A few points about WebEx

- Technical issues? Exit and rejoin the WebEx session
- Submit questions via WebEx Chat: Select **All Panelists** in the **To:** dropdown menu
- Turn captions on and off in the lower-left corner of the WebEx screen

- **Which CDI Activation Model Do You Use Today?**
- Primo Discovery and CDI
- How EasyActive and FullyFlexible Activate Resources in CDI
- Pros and Cons of Each Method
- How to Switch to EasyActive

Is Your Alma on EasyActive or FullyFlexible?

In your Alma, perform a search:

1. Electronic Collections in IZ
2. Keywords: [any general topic]

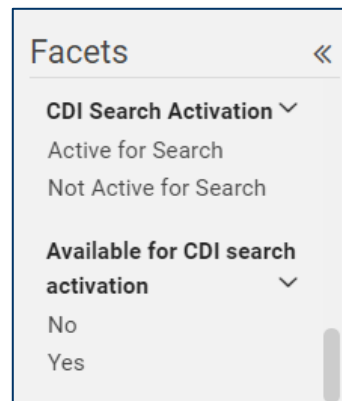

3. On Results page, look for these Facets:

- CDI Search Activation
- Available for CDI search Activation

One or both facets → **FullyFlexible**

Neither facet → **EasyActive**

If You Have EasyActive ... (or if you have Summon)

**Congratulations!
You are done!**

What's in my CDI with EasyActive?

CDI:

- Entire Central Discovery Index

Filtered Search:

- Your available online content

Expand My Results:

- Free-for-search A&I content
- Your subscribed A&I content

NOTE: Content in red must be activated in Alma to be discoverable in Primo VE

What's in my CDI with FullyFlexible?

CDI:

- Entire Central Discovery Index

Filtered Search:

- Your available online content

Expand My Results:

- Your subscribed A&I content
- **Your Free-for-search A&I content**

NOTE: Content in red must be activated in Alma to be discoverable in Primo VE.

Why Is The FullyFlexible Model Offered?

Primo Central Index (PCI)

All A&I content must be activated, even if free-to-search

Central Discovery Index (CDI)

FullyFlexible
(for migrated Primo implementations)

EasyActive
(for new Primo implementations)

Activation Model Pros and Cons

EasyActive	FullyFlexible
 The full range of CDI content is discoverable (15,000+ collections with free search rights).	 Discoverability of CDI content is restricted to only activated collections (typically < 1,000).
 You only need to activate your “available online” content in Alma.	 You need to activate your “available online” content plus your “available for search” content in Alma.
 Newly added CDI content is discoverable in expanded search automatically.	 You need to monitor release notes for new CDI content and activate it as needed for expanded search.
 You cannot control what CDI content is discoverable in expanded search.	 You can specify what CDI content is discoverable in expanded search by activating only collections of interest.
 Patrons may not be able to obtain all material via ILL	 You can choose to only activate collections with content types likely to be available via ILL (for example: books and journals).

Should You Switch?

- EasyActive → no (library) work to maintain
- FullyFlexible → more (library) control; lots of (library) work to maintain.
- Have you been maintaining/adding A&I databases?
- Difference for patrons: Only when they “expand my search”

Considerations for Consortia with a Network Zone (NZ)

How to Switch to EasyActive

Submit a Support ticket asking to switch from FullyFlexible to EasyActive

Support will then send a report explaining what will change in Alma when you switch.

Changes in Alma After Switching

- All CDI search activations will be removed.
- Any collections previously activated for search in CDI that are on the [EasyActive collection list](#) will be activated in Alma.
- All collections previously set to “Active for Full text in CDI only” will be activated in Alma.
- You can’t switch back! (Previous activations are not stored.)

Question Time

Thank you!
