List of Aleph Tables

Version 22

ExLibris The bridge to knowledge

Table name	Description	Function	Location[1]	Changed or New
5426_to_unicode2	Translates ISO 5426 to Unicode	Server	alephe/unicode	
853_chrono	Chronographic terms used by the 853 field for Serials holdings	Serials	alephe/tab	
853_numbering	Numbering terms used by the 853 field for Serials holdings	Serials	alephe/tab	
aleph_start	Version and/or platform-dependent settings	Server	alephe/root	Various new and updated parameters. Check the Release Notes for more detail
aleph_start_private	Client-specific settings of aleph_start_505	Server	alephe/root	
aleph_startup	Startup definitions	Server	alephe/root	
allowed_languages	Language codes	Server	alephe/tab	
bib_format	Paragraph styles for bibliographic display in forms	Printing	XXX50/tab	
cash_09_translate	Translate sublibrary to a department code, for the cash_09 report purposes	Circulation	XXX50/tab	
check_circ	Error messages linked to circ tables	Circulation	aleph/error_<lng>	
check_circ_override	Minimum password level for each check_circ procedure	Circulation	XXX50/tab	
check_doc	List of check_doc programs for Cataloging	Cataloging	XXX01/tab	
check_doc (error messages)	System driven validation messages for check_doc programs	Cataloging	aleph/error_<lng>	
check_doc.<lng>	Table driven validation messages for check_doc programs	Cataloging	tab	
check_doc_doc	Checks of field occurrence, and of dependency between fields, in Cataloging	Cataloging	tab	
check_doc_field_006	Checks for tag 006 (MARC 21)	Cataloging	XXX01/tab	
check_doc_field_007	Checks for tag 007 (MARC 21)	Cataloging	XXX01/tab	
check_doc_field_008	Checks for tag 008 (MARC 21)	Cataloging	tab	
check_doc_field_ldr	Checks for the LDR tag (MARC	Cataloging	tab	

Table name	Description	Function	Location[1]	Changed or New
	21)			
check_doc_line	Checks of logical structure/connections within a single occurrence of a field	Cataloging	tab	
check_doc_line_contents	Checks contents within a single occurrence of a field	Cataloging	tab	
check_doc_mandatory	Checks of forbidden (or acceptable-with-a-trigger type) errors	Cataloging	tab	
check_doc_new_acc	Fields that should be ignored while checking for unique Headings (ACC) index entries	Cataloging	tab	
check_doc_new_acc_aut	Fields that should be ignored while checking for unique Headings (ACC) index and Authorities entries	Cataloging	XXX01/tab	
check_doc_tag_text	Checks of pre-defined texts for sub-fields (from pc_tab/catalog/tag_text)	Cataloging	tab	
check_doc_unique_index	Fields that should be ignored while checking for unique Direct (IND) index entries	Cataloging	tab	
circ_logger	Error messages linked to the circulation log	Circulation	aleph/error_<lng>	
codes.<lng>	Editable field codes and aliases	Cataloging	pc_tab/catalog	
drm_routines	Check routines for user authorization and payment related to digital rights	OPAC	XXX01/tab	
edi_in_attr	EDI incoming messages attributes	Acquisitions/Serials	XXX50/tab	
edi_out_attr	EDI outgoing messages attributes	Acquisitions/Serials	XXX50/tab	7 EDI-OUT-BUDGET Y (default) = Budget code will be sent in relevant EDI outgoing messages. N = Budget code will not be sent in EDI messages.
edit_doc.<lng>	Document format definition for Web/GUI and printouts	Web/GUI/Printing	tab	
edit_doc_777	Record conversion format for	Printing	tab	

