

Electronic Resource Overlap and Collection Analysis

Yoel Kortick

May 2024

Agenda

- Introduction
- Use Cases
- Accessing the Overlap Analysis
- Use Case One: Compare one electronic collection in CZ to all of IZ
- Use Case Two: Compare one electronic collection in IZ to all of IZ
- Use Case Three: A comparison of a list of titles to all of the IZ

Introduction

Introduction

- To achieve collection development analysis of libraries' electronic holdings, the Overlap Analysis Tool can be used to support multiple use cases.
- Some of the main use cases are:
 - When considering to order an electronic collection, which part of this electronic collection is already covered in other existing electronic collections. This can be used to avoid content overlap and purchasing of duplicate resources.
 - When considering to cancel electronic collections, what full text access would be lost if a resource were cancelled.
 - When the institution receives a file with a list of resources from a vendor which resources are and are not already in Alma.

Introduction

- In this presentation we will look at several of these use cases.
- For more information see [Working with Overlap and Collection Analysis](#)

Use Cases

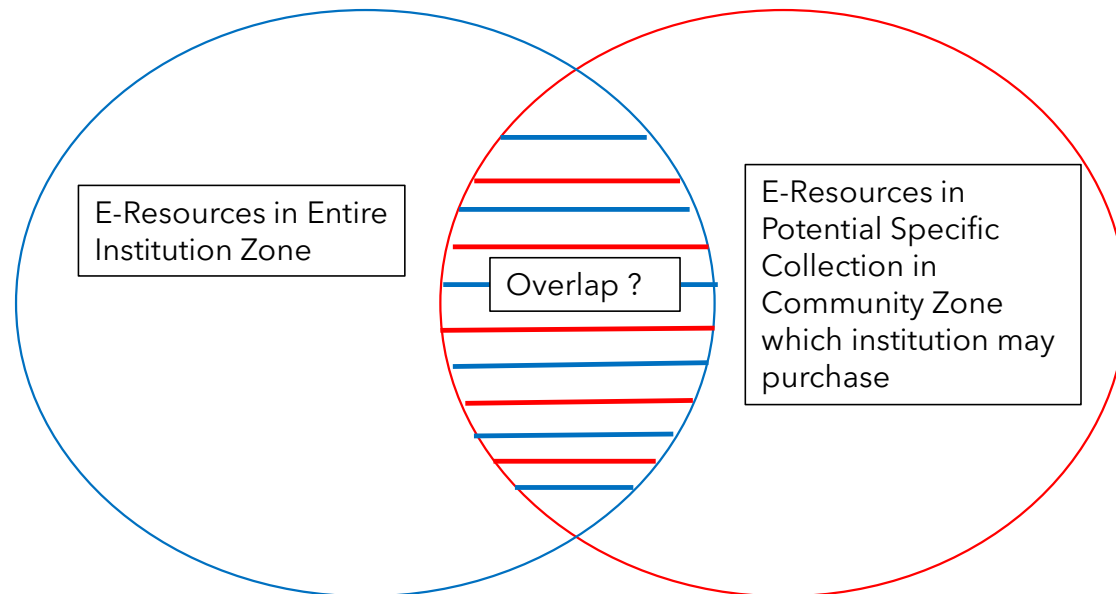

Use Cases

Use Case One

- A comparison of one electronic collection in the CZ to all of the IZ
- Institution is considering purchasing a new electronic collection.
- Before doing so institution can take an electronic collection from the Community Zone that it is considering purchasing and check to see if it has significant overlap with titles already owned by the institution.
- In other words: does it make sense for the institution to purchase the electronic collection from the CZ? Does the institution already have access to the majority of titles via other providers?
 - If there is a lot of overlap, then probably it is not recommended to purchase.
 - If there is little or no overlap, then perhaps it is recommended to purchase.

