campusM Roadmap

2024

Agenda

2023 Highlights

- React Native – General Availability
- My Profile
- Attendance – Hybrid Check In
- User Activity Level Dashboard

2024 – Themes and Features

- Personalization and Actionability
- App Stability and Attendance
- Integrations
- Library-oriented Features

2024 Timeline

- H1
- H2

Clarivate™

2023 Highlights

# React Native – General Availability
Building for Tomorrow

- Modern React Native technology stack for unified native development

- Faster, more consistent native development

- Smooth, native interactions and animations enhance user experience

- Improved performance

- Accessible by design

Clarivate™

React Native – New Calendar

- Modern, intuitive design that delights the user
- Consolidate time/date-based activities into one view
- Scalable view gives holistic insight into day, week, month, year

Clarivate™

5

React Native – New Map
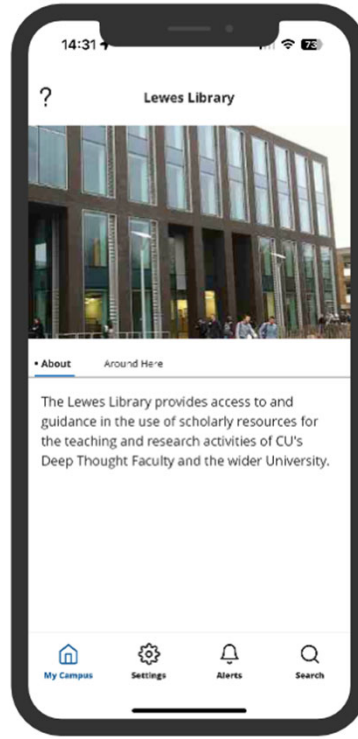

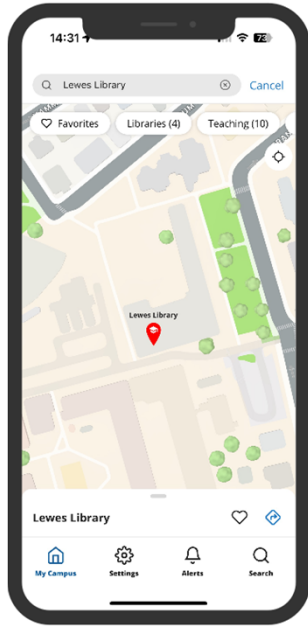

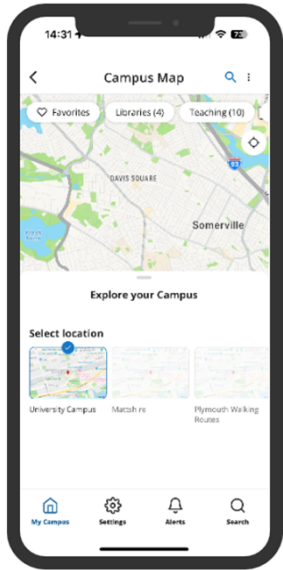

- Easy and straightforward user experience
- Clean and modern look and feel
- Focus on different campuses and filter by category
- Bottom drawer that allows to view a specific location while still seeing the map
- Ability to configure locations that will be shown in all categories

Clarivate™

My Profile

- The cornerstone of user-driven personalization.
- Create and populate your profile with an image, interests and more.
- Tags allow for user-driven personalization.

Attendance – Hybrid Check-in

Hybrid Check-in Validation

Custom check-in types for capture and validation, based on the API data returned for the event.

Enable Hybrid Check-in Validation
'Check-in Validation By User Role', if enabled and valid for the same user, will override this. ☑

Validation List

Item 1 ❌

Timetable Attribute

Config to determine when this validation set is applied.

Timetable API Attribute
Select an attribute from the list below. For any event matches the rest of the configuration in this block, the custom check-in types and validation will be applied.

Online Meeting URL (meetingURL)

Valid If Found
If this is checked, the validation will be applied if the selected attribute exists in the event response, and is not null or undefined. ☑

Set distinct types of validations for different types of classes (such as online and on-site classes).