Table name	Description	Function	Location[1]	Changed or New
	export to reference manager such as Endnote			
edit_doc_999.<lng>	GUI/Web OPAC display of the Full format of a record plus links	Web/GUI	tab	
edit_doc_999_aut_aut_lib.<lng>	Display of AUT information on cross references	OPAC	XXX01/tab	
edit_field.<lng>	Formatting of individual fields for the display of bibliographic information	Web/GUI/Printing	tab	
edit_paragraph.<lng>	Paragraphs in bibliographic information displays	Web/GUI/Printing	tab	
expand_doc_bib_z30	Defines which fields from the item record (Z30) are expanded into the bibliographic record	Indexing	tab	
expand_doc_bib_z403	Defines which fields from the object data record (Z30) are expanded into the bibliographic record	Cataloging	tab	New
fix_doc.<lng>	fix_doc routines included in the Catalog/ Menu/Edit/Fix record drop-down menu	Cataloging	pc_tab/catalog	
form_description.<lng>	Determines the subject line for e-mail printouts	Printing	tab	
form_print_method	Print method for printouts	Printing	tab	
form_sms	SMS sending configurations	Circulation	XXX50/tab	
form_sub_library_address	Address type for Acquisitions, ILL & Circulation forms	Printing	XXX50/tab	
formats.<lng>	List of formats for Cataloging	Cataloging	pc_tab/catalog	
generic_fix	Sample table of a processing script for fix_doc_do_file_08 and p_file_08	Cataloging	XXX01/tab/import	
job_list	Scheduling of regular programs that run on the job daemon	Batch Processes	alephe/tab and tab directory of the library	
job_list.conf	Definition of daily and weekly schedules for the job_list	Batch Processes	alephe/tab	
ldap.conf	LDAP configuration file	Circulation	USR00/tab	
library_relation	Relation between libraries by library type	System	alephe/tab	
license	Parameters pertaining to the	Server	alephe/tab	

Table name	Description	Function	Location[1]	Changed or New
	institution's **ALEPH 500** license are defined here, as per the parameters issued by *Ex Libris.*			
marc_country_codes	Country codes used in MARC fixed fields	Cataloging	alephe/tab	
marc_exp.dat	Sub-fields to be included in the open form in cataloging	Cataloging	pc_tab/catalog	
marc_language_codes	Language codes used in MARC fixed fields	Cataloging	alephe/tab	
marc8_xxx_to_unicode	Character conversion tables	Unicode	alephe/unicode	
no_utf_mac	Defines a list of MAC browsers/versions (user agents) that do not fully support UTF-8.	Web	alephe/tab	
no_utf_pc	Defines a list of browsers/versions (user agents) that do not fully support UTF-8.	Web	alephe/tab	
oclc_server_defaults	Used for defining environment variables for the OCLC server	Server	alephe/root	
path_convert	Re-direction of directories for sharing between libraries	Server	tab	
pc_server_defaults	Defaults for the pc server	Server	alephe/root	
pc_tab_acq_fast_cat.<lng>	Fields for fast cataloging in the Acquisitions module	Acquisitions	XXX01/tab XXX50/tab	
pc_tab_cat_conv	Conversion program + parameters for converting imported records in the Cataloging Client	Cataloging	XXX01/tab XXX10/tab	Table added to XXX10/tab environment
pc_tab_circ_fast_cat.<lng>	Fields for fast cataloging in the Circulation module	Circulation	XXX01/tab XXX50/tab	
pc_tab_col.<lng>	Definition of columns in GUI screens	GUI - General	XXX01/tab	
pc_tab_exp_field.<lng>	Field values for the GUI pull down menus	GUI - General	XXX50/tab	
pc_tab_exp_field_extended.<lng>	Sub-library sensitive field values for the GUI pull down menus	GUI - General	XXX50/tab	
pc_tab_fast_circ	Parameters for fast circulation	Circulation	XXX50/tab	
pc_tab_find.<lng>	Fields for searching for a record in the ILL module	ILL	XXX50/tab	