Use Cases

Use Case One

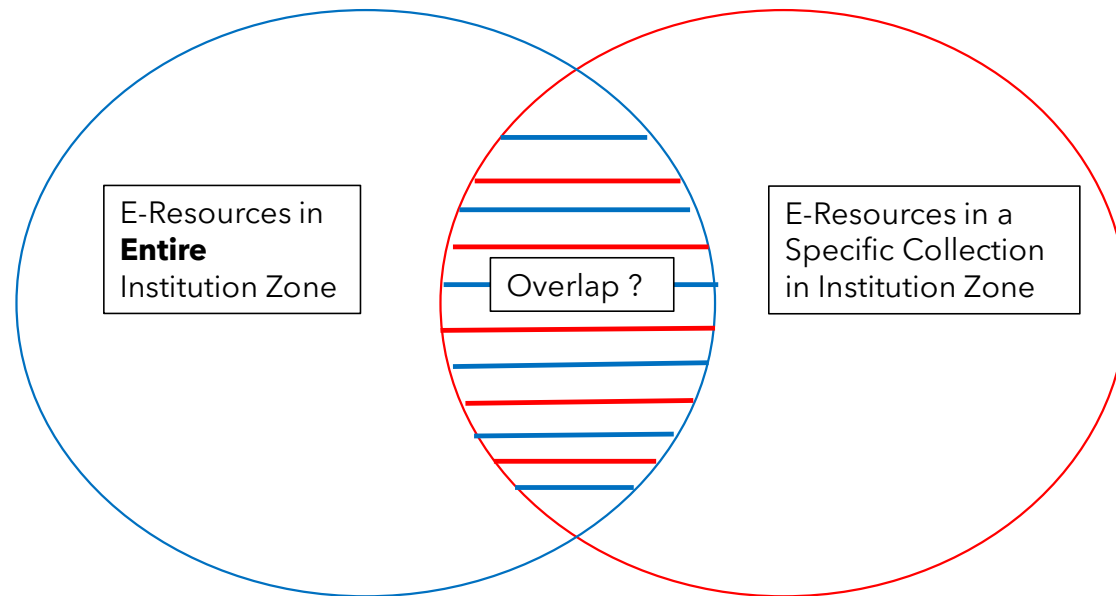

Use Cases

Use Case Two A

- A comparison of one electronic collection in the IZ to **all of** the IZ
- Institution is **considering canceling** an existing (already purchased) electronic collection.
- Before doing so the institution can take an electronic collection **in the Institution Zone** that it is considering canceling and check to see if it has significant overlap with **all** other titles already owned by the institution.
- In other words: does it make sense for the institution to cancel the electronic collection? Will a lot of titles be lost because they are not in other electronic collections?
- If there is a lot of overlap, then probably it is recommended to cancel.
- If there is little or no overlap, then perhaps it is not recommended to cancel.