Clarivate™

Analytics : User Activity Dashboard
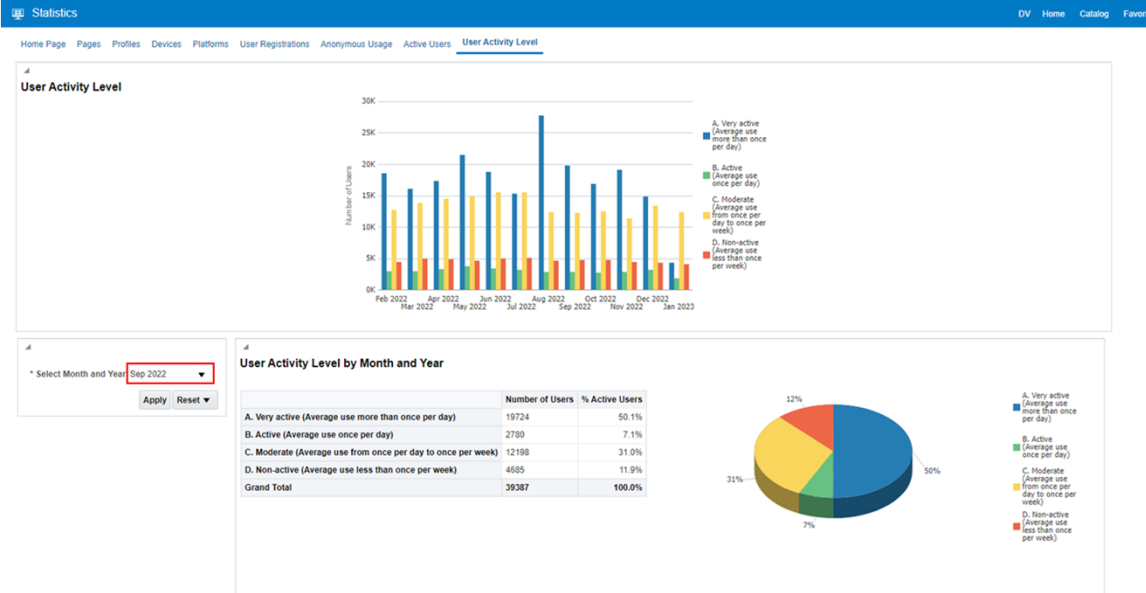

- Brand new Insight Analytics Dashboard provides a useful breakdown around engagement levels of your app users.

- Understand what proportion of your users fall into various levels of activity throughout the year, immediately.

2024 – Themes and Features

2024 – Main Themes of the Year

Personalization & Actionability

Contextualize the experience of your students by giving them the right information at the right time. Drive action effortlessly with upfront and easy to use features.

Stability & Attendance

Scale safely and provide a smooth experience to your students with better error-handling.

Use out-of-the-box tools to quickly spot and resolve issues.

Integrations

Keep integrating seamlessly with more best-of-breed products. Make your app the central hub of the student life.

Library-oriented Features

Enable your students use all the variety of library services in one place.

Fill in My Profile on App Access

Encourage your students to populate My Profile by making it a part of the initial sign in process to access the app.

Use the captured tag metadata to personalize your users' experience based directly on their preferences.

When is this coming?
H1 2024

Personalization & Actionability
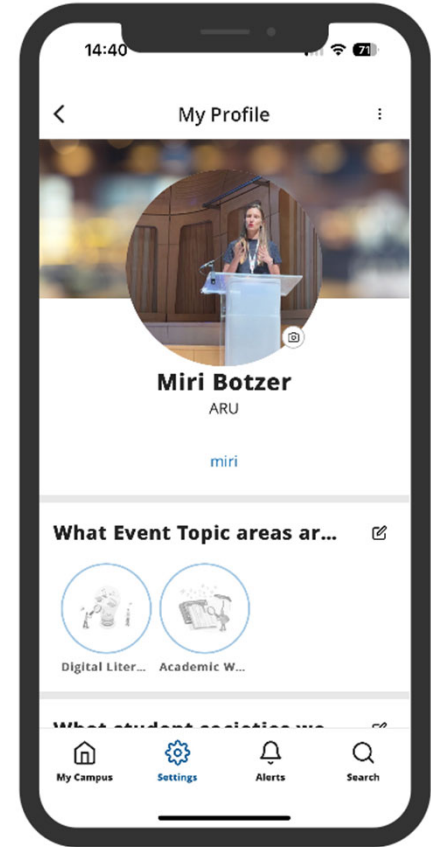

DayView - Show the students what they need, when they need it

DayView is an immediate view of your students' next steps for the day.