Table name	Description	Function	Location[1]	Changed or New
pc_tab_scan.<lng>	Fields for searching for a record in the ILL module	ILL	XXX50/tab	
pc_tab_sear.<lng>	Definition of GUI SEARCH search options	GUI - Search	XXX01/tab XXX10/tab	
pc_tab_short.<lng>	Display of the 'Brief format' of a record in the Search function	GUI - Search	tab	
pc_tree_c1501	Messages related to the Navigation Windows in the online **ALEPH** modules	GUI - General	aleph/error_<lng>	
permission.dat	Allowed and denied tags for different users	Cataloging	pc_tab/catalog	
prof_alephe	Used to set the ALEPH environment needed for running scripts	System	alephe/root	
remote_catalog.dat	List of remote catalogs for Z39.50 Update Service	Cataloging	pc_tab/catalog	
rep_tab_short.<lng>	Fields for printing bibliographic information in column form for report p-print-08	Printing	tab	
scancode.dat	Headings indexes to be searched (on the field or sub-field level) during cataloging	Cataloging	pc_tab/catalog	Table is now base sensitive. The structure of the table has changed
server_ip_allowed	Access definitions to Web and PC servers	Server	alephe/tab	
tab_85x_import	Matching fields for p-serial-52 (import 85XX records)	Serials	XXX50/tab	
tab_96_def	Default values for p-file-96 (Generic Vendor Records Loader)	Cataloging	XXX01/tab/import	
tab_98_def	Default values for p-file-98 (BNA loader)	Cataloging	XXX01/tab/import	
tab_99_def	Default values for records/items created by p-file-99 (Marcive loader)	Cataloging	XXX01/tab/import	
tab_abbrev	Expanding abbreviations to full text	Cataloging/OPAC	XXX01/tab	
tab_acq_index	Display of bibliographic fields in the order index	Acquisitions	XXX50/tab	
tab_alephadm.<lng>	Table name definition for the ALEPHADM module (for BIB	ALEPHADM	tab alephe/tab	

Table name	Description	Function	Location[1]	Changed or New
	library tables)			
tab_attr_sub_library	IP-based sublibrary relationships with regard to loan/return, cash and reading room management	Circulation	XXX50/tab	Moved from alephe/tab to the tab directory of the ADM library
tab_aut	List of AUT libraries for use in matching BIB library headings	Cataloging	XXX01/tab	
tab_author_num.conf	Define policy for generation Item location information: Author Number, Chronology Number and Call Number	Cataloging/Items/Call Number	XXX01/tab	
tab_base.<lng>	Definition of databases	OPAC/Search	alephe/tab	
tab_base_count	Logical bases (record counters) in Web and GUI browse list	OPAC/Search	alephe/tab	
tab_bib_aut_match	Defines 6XX tags and AUT Index codes for the batch service: Create Additional Subject Heading(s) from Authority (manage-46)	Cataloging	XXX01/tab	
tab_binding	Definition of binding procedures	Serials	XXX50/tab	
tab_block_circ	Parameters for blocking loans	Circulation	USR00/tab	
tab_booking	Defining head/tail times to the starting/ending of booking request	Circulation	XXX50/tab	
tab_bor_address	Chronological periods for patron address types	Circulation	USR00/tab	
tab_bor_id.<lng>	Mangement of system-wide user IDs	Circulation	USR00/tab	
tab_buf_z403	List of programs to build buf_z403 (used to govern access to electronic resources.)	OPAC	XXX01/tab	
tab_cat_hidden_fields	Block specific fields from being displayed in Cataloging	Cataloging	XXX01/tab	
tab_ccl_boolean_operators	Language definitions of CCL Boolean operators	OPAC/Search	alephe/tab	
tab_character_conversion_line	Unicode conversion tables	General	alephe/unicode	
tab_check_circ	Checks for loan/return/renew in Circulation	Circulation	XXX50/tab	
tab_checksum	List of checksum programs	GUI	XXX50/tab	
tab_circ_log.<lng>	Logging of circulation	Circulation	XXX50/tab	