Use Cases

Use Case Two A

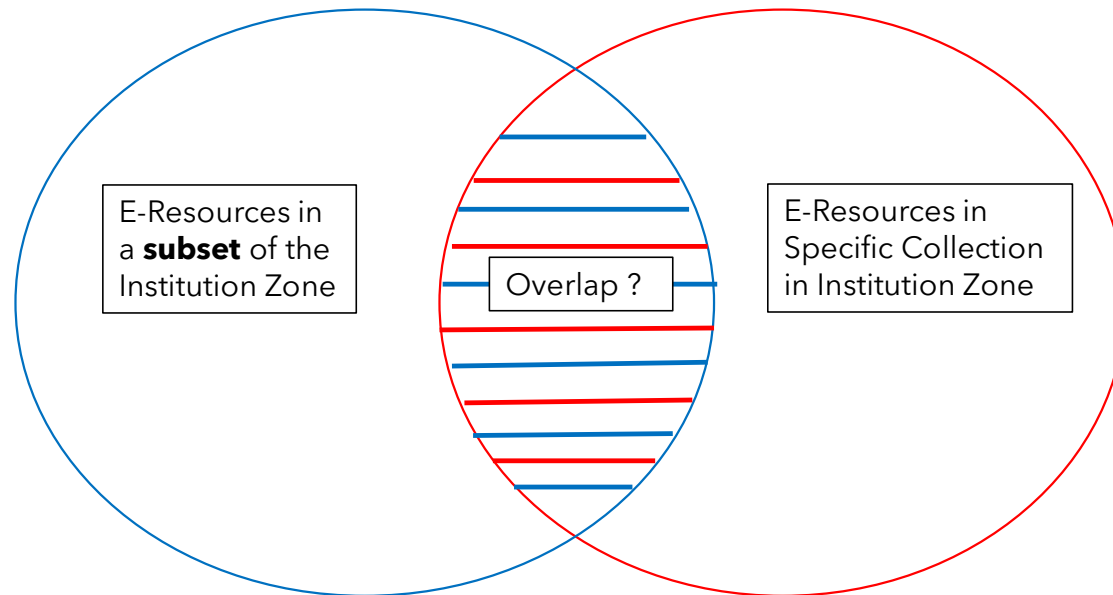

Use Cases

Use Case Two B

- A comparison of one electronic collection in the IZ to **a subset of** the IZ
- Institution is **considering canceling** an existing (already purchased) electronic collection.
- Before doing so institution can take an electronic collection **in Institution Zone** that it is considering canceling and check to see if it has significant overlap with **a subset of** other titles already owned by the institution.
- In other words: does it make sense for the institution to cancel the electronic collection? Will a lot of titles be lost because they are not in other electronic collections?
 - If there is a lot of overlap, then probably it is recommended to cancel.
 - If there is little or no overlap, then perhaps it is not recommended to cancel.

Use Cases

Use Case Two B

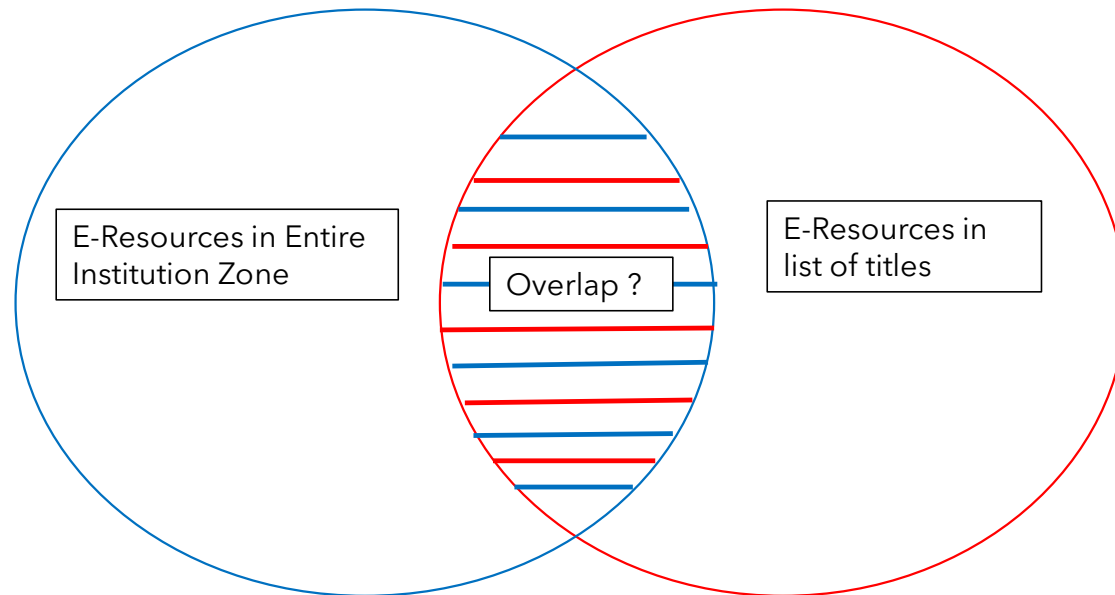

Use Cases

Use Case Three

- A comparison of a list of titles (identifiers of titles) to all of the IZ
- Institution is **considering purchasing** the list of specific titles (which may be part of an electronic collection).
- The vendor sends a list of titles to the institution (or the institution downloads a list from some source).
- The institution compares the list of titles that it is considering purchasing and checks to see if it has significant overlap with titles already owned by the institution.
- In other words: does it make sense for the institution to purchase the list of titles? Does the institution already have access to the majority of titles via other providers?
 - If there is a lot of overlap, then probably it is not recommended to purchase.
 - If there is little or no overlap, then perhaps it is recommended to purchase.

