

### Alma Uptime Report - AP01 Instance (APAC) - Q2 2015

Alma Uptime Quarterly Reports are published each quarter to provide a comprehensive view of our uptime performance as measured over the last three (3) months and over the last twelve (12) months. The report measures our performance as defined in the Alma Service Level Agreement.

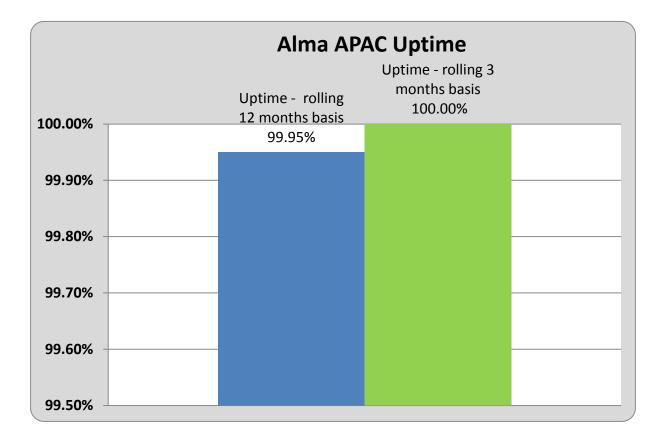

This document details the uptime report for the Alma AP01 instance in APAC. The instance your organization uses can be identified by the Alma URL (AP01 instance is ap01.alma.exlibris.com).

The Alma uptime measured on a rolling 12 month basis (July 2014 – June 2015) is 99.95%.

### The Alma uptime measured on a rolling 3 month basis (April 2015 – June 2015) is 100%

Please note our System Uptime Status page, which allows our customers to view the current status of their instance/environment at any time, using the following link: <u>http://status.exlibrisgroup.com</u>

# How is Alma Uptime Calculated?

The uptime calculation is based on the following calculation (as defined in the Alma Service Level Agreement):

"**Uptime**" means the total period in minutes during which the Service is available for access and use during this period.

"Uptime Percentage" means Uptime expressed as a percentage, calculated in accordance with the following formula:

## Uptime Percentage = X /(Y–Z) × 100

Wher	e:	
Х	=	Uptime
Y	=	Last 12 months period
Z	=	The duration (in minutes) of any SLA Exclusions* during
		these 12 months

\*SLA exclusions are defined in the contract SLA (e.g. Scheduled maintenance, etc.)
