

Z410 – ILL BORROWING - PATRON REQUEST

The Z410 is an ILL library (XXX40) Oracle table that contains administrative information about interlibrary loan (ILL) borrowing requests submitted by a patron or by a staff user on behalf of a patron. A borrowing request is also known as an outgoing request.

The ILL Borrowing-Request to Supplier (Z411) has a direct link to Z410.

It is not necessarily expected that a library will convert ILL requests when installing the ALEPH system. In some cases the library might inform patrons that there is a system switch-over and that outstanding requests are not retained and must be re-entered after the switchover.

In the following table, (X) denotes an alphanumeric field and (9) denotes a numeric field. All alphanumeric fields are left-aligned with trailing spaces; all numeric fields are right-aligned with leading zeroes. Decimal positions are indicated by the symbol V. The total number of decimal digits is designated by the number of nines following the V.