Use Cases

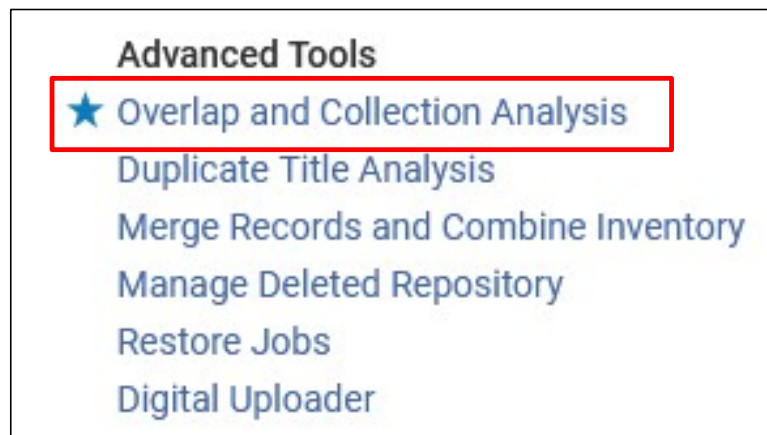

Use Case Three

Accessing the Overlap Analysis

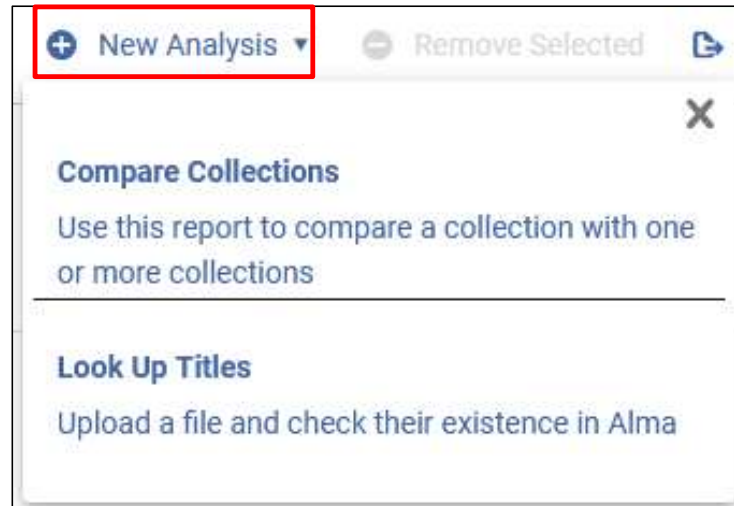

Accessing the Overlap Analysis

- The Overlap Analysis is accessed at Alma Menu > Resources > Advanced Tools > Overlap and Collection Analysis.

Accessing the Overlap Analysis

- Click "New Analysis" and choose desired Analysis Type

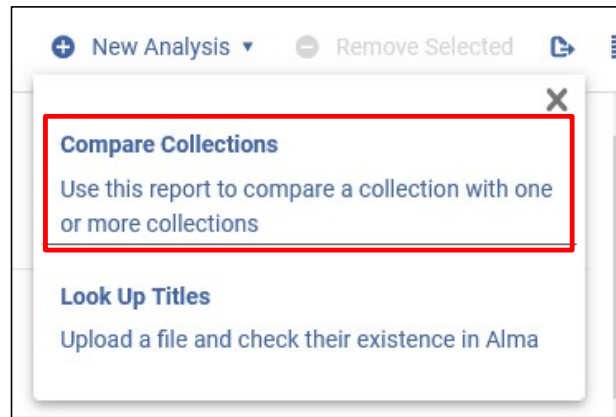

Use Case One: Compare one electronic collection in CZ to all of IZ

Use Case One: Compare one electronic collection in CZ to all of IZ

- In this example the institution is considering purchasing the electronic collection "Elsevier ScienceDirect eBooks Referex Miscellaneous" which exists in the Community Zone.
- As part of the institution's considerations, they want to know how many titles in this electronic collection
 - A. Already exist in the institution
 - B. Are unique (do not exist already in the institution)

Use Case One: Compare one electronic collection in CZ to all of IZ

- Choose "Compare Collections"

Use Case One: Compare one electronic collection in CZ to all of IZ

- Give the analysis a name and description.
- We have given description "Compare Elsevier ScienceDirect eBooks Referex Miscellaneous in CZ with all of IZ"

General Details	Elsevier ScienceDirect eBooks Referex Miscellaneous 2024-04-10 6:06:39
Compare Collections -...	Compare Elsevier <u>ScienceDirect</u> <u>eBooks</u> <u>Referex</u> <u>Miscellaneous</u> in <u>CZ</u> with all of <u>IZ</u>

Use Case One: Compare one electronic collection in CZ to all of IZ

- Click "Generate"

The screenshot shows a software interface with a table of collection data. On the left, there are three menu items: "General Details", "Compare Collections -...", and "Additional Details". The table has five columns. The first column contains the number "1". The second column contains the text "Elsevier ScienceDirect eBooks" and "Referex Miscellaneous". The third column contains the number "61386000000000649". The fourth column contains the number "386". The fifth column contains the text "Community Zone". To the right of the table, there are three buttons: "Saved" with a green checkmark, "Generate" (highlighted with a red box), and "Remove From List".