Table name	Description	Function	Location[1]	Changed or New
	transactions			
tab_code_prefix	Prefixes for budget code, vendor code and ILL supplier code	Acquisitions/ILL	XXX50/tab	
tab_cutter	Used for calculating the "Author Number" according to Cutter-Sanborn scheme (valid for non Korean titles).	Cataloging/Items/Call Number	XXX01/tab	
tab_cutter_three	Used for calculating the "Author Number" according to Cutter-Three-Figure scheme (valid for non Korean titles).	Cataloging/Items/Call Number	XXX01/tab	
tab_days	Definition of days and their codes (used for short loans)	OPAC/Circulation	alephe/tab	
tab_dbs.<lng>	Configuration for Advanced Library Statistics	General	XXX50/tab	
tab_delinq.<lng>	Delinquency codes and blocking of permissions in Circulation	Circulation	XXX50/tab	
tab_delivery_locations.<lng>	Delivery locations for booking requests	Circulation	XXX50/tab	
tab_events.<lng>	List of event types for statistics (Z35and Z69)	OPAC/Circulation	XXX01/tab XXX50/tab	
tab_exp_own.<lng>	Defines the possible values for the OWN field	Passwords	XXX50/tab	
tab_expand	List of expand programs merging linked records (from the same and different libraries) for display and indexing	OPAC/Cataloging	tab	
tab_expand_duplicate_field	Definitions for expand_doc_duplicate_field, which duplicates a field	OPAC/Cataloging	tab	
tab_expand_external	Definitions for expand_doc_external, that splits external fields	OPAC/Cataloging	tab	
tab_expand_extract	Creation of a new virtual field for indexing from an existing MARC sub-field	Indexing	tab	
tab_expand_join	Creation of a new virtual field for indexing by joining two or more MARC fields	Indexing	tab	
tab_expand_join_simple	Creation of a new virtual field	Indexing	tab	

Table name	Description	Function	Location[1]	Changed or New
	for indexing by joining all occurrences of two MARC fields			
tab_expand_local_notes.conf		OPAC	XXX01/tab	
tab_expand_sort	Sub-fields arranged in non-alphabetical order for sorting by the expand_doc_sort routine	OPAC/Search	tab	
tab_expand_split	Sub-fields to be indexed or displayed in a different (non-alphabetical) order	OPAC/Search	tab	
tab_export	Retrieval definitions for selection of records to be exported by p-export-01	Cataloging	alephe/tab	
tab_export_03	Configuration for smart barcode export routine	Cataloging	XXX50/tab	
tab_fast_patron_register	Default values for fast patron registration	Circulation	USR00/tab	
tab_filing	Definition of filing and normalization routines	OPAC/Search	tab	Explanation re filing for issn/isbn updated for clarity
tab_filing_call_no	Definition of filing routines for items (based on the LC call nos.)	Cataloging	XXX50/tab	
tab_fix	List of fix_doc programs in Cataloging	Cataloging	tab	New lines added to default setup of the XXX10 library
tab_fix_local_notes.conf	Defines the order of HOL records to be expanded into the BIB record	Cataloging	XXX01/tab	
tab_fix_notes	Defines texts used for translation in the fix routine fix_doc_notes	Cataloging	XXX01/tab	
tab_fix_z103	Item and HOL filtering	Cataloging	XXX01/tab	fix_z103_filter_base can use expand-routines
tab_fix_z103_local_notes.conf	Used for filtering HOLDINGS and ITEMS information in the Web OPAC	Cataloging	XXX01/tab	
tab_hld_stmt	Holdings summary statement building	OPAC	XXX50/tab	
tab_hol_item_create	Defines where in the bibliographic record item and holdings data elements are to be found for the creation of items	Cataloging	XXX01/tab/import	

