usage report. This was fixed.
