

Content Operations

Dear colleagues,

I would like to thank those who attended the Q4 content webinar that took place on March 21st 2023:

Data Excellence at Your Service

If you missed it, the PDF and recording [are available here](#), along with other recorded webinars.

I'm excited to share that out of the 35 highlights in Content Operation's roadmap for Q1, we completed all but two items!

Seven are new content requests posted on Idea Exchange and supported by the community, and five items are for regional non-English content.

In addition to the content listed in the roadmap, our Delivery and Discovery Operations teams have also ingested and maintained many additional resources, including upgrades and modifications to improve our content offerings that were announced in the release notes.

Check out the Q1 roadmap status and our Q2 2023 roadmap for highlights to look forward to in [Alma](#) , [SFX](#) , [360](#) , [Primo](#) and [Summon](#) .

As ELUNA is rapidly approaching, I would like to take this opportunity with an open invitation to schedule face to face meetings with Osnat Vilenchik, Content VP, and myself.

Since we will need to reserve a meeting room, please send me an email by April 25th with several preferred time slots and we would be happy to discuss specific content topics, general content queries and any other insights you would like to share.

If you have any comments or feedback on this newsletter, please feel free to reach out to me directly.

Best,
Tamar
