The following packages are released:

sfx-kbsw-update-20150200.run

sfx-kbdb-update-20150200.run

For directions on applying the revision, refer to the **SFX KB Update** section of the *SFX General User's Guide*.

Changed KB Software

| Type Of Change | Component | Description | Solution | File List |
|----------------|---------------|--|---|--|
| Correction | Source parser | encoding/decoding in CAPTURE_CITATION::CAPTURE_CITATION | The Pmid source parser has been updated to solve an encoding problem when handling values containing diacritics. | lib/Parsers/SourceParser/OpenURL_0_1/pmid.pm |
| Correction | Suorce parser | encoding/decoding in CAPTURE_CITATION::CAPTURE_CITATION | The Pmid source parser has been updated to solve an encoding problem when handling values containing diacritics. | lib/Parsers/SourceParser/OpenURL_1_0/pmid.pm |
| Correction | TargetParser | Add a new CAPITA::prism target parser to support a new version of a Prism catalog. | The CAPITA::prismtarget parser has been updated to provide optimal searching results when using various search criteria. | lib/Parsers/TargetParser/CAPITA/prism.pm |
| Correction | TargetParser | Update the OVID::Journals target parser to enable DOI based article links in very special cases. | The OVID::Journals target parser has been modified to support DOI based article level links in cases with multiple citations in a specific issue that have the same start page. This fix should solve the linking situation where a regular metadata based link defaults to the full text of the first record retrieved with no indication that more records have been pulled up. | lib/Parsers/TargetParser/OVID/Journals.pm |

New Targets and Target Services

| Target Name | Description | Target Service | Linking Level | For More Information |