Electronic collection management level: Ex Libris

We have it from a different electronic collection

[Available For](#) [Other details](#)

Use Case One: Compare one electronic collection in CZ to all of IZ

- This electronic portfolio has nothing in the "coverage" tab that and means that all years are covered.

The screenshot displays the "Electronic Portfolio Editor" interface. At the top, there is a navigation bar with a back arrow, the title "Electronic Portfolio Editor", and three buttons: "Relink to another bibliographic record", "Cancel", and "Save". Below the navigation bar is a tabbed interface with seven tabs: "General", "Linking", "Coverage", "Acquisition", "Notes", "Group Settings", "Related Portfolios", and "History". The "Coverage" tab is selected and highlighted with a red border. Under the "Coverage" tab, there is a question: "Which coverage statement will be applied?" with four radio button options: "Only local", "Global and local", "Global or local", and "Only global". The "Only global" option is selected. Below this are two sections: "Global Date Information" and "Local Date Information". Each section has a dropdown arrow on the right and a large grey area containing a calendar icon and the text "No relevant information." In the "Local Date Information" section, there is a blue "+ Add Date Information" button in the bottom right corner.

Use Case One: Compare one electronic collection in CZ to all of IZ

- Here is (part of) file "Compare Collections - Titles of portfolios with no overlap.xlsx"

This is the "Identifier" because we chose "Title Match Method"

	A	B	C	D
1	Title	Title (Matching Identifier)	MMS ID	Collection - Source Set
2	"Numerical time-dependent partial differential equations for scientists and engineers"	numerical time_dependent partial differential equations for scientists and engineers	992590000000000185	{"Elsevier ScienceDirect eBooks Referex Miscellaneous"}
3	"Carbon nanotubes /"	carbon nanotubes /	991000000000712503	{"Elsevier ScienceDirect eBooks Referex Miscellaneous"}
4	"The Western Alps from rift to passive margin to orogenic belt an integrated geoscience overview /"	the western alps from rift to passive margin to orogenic belt an integrated geoscience overview /	992670000000051627	{"Elsevier ScienceDirect eBooks Referex Miscellaneous"}

We will look at this example on the next slide

Use Case One: Compare one electronic collection in CZ to all of IZ

- In our institution do not already have portfolio "Numerical time-dependent partial differential equations for scientists and engineers" and that is why it appears in the file "Compare Collections - Titles of portfolios with **no** overlap"

The screenshot displays the ExLibris interface. At the top, a search bar contains the text "Numerical time-dependent partial differential equations for scientists and engineers". Below the search bar, the "Facets" section on the left indicates "No facets available." The main content area shows "Electronic Portfolios" with a sub-header "Numerical time-dependent partial differential equations for scientists and engineers". Underneath, there are tabs for "Institution" and "Community", and a "Sort by : Rank" dropdown menu. A red box highlights the message "No records were found." at the bottom right of the main content area.

Use Case One: Compare one electronic collection in CZ to all of IZ

- Now the institution needs to decide if they should purchase the electronic collection "Elsevier ScienceDirect eBooks Referex Miscellaneous"
- As part of the decision-making process the institution now knows that
 - 131 titles (33.94%) have complete coverage overlap.
 - 255 titles (66.06%) have no overlap.
- Thus: if the institution purchases this electronic collection, they will have 255 new titles.

Use Case One: Compare one electronic collection in CZ to all of IZ

- Note that because we chose this when running the job:

<p>Available For Other details</p>		

In electronic collection SANLIC Taylor and Francis SSH we have coverage from 01/01/1997 volume: 21 issue: 1 until 31/10/1998 volume: 22 issue: 4.

In electronic collection Taylor & Francis Library & Information Science Collection we have coverage from 1997 volume: 21 issue: 1 until 1998 volume: 22 issue: 4.

