Table of Contents

1	ALEPHADM CLIENT (ALEPHADM.INI).....	4
1.1	ALEPHADM.INI Settings.....	4
2	TABLE_KEY	5
3	TAB_ALEPHADM.LNG	5
4	COLUMN HEADINGS (PC_TAB_COL.LNG)	6

1 ALEPHADM Client (ALEPHADM.INI)

The alephadm.ini file defines settings for the ALEPHADM client. This chapter presents and explains the following sections of the Alephadm.ini file.

1.1 ALEPHADM.INI Settings

[HelpWnd]
[ShowDifferences]
[TableMarkedLines]
[TablesNavigator]
[Tables]

Explanations of other setting definitions, relating to more than one module, can be found in the *.ini Files chapter of the General module of the ALEPH User Guide.

[HelpWnd]

[HelpWnd]
FontSize=14

This option determines the size of the font in the F1 Help window. The allowed range is 6-24. If the value is not within this range, the font size will default to 14.

[ShowDifferences]

[ShowDifferences]

ChangedLines="Changed Lines"
DeletedLines="Deleted Lines"
InsertedLines="Inserted Lines"

FgColorChangedLines=255,000,000
FgColorDeletedLines=000,000,255
FgColorInsertedLines=000,128,000
FgColorIdenticalLines=000,000,000

BkColorIdentical=255,255,255
BkColorDif=192,192,192

ChangedLines="Changed Lines"

The text between the quotation marks will appear at the bottom of the Show Differences window to refer to changed lines.

DeletedLines="Deleted Lines"

The text between the quotation marks will appear at the bottom of the Show Differences window to refer to deleted lines.

InsertedLines="Inserted Lines"

The text between the quotation marks will appear at the bottom of the Show Differences window to refer to inserted lines.

FgColorChangedLines=255,000,000

Sets the color for the changed lines that are displayed in the Show Differences window and for the text defined in ChangedLines.

`FgColorDeletedLines=000,000,255`

Sets the color for the deleted lines that are displayed in the Show Differences window and for the text defined in `DeletedLines`.

`FgColorInsertedLines=000,128,000`

Sets the color for the inserted lines that are displayed in the Show Differences window and for the text defined in `InsertedLines`.

`FgColorIdenticalLines=000,000,000`

Sets the color for identical lines that are displayed in the Show Differences window.

`BkColorIdentical=255,255,255`

Sets the background color for identical lines that are displayed in the Show Differences window.

`BkColorDif=192,192,192`

Sets the background color for changed, deleted and inserted lines that are displayed in the Show Differences window.

[TableMarkedLines]

`[TableMarkedLines]`

`FgColor=000,128,000`

`BkColor=255,255,128`

`FgColor=000,128,000`

Sets the color for marked lines that are displayed in the Tables Editing window.

`BkColor=255,255,128`

Sets the background color for marked lines that are displayed in the Tables Editing window.

[TablesNavigator]

`[TablesNavigator]`

`WarningTimeOut=1`

`WarningTimeOut=1`

Sets how many minutes before the end of the allowed editing time the green light should turn yellow in editing mode in the Tables Editing window.

2 TABLE_KEY

The `TABLE_KEY` line defines the columns which make up the "key" of a line in the table. The `TABLE_KEY` is used by the ALEPHADM client for display in FORM mode. List the columns that make up the key, separated by commas, no spaces.

For example, `tab16 TABLE_KEY 1,2,3,4`

3 tab_alephadm.lng

For files to appear in the ALEPHADM Navigator, they have to be listed in the `tab_alephadm.lng` table. This table is located in `xxxnn/tab/tab_alephadm.lng`.

For every library, there is a separate table. The table has a language suffix and is therefore language-sensitive.

```
! COL 1. 20; TEXT; ;
!      Directory;
!      Directory;
! COL 2. 30; TEXT; ;
!      Filename;
!      Filename;
! COL 3. 1; ALPHA {Y,N}; ;
!      Language extension;
!      Language extension:
!      (Y/N);
! COL 4. 1; ALPHA; ;
!      Alpha;
!      Alpha;
! COL 5. 50; TEXT; ;
!      Description;
!      Description;
```

Key to Table:

- Column 1: Denotes the directory under which the table files are stored.
- Column 2: Denotes the filename of the table files. This will be displayed in the ALEPHADM Navigator.
- Column 3: This is a flag that describes whether or not the table in the line has a language extension.
- Column 4: The standard value is "L". However, for CJK languages set to "C".
- Column 5: Contains a short description of the function of the table in the system. This description is displayed in the ALEPHADM Navigator.

The following setup is displayed in the Navigator as shown below:

```
!      1          2          3 4          5
!!!! ... !!!!!-!!!! ... !!!!!-!-!-!!!! ... !!!!!!!!
tab          tab14          N L Item Reshelving Time
tab          tab15          Y L Item Statuses
```

(The table length has been shortened for display in the ALEPH User Guide.)

File Name	Description
tab14	Item Reshelving Time
tab15.eng	Item Statuses

4 Column Headings (pc_tab_col.lng)

Column headings for tables of information in the GUI ALEPHADM module are built in. You can change the width of a column from the GUI by dragging the column

border with the mouse pointer. The server file `pc_tab_col.lng` has no influence on the column headings of the ALEPHADM module.