Table name	Description	Function	Location[1]	Changed or New
	and holdings by p-manage-50			
tab_hol_item_map	Mapping bibliographic values into the relevant holdings and/or items values	Cataloging	XXX01/tab/import	
tab_hol_mapping	Definition of mapping values when creating records with p-manage-500	Cataloging	XXX01/tab	Updated. Col. 3 can have many arguments
tab_hold_request	Checks for hold requests	Circulation	XXX50/tab	Heading updated for booking request checks
tab_hold_request_form	Defining hold request forms for use in the OPAC	Circulation	XXX50/tab	
tab_ill_charge	Parameters for charging for ILL requests	ILL	XXX50/tab	
tab_ill_in_index	Display of bibliographic fields in the ILL incoming requests' index	ILL	XXX50/tab	
tab_ill_index	Display of bibliographic fields in the ILL outgoing requests' index	ILL	XXX50/tab	
tab_io_remote	IP addresses for server to server connections	Server	alephe/tab	
tab_item_history.<lng>	Display of fields in the Item history screen	Cataloging	alephe/tab	
tab_item_list_order	Items display order in the OPAC and Search according to sublibraries of each base	OPAC/Search	XXX50/tab	
tab_itm_mapping	Definition of mapping values when creating records with p-manage-500	Cataloging	XXX01/tab	
tab_jang_il_sei	Used for calculating the "Author Number" according to Jang Il Sei scheme (valid for Korean titles).	Cataloging/Items/Call Number	XXX01/tab	
tab_label.<lng>	Prefixes for spine label printouts	Cataloging	XXX01/tab	
tab_label_parse	Splitting call number and item description when generating item labels	Cataloging	XXX50/tab	
tab_late_return	Defines time and rate for fine method "F" (tab16)	Circulation	XXX50/tab	
tab_lee_jai_chul	Used for calculating the "Author	Cataloging/Items/Call	XXX01/tab	

Table name	Description	Function	Location[1]	Changed or New
	Number" according to Lee Jai Chul scheme (valid for Korean titles).	Number		
tab_library_group	Grouping of libraries to share the same batch processes.	System	XXX50/tab	
tab_loader	Define processing for p-file-90 (Advanced Generic Vendor Records Loader)	Cataloging	XXX50/tab/	
tab_loader_def	Define default values for Record creation by p-file-90 (Advanced Generic Vendor Records Loader)	Cataloging	XXX50/tab/	
tab_locate	Procedures for locating a record in other libraries in OPAC, Cataloging, Search, ILL	OPAC/GUI	alephe/tab	
tab_location_name.<lng>	Location names for Z39.50 server	Z39.50	XXX01/tab XXX10/tab	
tab_map_privileges	Defining the types of global ALEPH Z305 record	Circulation	XXX50/tab	New
tab_mapping	Mapping values. Defines values for holding records created by p-file-90 (Advanced Generic Vendor Records Loader)	Cataloging	XXX01/tab/ XXX50/tab/	
tab_mapping_mng500	Definition of mapping values when creating records with p-manage-500	Cataloging	XXX01/tab XXX50/tab	
tab_match	Match specifications for importing files	Cataloging	XXX01/tab	
tab_match_acc	Fields to check against the headings (ACC) index	Cataloging	tab	
tab_match_script	Match specifications for checking input file against the database	Cataloging	tab	
tab_merge	List of merge routines	Cataloging	XXX01/tab	
tab_merge_adv_overlay	Advanced routines for the merging of document records	Cataloging	tab	
tab_merge_overlay	Fields to retain when overlaying (merging) catalog records	Cataloging	tab	
tab_mime_type	Extension definitions for use in	OPAC	alephe/tab	

