

SFX Product Update

Christine Stohn, Ex Libris

Agenda

- **Highlights from the past 12 months**
- **September release**
- **Coming next**

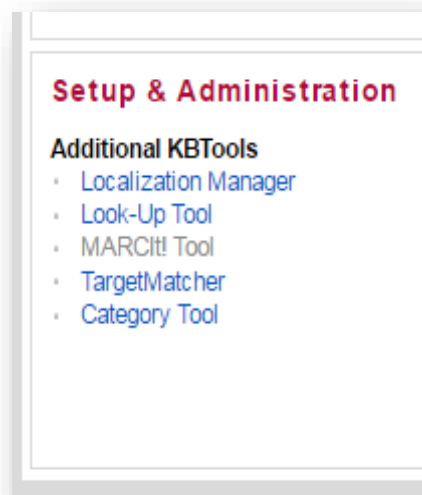

Resource management - KBManager

- Ability to add author information to e-books records in global KB
- Warning when deactivating final active portfolio in target
- Add ISBN 13 to KBManager object display
- Added flag for new targets in SFXAdmin

	#	Target	Threshold
	1	 BLOOMSBURY_COLLECTIONS (15/86)	NEW
	2	 MEDICAL_ONLINE_EBOOKS_LIBRARY (1/2)	NEW
	3	 OXFORD_UNIVERSITY_PRESS (1/33)	NEW
	4	 TAEBDC_EBOOKS (70/106)	NEW

Resource management - KBTools

- Added option to export Internal note information
- Ability to configure fields for inclusion in SFX exports
- Include options to load imprint (place, publisher, year) when adding local objects (Books)
- Enhanced the Elsevier Autoloader (and dataloader) reports show if an item was added or updated
- New Localization manager to report and remove localizations in batches

Highlights from the past 12 months

User Interface - Multi-object menu:

- Added option to only show activated objects (with separate template)
- Moved configuration to the Backoffice

The screenshot displays the ExLibris SFX user interface. The top navigation bar includes links for Home, KBManager, Configuration, Menu Configuration, A-Z eJournal List, eBook Search, and Translation & Display. The main content area is titled 'Multi-object menu Configuration' and contains a 'Menu Design' tab with sub-tabs for Display Logic, Proxy / CrossRef, DirectLink, Related Objects, and SFX API. The 'Configuration for Multi-object menu' section includes options for General Configuration, Simplified Template and Mobile Configuration, and Multi-object menu Configuration. The 'Multi-object menu Configuration' section is active, showing settings for the 'Active version' (Multi-object menu V.1 and V.2), 'Select Multi-object header image', 'Select mobile Multi-object header image', 'Select type of objects displayed in the multi-object window', 'Display objects with active full text services at the top of the list', 'Records Per Page List', 'Default number of records per page', and 'Maximum number of navigation links per page'. A search results overlay is visible on the right, showing 'Found 9 records.' and a list of records with details such as Title, ISSN, eISSN, CODEN, LCCN, and Imprint.

Highlights from the past 12 months

Linking

- Support for OpenAthens Proxy
- Support for HTTPS protocol for OpenAthens and WAM proxies
- Broken link report: option to provide feedback to client
- EBSCO Linking enhancements via the EBSCO API

System maintenance

- New task manager: View the status of jobs, e.g. revision update, schedule and manage jobs
- Move from MySQL to MariaDB
 - Better performance, better security
 - All cloud installations are upgraded
 - Upgrade kit for local installations released 2016
 - End of support for Linux with MySQL June 2016

Coming next week: September release

September Release

- ***Ovid AutoUpdate*** - automatic download and update of institutional entitlements
- ***New filters on KBManager*** by proxied, free, local targets

The screenshot displays the ExLibris SFX KBManager interface. The main window shows a 'List of Targets' with a table of 15 targets. A modal dialog box titled 'Filter Target List by:' is open, allowing users to filter targets by Name, FullText, Local, and New Targets Using Proxy. The dialog also includes buttons for 'Add Condition' and 'Go'.

