

Voyager[®] ILL 5.5 Release Notes

For Voyager Releases Voyager[®] with Unicode™ and Voyager[®] 5.0

New Features in the ILL Module, Version 5.5

Voyager ILL 5.5 contains the following updates, new features, and enhancements.

- Compatible with the new Docline 2.7 release. This ILL Module release is required in order to use Docline 2.7.
- Fixed problem in the Kinetica processing which allowed the patron ID to be forwarded to the 2nd, 3rd, and so on, Lenders.
- The Borrowing and Lending OCLC & ISO Review screens were improved to speed up loading.

Voyager ILL 5.4.1 contains the following updates, new features, and enhancements.

- Fixed problems with desired Electronic Delivery encoding within an ILL Request; this is transparent to the user but caused a problem with Kinetica.
- Fixed problem regarding the Copyright Status report. In rare circumstances this problem caused incomplete results to be reported.
- Fixed problem which prevented communication between ILL and Voyager.

Voyager ILL 5.3/5.4 contains the following updates, new features, and enhancements.

- To reduce manual entry in ILLRequest, added ability to decode Publication Year for Docline requests and to store it in the PubYear field.
- For OCLC requests in ILLRequest, added ability to select a “blank” copyright compliance code in addition to CCG and CCL.
- Compliant with .NET Framework 2.0. Must be installed prior to installing the ILL module.

Voyager ILL 5.2 contains the following updates, new features, and enhancements.

- Added Item Type (or Material Type) to info sent to Kinetica.
- Added new OCLC API to improve handling of error codes returned from OCLC interface.

Voyager ILL 5.1 contains the following updates, new features, and enhancements.

- Added A4 paper size option. In ILLManagement > Admin Menu and in ILLRequest > Options menu. The selection must be made on each workstation.
- Changed the logic on Borrowing and Lending Update screens to use existing Branch ID in record, if present, otherwise use default.
- Eliminated obsolete fields from Data Directory menu, renamed to Relink DB and moved to Admin menu.
- Removed location of Patron Dept and Status from Patron Pref screen and renamed menu to Patron Matching.
- Added new Docline reject code, LIC (license restriction).
- Changed Max Cost default email field names in ILLRequest.
- For Docline
 - Added phrase EFTS Member to Billing Notes on Pick Slip if borrower is an EFTS member.
 - Print borrowing library email on pick slip.
 - Added contents of Docline Library Groups field to Affiliation field on Pick Slip.
 - Added phrase LoansomeDoc to Source field on Pick Slip.
 - Removed Compact and Repair menu item from Admin menu. Due to a change in Access this no longer works if database is open.
 - Always append Ariel address to Fax field on Pick Slip.