Use Case Two: Compare one electronic collection in IZ to all of IZ

- Now the institution needs to decide if they should cancel the electronic collection "Taylor & Francis Library & Information Science Collection"
- As part of the decision-making process the institution now knows that
 - 8 titles (16.33%) have partial coverage overlap.
 - 41 titles (83.67%) have complete overlap.
 - 0 titles have no overlap
- Thus: if the institution cancels this electronic collection, they will lose partial coverage for 8 titles.

Use Case Three: A comparison of a list of titles to all of the IZ

Use Case Three: A comparison of a list of titles to all of the IZ

- In the scenario here the institution has received a list of titles from the vendor.
- The file has a column with the title and a column with the ISSN.
- We will upload the file and compare it to what we have already in the institution, thereby we will be able to know:
 - Which titles in the input file we already have
 - Which titles in the input file we do not already have
- We are comparing by ISSN. For a list of other identifiers which can be used for comparison see [Excel File Containing Identifiers for Comparison at Performing Look Up Titles Analysis](#) .

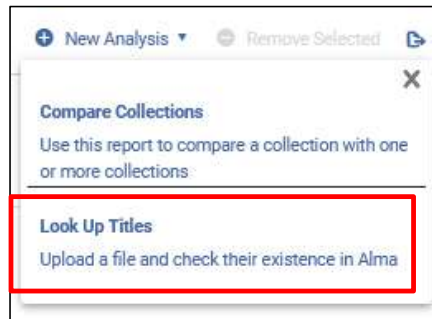

Use Case Three: A comparison of a list of titles to all of the IZ

- Here is our input file

Use Case Three: A comparison of a list of titles to all of the IZ

- We will again run the "Overlap and Collection Analysis" and this time we will choose "Look up titles"

Use Case Three: A comparison of a list of titles to all of the IZ

- We give the report a name and description

General Details	Input file from vendor A Chen Publishers 2024-04-10 8:10:10
Look up Titles - repo... *	See what we have in IZ from file from input file from vendor A Chen Publishers
	Look Up Titles
	Created by  Alicia Chen on 10/04/2024 10:10

Use Case Three: A comparison of a list of titles to all of the IZ

- We will now do as follows:
 1. Upload a file called "Input file from vendor A Chen Publishers.xlsx"
 2. In the section "Select the populations you would like to compare the titles from the input file with:" we will choose "Institution Zone Electronic Resources (including Community Zone activated resources)"
 3. In the section "Choose the report out format" choose "One excel line per match"
 4. We will not select "Include physical title matching indication in the electronic reports"
 5. Click "Generate"

Use Case Three: A comparison of a list of titles to all of the IZ

Analysis Information

Use Case Three: A comparison of a list of titles to all of the IZ

- Here is the example in Alma from "Matches with Multiple Resources"

The screenshot shows the Alma library catalog interface. The search criteria are 'Electronic titles' and 'ISSN: 22490213'. The search results show one record: 'International research : journal of library and information science.' The record details include: Journal (Aligarh : IRJLIS Began with: Vol. 1, no. 1 (June 2011).), Language: English, Peer Reviewed, ISSN: 2249-0213, Record number: (DE-599)ZDB2679438-X, MMS ID: 99174385000121, Modification Date: 05/07/2023 15:02, and Creation Date: 25/02/2012 22:58. A red box highlights the 'Electronic (3)' link, and a red arrow points to it from a yellow box labeled '3 resources'. Below the link is a table of resources:

Navigation: < > | Matches with Single Resource | Matches with Multiple Resources | **No Matches or No Resources** | Analysis Information

Use Case Three: A comparison of a list of titles to all of the IZ

- Here is the example in Alma from "No Matches or No Resources"

The screenshot shows the Alma library catalog interface. At the top, there is a search bar with the following filters and search criteria: "Electronic titles", "ISSN", and "7654323423". The search results page is titled "Electronic Titles 7654323423". On the left side, there is a "Facets" panel that says "No facets available." Below the search bar, there are tabs for "Institution" and "Community", with "Community" selected. There is also a "Select All" checkbox and two dropdown menus for "Sort by : Rank" and "Secondary Sort by : Rank". The main content area is empty, and a red-bordered box highlights the message "No records were found." in the center of the page.