 - Dataloader (TXT and KBART file loads)
- ***And more incl.***
 - New 'IP exclude' functionality to the EZPROXY proxy module
 - New condition to not use the EBSCO API for certain titles

Coming soon: A new DirectLink sidebar

Planned for December: *New DirectLink sidebar*

- To be used instead of the DirectLink banner
- Minimizes automatically (after a few seconds) or manually
- Behaviour for platforms that do not support frames is configurable

The screenshot shows a sidebar interface for ExLibris. At the top, there is a 'Help' link with a magnifying glass icon and a language dropdown set to 'English'. The main title is 'Isolated sternal fracture: an audit of 10 years' experience' by Peek, G J, from Injury [0020-1383] yr:1995 vol:26 iss:6 pg:385, with a DOI of 10.1016/0020-1383(95)00051-A. Below this, there is a 'Full Text' section with a link to 'BIBSYS LM Information De...' and a 'Report broken link' option. A 'More' button is present. The 'ILL' section shows 'CCC Get It Now Elsevier'. The 'Web Service' section has a 'Feedback Form' link. The 'Related reading' section, marked with a 'bx' icon, lists three articles: Heyes, F L. 'Sternal fracture: what investigations are indicated?' Injury 24.2 (1993): 113-115; Budd, J S S. 'Isolated sternal fracture: a benign injury?' Injury 24.7 (1993): 501-536; and Johnson, I. 'Sternal fracture—a modern review.' Archives of emergency medicine 10.1 (1993): 24-28. At the bottom, there are links for 'Select All', 'Clear All', 'Save Citations', and a 'Select Format' dropdown. A 'More' button is at the very bottom, followed by copyright information: '© 2016 SFX by Ex Libris Inc. | Cookie Policy | CrossRef Enabled'.

Isolated sternal fracture: an audit of 10 years' experience

[G.J. Peek](#) , [R.K. Firmin](#)
Department of Cardiothoracic Surgery, Glenfield Hospital, Leicester, UK

DOI: [http://dx.doi.org/10.1016/0020-1383\(95\)00051-A](http://dx.doi.org/10.1016/0020-1383(95)00051-A)

Abstract References

Abstract

We have reviewed 162 consecutive cases of sternal fracture admitted to the Leicester Royal Infirmary over a 10 year period. There were no incidences of cardiogenic shock or arrhythmia developing in patients who had sustained an isolated sternal fracture, irrespective of the aetiology. There were three deaths, three ITU admissions and one arrhythmia, all occurring in patients with severe thoracic injuries, or other associated injury. Our series confirms the observations of other authors, that patients with isolated sternal fractures, especially those sustained by car occupants wearing seatbelts, do not develop myocardial pump failure or arrhythmias as a late or occult phenomenon and can often be discharged home if there is no clinical evidence of cardiac failure and a 12-lead ECG is normal.

Multi-object menu
Configuration
**DirectLink banner
configuration**

DirectLink banner/sidebar is an abbreviated SFX menu format to allow display of the SFX menu as a banner on top of, or a sidebar beside the publisher website. The DirectLink banner/sidebar will display in case DirectLink has been activated in the [Menu configuration > DirectLink](#) configuration section.

Active direct link banner:

DirectLink Banner V1 - Top Banner ▲
DirectLink Banner V2 - Sidebar ▼

Also coming ...

December and March releases

- ***New DirectLink Sidebar***
- ***Statistics (q. 16):*** Add active targets to unused journals report
- ***Data loader enhancements*** to
 - update "internal description" field
 - update OPs where more than one OP exists for same TS and same object
- ***New resource types*** - video, audio and score
- ***Increase embargo/moving wall period*** for multiple years
- ***New internal notes flag*** in KBManager title lists

Further plans

- ***Linking:***

- Make use of Primo API to fetch directlinks for specific data sources

- ***New user interfaces:***

- New AZ List
- New SFX Menu

- ***Resource management:***

- Add more vendors for AutoUpdates
- SFXAdmin and KBManager improvements, more shortcuts, more intuitive search functions

THANK YOU

Christine.Stohn@exlibrisgroup.com