With real-time information about their next class, event or task the students will navigate easily through their campus life!

When is this coming?
H1 2024

Personalization & Actionability

Personalization Tools for Administrators

- Analytics – Roles and Tags Addition
 - Gain deeper understanding of the usage statistics with the addition of roles and tags fields. Segment your data to make better decisions regarding the app.

- Role and Tag Logic
  - Manage roles and tags easily by using the operators AND, OR and NOT where needed, instead of creating new roles and tags.

Personalization & Actionability

Clarivate™

Event Recommendations

Ensure your students never miss out on exciting opportunities!

Leverage our recommendations feature to guide students to the most relevant and engaging events. Powered by the Events Product Integration, as well as roles and tags, our system ensures personalized suggestions.

When is this coming?
H2 2024

Personalization & Actionability

Clarivate™
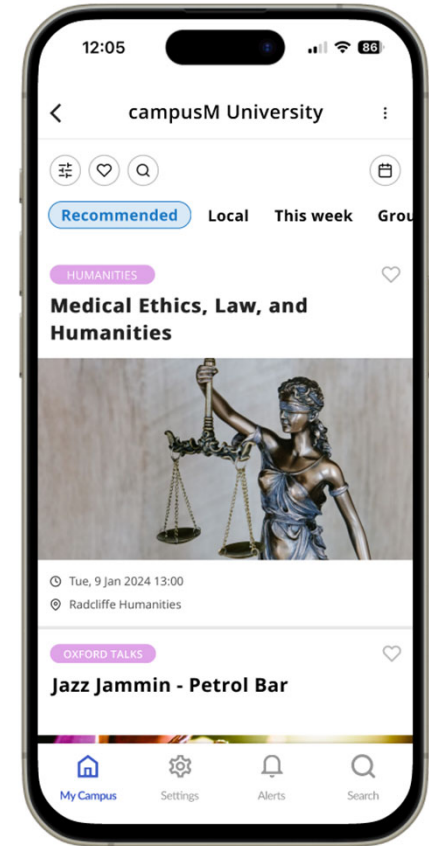

Notification Categories

Enable your students to easily sort through the different notifications sent to them.

Create categories that will help them to quickly find the information and enhance relevancy.

When is this coming?
H2 2024

Personalization & Actionability
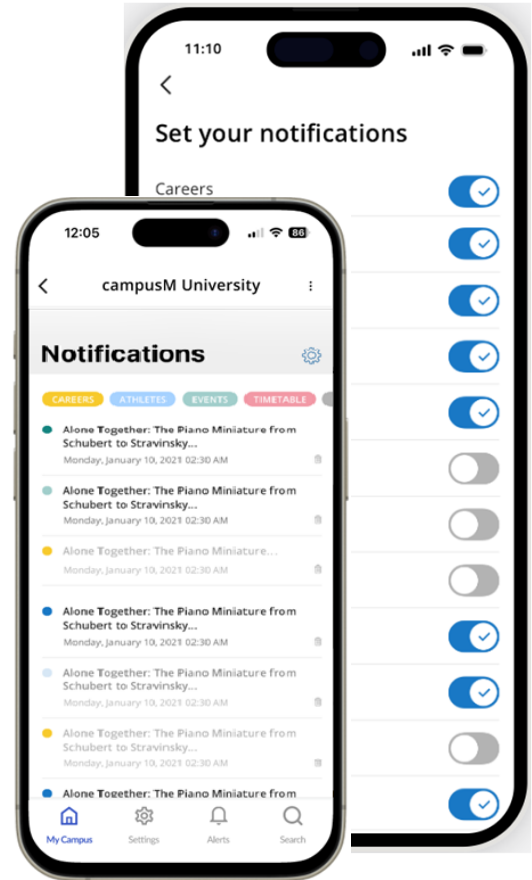

Actionable Notification

Empower Students with Actionable Notifications!

Enable your students to take swift actions right from their mobile home screen using actionable notifications. From event registration to checking into class, our feature enhances convenience, ensuring seamless engagement with essential tasks.

When is this coming?
H2 2024

Personalization & Actionability

Clarivate™

Dynamic Location Information

Leverage the power of our product integrations to incorporate your live resource availability data into Locations, helping your student's find what they need when they need it

For example, available seats, available PCs, accessibility notes, free parking spaces etc.
