## SFX

### Release Notes

20140700

### Table of Contents

Changed KB Software

The newly designed linking syntax of RELAIS\_DDL target is released.  
Athens linking functionality has been added for EBSCOHost journals targets.

### Applying the Revision

The following packages are released:

sfx-kbsw-update-20140700.run

sfx-kbdb-update-20140700.run

For directions on applying the revision, refer to the **SFX KB Update** section of the *SFX General User's Guide*.

# Changed KB Software

Type of Change	Component	Description	Solution	File List
Correction	TargetParser	Add an exception to the DE_GRUYTER_ONLINE_JOURNALS target.	The article level linking of the De Gruyter Online Journals target has been modified in order to disable DOI based links when the DOI value is invalid or resolves externally of the vendor's platform.	lib/Parsers/TargetParser/WDG/REF.pm
Correction	TargetParser	Update the Ebsco Athens	Athens linking functionality added for EBSCOHost journals targets based on the EBSCO_HOST::ebsco_am target parser is invoked by setting the \$\$ATHENS_ID flag in the L/P section of the target service area with the value <code>yes</code> .	lib/Parsers/TargetParser/EBSCO_HOST/ebsco_am.pm
Correction	TargetParser	Update the RELAIS::RELAIS target parser, following a platform modification.	The linking structure of the RELAIS_DDL target has been updated following the vendor's platform modification, and the newly designed linking syntax of the RELAIS_DDL target is invoked by populating the \$\$LIB_ID, \$\$SITE_URL and \$\$USER flags in the L/P area of the target service section with the values received from the vendor as follows: The \$\$SITE_URL flag is filled with a value currently existing for your institution. The \$\$LIB_ID flag is filled with an LS (patron's library symbol or agency symbol from the circulation system) value received from the vendor. The \$\$USER flag is filled with a PI (the patron ID in Relais) value received from the vendor.	lib/Parsers/TargetParser/RELAIS/RELAIS.pm
Correction	TargetParser	Update the target parser to handle article level links of Literature Online with complicated article titles.	The CHADWYCK::LITONL target parser has been modified to handle article level links of the Literature Online target correctly when the article title contains special characters.	lib/Parsers/TargetParser/CHADWYCK/LITONL.pm
Correction	TargetParser	Add the getSelectedFullTxt section to the DOAJ parser.	The DOAJ.pm target parser has been modified to support the "get selected full text" service type.	lib/Parsers/TargetParser/DOAJ/DOAJ.pm
