

# ExLibris Verde

## Service Pack No:

789, December 2011 (784-789)

## Highlights:

Enhancements to the harvester for customers using SFX 4.

## General Documentation for Service Packs:

In the Ex Libris Documentation Center:

Version 2.0\Staff User Information\Verde Staff Users Guide.pdf

Version 2.0\Service Packs and KB Updates\Verde Service Pack Installation Instructions.pdf

Version 2.0\Service Packs and KB Updates\SP Release Notes\Verde SP Release Notes - 2011 12 - 784-789.xls

Change Number	Description	Solution	Related Documentation	Implementation Notes	Module	SI Number
784	The following new fields were added to the "i button" output in SFX: <ul style="list-style-type: none"> <li>• ILL print of fax</li> <li>• ILL secure electronic transmission</li> <li>• ILL electronic</li> <li>• ILL record keeping required</li> <li>• ILL term note</li> </ul>		SFX-Verde Interoperability Guide	These new features will not appear in SFX until SFX's 4.1.5 service pack is installed.	Verde Task	16384-196766 16384-51635 16384-141759
785	The harvester would fail when trying to import very long coverage records.	To solve this, the coverage text for long coverage records will now be truncated (the actual coverage records will be imported as-is).			Verde Task	
786	The harvester now uses a different method to save MARC information to the Verde database, in order to prevent failure in certain situations.				Verde Task	
787	In some cases, the harvester was not releasing the job manager after it finished running, resulting in stuck workflows and e-mails.	This has been fixed.			Verde Task	16384-291316
788	Active e-Standalones that had been activated by the harvester did not show the SFX openURL icon in Verde search results.	This has been corrected.			KB Manager	16384-261170 16384-261118 16384-302864
789	The Subscription Renewal task was limited to a certain number of records at a time.	This has been increased so that the task can process 2,000+ records at a time.			Verde Task	16384-301619