Table name	Description	Function	Location[1]	Changed or New
	save-function in the OPAC			
tab_month	Month codes and abbreviations in different languages	General	alephe/tab	
tab_move_record	List of programs for moving records	Cataloging	XXX01/tab	
tab_oclc	OCLC server configuration table	Cataloging	XXX01/tab	
tab_own	Cataloging OWN permissions and filter	Cataloging	tab	
tab_photo_request	Checks for photocopy requests	Circulation	XXX50/tab	
tab_pinyin	Definition of fields for fix_doc_add_pinyin_check_sub9 and fix_doc_add_pinyin_insert_sub9	Cataloging	XXX01/tab	
tab_preferred	Defines settings for preferred records when merging document records	Cataloging	XXX01/tab	
tab_roster	Controls the order that the roster batch job (p-cir-79) moves requests from institute to institute	Circulation	XXX50/tab	New
tab_service	Table for defining services in the Web OPAC	OPAC	XXX01/tab XXX10/tab	
tab_sfx	Defines under which conditions the SFX button will appear in the Web OPAC.	OPAC	XXX01/tab	
tab_sfx_denied	Defines under which conditions the SFX button will not appear in the Web OPAC.	OPAC	XXX01/tab	
tab_sip2.conf	Self-check definitions for SIP2	Circulation	XXX50/tab	
tab_sip2_alert	Self-check field alert definitions	Circulation	XXX50/tab	
tab_sip2_translate	Self-check field definitions	Circulation	XXX50/tab	
tab_sort	Fields for sorting in OPAC and GUI Search	OPAC/Search	tab	
tab_sub_lib_sort	Definition of sublibraries' list sorting in various ALEPH functions	General	XXX01/tab	Web Customize Brief View screen - For LOC and PST lines WWW-FULL-LOC-PST
tab_sub_library.<lng>	List of libraries and sublibraries	General	alephe/tab	

Table name	Description	Function	Location[1]	Changed or New
tab_sub_library_address.<lng>	Addresses of sublibraries for printouts	General	alephe/tab OR XXX50/tab	
tab_subfield_punctuation	Standard punctuation to be added to sub-fields for OPAC display	OPAC	XXX01/tab XXX10/tab	
tab_suf_bor_defaults	Shared patron statuses	Circulation	alephe/tab	
tab_suf_default	Shared user definitions	Circulation	alephe/tab	
tab_suf_lib	Shared user definitions	Circulation	alephe/tab	
tab_suf_loc_borid	Shared user definitions	Circulation	alephe/tab	
tab_tag_text	Default tag values when creating new records	Cataloging	tab	
tab_type_config.<lng>	Specifications of new fields created by expand_doc_type routines	Indexing	XXX01/tab	
tab_vat_percent.<lng>	Codes for VAT percentages (for ACQ invoices)	Acquisitions	XXX50/tab	
tab_vendor_sub_lib	Sublibrary specific and generic vendor fields	Acquisitions	XXX50/tab	
tab_version	Client definitions to access the pc_server	Server	alephe/tab	
tab_weights	Weight factors for determining candidate records	Cataloging	XXX01/tab	
tab_word_breaking	Definition of word breaking procedures	Indexing	XXX01/tab XXX10/tab	
tab_xyz	Defines the "XYZ" index that should be used to strip subject subdivisions.	Indexing	XXX01/tab	
tab_yankee_def	Default values the YBP loader (p-file-96)	Acquisitions	XXX01/tab/import	
tab_z0101	Brief record (Z0101) structure based on format, index and field of origin	Indexing	XXX01/tab	
tab_z0101_text	Text codes and definitions for the brief record	Indexing	XXX01/tab	
tab_z103	Programs for building links between records	Server	tab	
tab_z105	Record update messages to be sent to other libraries	General	tab	
tab_z105_filter	Fields to retain when replicating	General	tab	

Table name	Description	Function	Location[1]	Changed or New
	z105 messages (ue_11)			
tab_z105_z30	Defines when a message from one library to another will not be created following a Z30 update	General	XXX50/tab	
tab_z121	Definitions for the web service search engine	OPAC	XXX01/tab	
tab_z30	Default values for items created using the OCLC server	Cataloging	XXX50/tab	Col. 1: The code DEF can used as a default holding code. This is possible ONLY for a single ADM environment. Multi-adms must define all possible holding codes in their tab_z30 tables.
tab_z30_sort	Sort options for items	OPAC/GUI	XXX01/tab XXX50/tab	
tab_z31_sort	Definition of cash (z31) sort types in various ALEPH functions	Circulation	XXX50/tab	
tab_z311	Counters for z30-call-no/z30-call-no-2 and z30-inventory-number	Cataloging	XXX50/tab	
tab_z403_directory.<lng>	Maps directories of OBJECT files between libraries	ADAM	alephe/tab	
tab_z403_extension.<lng>	Maps extensions to mimetypes and icons for the Web OPAC	ADAM	alephe/tab	
tab_z403_info.<lng>	Defines which fields from the object record (Z403) are expanded into the object info.	ADAM	alephe/tab	
tab_z36_sort	Definition of loan (z36) sort types	Circulation	XXX50/tab	
tab00.<lng>	Codes and names for indexes: Words, Headings (ACC) and Direct (IND) indexes	Indexing	tab	
tab01.<lng>	Codes and names of cataloging fields	Indexing	tab	
tab02	Initial non-filing words/articles for the Headings index	Indexing	tab	
tab04	Conversion of fields between formats	Cataloging	tab	

