

## **Alma Uptime Report - NA02 Instance (North America) – Q3 2014**

Alma Uptime Quarterly Reports are published each quarter to provide a comprehensive view of our uptime performance during last 12 months. The report measures our performance as defined in the Alma Service Level Agreement.

This document details the uptime report for the Alma NA02 instance in North America. As the NA02 instance has been live since July 2014, calculations for this report were made for the period of the last 3 months, i.e. July 2014 – September 2014.

The instance your organization uses can be identified by the Alma URL (NA02 instance is [na02.alma.exlibris.com](http://na02.alma.exlibris.com)).

**The Alma uptime for the period of this report (July 2014 – September 2014) is 100%.**

Please note our System Uptime Status page, which allows our customers to view the current status of their instance/environment at any time, using the following link: <http://status.exlibrisgroup.com>

### **Availability – July 2014-September 2014:**

## How is Alma Uptime Calculated?

The uptime calculation is based on the following calculation (as defined in the Alma Service Level Agreement):

"**Uptime**" means the total period in minutes during which the Service is available for access and use during this period.

"**Uptime Percentage**" means Uptime expressed as a percentage, calculated in accordance with the following formula:

$$\text{Uptime Percentage} = X / (Y - Z) \times 100$$

Where:

X = Uptime

Y = Relevant period

Z = The duration (in minutes) of any SLA Exclusions\* during the relevant period

\*SLA exclusions are defined in the contract SLA (e.g. Scheduled maintenance, etc.)

### Further Information