Table name	Description	Function	Location[1]	Changed or New
tab05.<lng>	Captions for links between records	OPAC/Search	XXX01/tab	
tab06	Search words not to be highlighted in the full view of a record on the Web OPAC (e.g., "the")	OPAC	XXX01/tab	
tab07	Defines the links between Authority Headings	Cataloging	XXX01/tab	
tab11_acc	Assignment of cataloging records' fields to Headings indexes	Indexing	tab	
tab11_aut	ACC fields used to create hypertext links to FIND and BROWSE from the AUT record	Indexing	XXX01/tab	
tab11_ind	Assignment of fields to Direct indexes	Indexing	tab	
tab11_word	Assignment of fields to Word indexes	Indexing	tab	
tab12	Translation of ALEPH codes to Dublin Core XML elements	Z39.50	XXX01/tab	New
tab14	Item re-shelving time	Circulation	XXX50/tab	
tab15.<lng>	Defines the item statuses and various parameters connected to these statuses.	Circulation	XXX50/tab	
tab16	Due dates, fines and limits on borrowing	Circulation	XXX50/tab	New col. 27 - Adjust due date and hour
tab17	Library open hours	Circulation	XXX50/tab	
tab18.<lng>	Cash transaction types	Circulation	XXX50/tab	Added heading explanations for transaction types 84 and 85
tab20	Links from BIB Headings to AUT Records	Cataloging	XXX01/tab	
tab22	Fields for short doc format (Z13)	General	XXX01/tab	
tab24	Delivery time slots from the Depository	Circulation	XXX50/tab	
tab25.<lng>	Item material types	Cataloging	XXX50/tab	
tab27	Hold requests send method configuration	Circulation	XXX50/tab	New process options in col. 5 – types 6, 7, & 8

Table name	Description	Function	Location[1]	Changed or New
tab30	Patron registration renewal	Circulation	XXX50/tab	
tab31	Patron statuses defaults	Circulation	XXX50/tab	
tab32	Overdue letter intervals	Circulation	XXX50/tab	
tab33.<lng>	Defines the format of the BIB-ADM record that displays in the navigation window in the various GUI modules	GUI	XXX01/tab XXX50/tab	
tab34	Lost materials costs	Circulation	XXX50/tab	
tab35	Location numbers and other information for EDI orders	Acquisitions	XXX50/tab	
tab36	Defaults for automatic opening of monograph items in Acquisitions	Acquisitions	XXX50/tab	
tab37	Pick up list configuration for hold requests	Circulation	XXX50/tab	
tab37_booking_delivery	Booking Requests delivery configuration	Circulation	XXX50/tab	
tab37_booking_pickup	Booking Requests pick up list configuration	Circulation	XXX50/tab	
tab37_campus_filter	Hold requests filter table	Circulation	XXX50/tab	
tab37_campus_preferred	Preferred supplier list for hold requests	Circulation	XXX50/tab	
tab38	Photocopy request configuration	Circulation	XXX50/tab	
tab39	Hold request's daemon configuration	Circulation	XXX50/tab	
tab40.<lng>	Collection codes and names	General	XXX50/tab	
tab41	Photocopy request's daemon configuration	Circulation	XXX50/tab	
tab42	Automatic update of the processing status field in the item record.	GUI	XXX50/tab	
tab43	Advanced booking of items	Circulation	XXX50/tab	
tab44	Definition of how long requested items will be kept on the hold shelf	Circulation	XXX50/tab	
tab45.<lng>	Order transaction types for order log	Acquisitions	XXX50/tab	
tab46.<lng>	ILL request log transaction types	ILL	XXX50/tab	
tab47.<lng>	ILL supplier material type and	ILL	XXX50/tab	

Table name	Description	Function	Location[1]	Changed or New
	copyright agreement			
tab48.<lng>	General Invoice payment defaults	Acquisitions	XXX50/tab	
tab100	Switch settings for different aspects of the system	System	tab	Numerous new flags. Check Release Notes for more detail.
tag_text.dat	Pre-defined text options for sub-fields	Cataloging	pc_tab/catalog	
tagonnew.dat	Default fields for a new record	Cataloging	pc_tab/catalog	
unicode_to_filing_01	Unicode character conversion equivalencies for sorting	General	alephe/unicode	
unicode_to_word_gen	List of Unicode character conversion equivalencies, to be used when creating records in the WORDS file	General	alephe/unicode	
union_global_param	Union catalog de-duplication parameters	Cataloging	alephe/tab	
union_preferred	Weighting table for determining which of two matching records is the preferred record	Cataloging	XXX01/tab	
user_function.<lng>	User authorization definitions and codes	Security	alephe/tab	
verde_variables	Values for connecting Verde via external services	Acquisitions/Serials	XXX50/tab	
www_f_func	Functional codes linked to HTML action commands	OPAC	alephe/tab	
www_f_heading	Messages to the patron in the Web OPAC	OPAC	aleph/error_<lng>	
www_f_sort_heading.<lng>	Sort types for display in the Web OPAC	OPAC	XXX01/tab XXX10/tab	
www_f_tab_short_999	Custom brief display formats for Web OPAC	OPAC	XXX01/tab XXX10/tab	
www_r_heading	Messages to the patron in the Course Reading Module	OPAC	aleph/error_<lng>	
www_server.conf	Defaults for the web server	Server	alephe	setenv ill_borrower_status setenv www_dn_view_display
www_tab_self_check	ip-based sub-library	Circulation	alephe/tab	New

Table name	Description	Function	Location[1]	Changed or New
	relationships for Web self check functionality			
www_tab_short.<lng>	Brief display of records in Web OPAC	OPAC	tab	
www_x_func	X Server function definitions	OPAC	alephe/tab	
Z39_gate.conf	Definition for Z39 gate	Z39.50	alephe/tab/z39_gate	
z39_gate_<library>.conf	Definition of external Z39.50 Databases	Z39.50	alephe/tab/z39_gate	
z39_gate_error_list	List of errors which might be returned by our Z39.50 gate	Z39.50	alephe/tab/z39_gate	
z39_server.conf	Profile of ALEPH Z39.50 server	Z39.50	alephe/tab/z39_server	
z39_server_<library>.conf	Translation of ALEPH codes to Z39.50 codes	Z39.50	alephe/tab/z39_server	
z39_server_elements	Defines fields and sub-fields for each base and element set name	Z39.50	alephe/tab/z39_server	
z39_server_update_errors	Mapping of Aleph check_doc errors to Z39.50 update errors	Z39.50	alephe/tab/z39_server	
z39_target_error_list	List of errors which might be returned by a Z39.50 target	Z39.50	alephe/tab/z39_gate	

---

[1] XXX01 refers to a BIB type of library

XXX50 refers to an ADM type of library

XXX60 refers to a HOL type of library

XXX10 refers to an AUT type of library

XXX20 refers to an ILL type of library

XXX30 refers to a Course Reading type of library

USR00 refers to a User (Patron) type of library

No reference to a specific library type, indicates that the related table can be defined (found) in more than one type of library
