

Objectives

By the end of this session you will understand:

- The main aspects of Alma-Primo interoperability within the context of an Alma/Primo consortium
 - Publishing
 - Delivery
 - · Alma as Link Resolver/ERM
- How to setup Alma for Primo / Primo for Alma

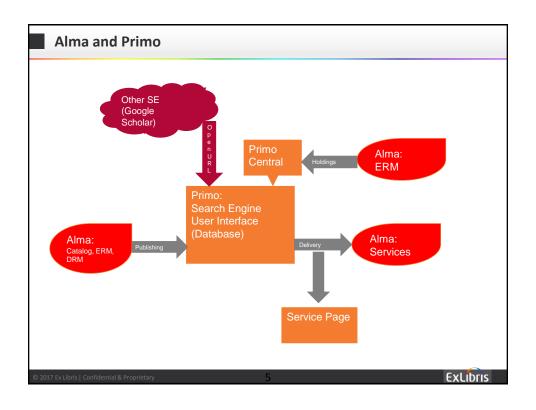

2 2017 Ex Libris | Confidential & Proprietary

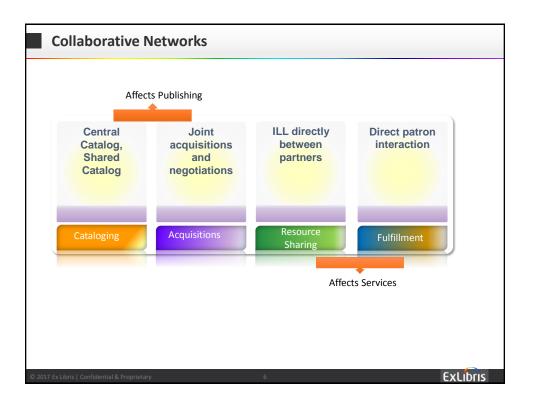

Alma and Primo – the big picture

- Overall view
- Alma consoritial topologies
- Basics : setting up the Primo view

Alma/Primo Topology - Collaborative Networks				
Alma	Primo			
 Multiple Alma institutions – no Network Zone 	 Primo institution per Alma institution. Each institution will manage their own data. 			
 Have a Fulfilment Network and/or want a Union Catalog and/or 'search other institution' 	 Every institution will have its own view / a central view is also possible. May dedup across-institutions Will likely have shared scopes 			
Multiple Alma institutions with Network Zone	 Primo institution per Alma institution Shared management of data – single feed from Alma Every institution will have its own view / a central view is also possible. Will likely have shared scopes 			
© 2017 Ex Libris Confidential & Proprietary	ExLibris			

Alma-Primo Basics

- Configuring the Primo Institution documentation
- Configuring the Primo institution example

© 2017 Ex Libris | Confidential & Proprieta

Alma-Primo: Publishing

 Alma record structure → Primo /with & without NZ

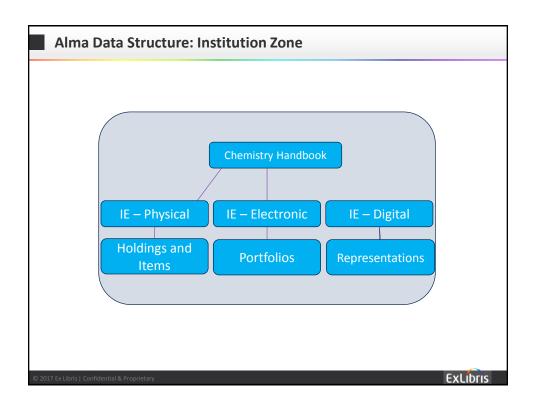

ExLibris

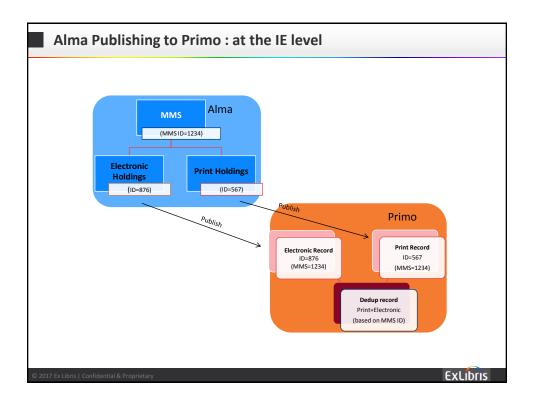

- The publishing process / with & without NZ
- Suppressing records
- Key fields in published Alma record
- Key fields in normalizing to the PNX
- Deduping Alma records in Primo

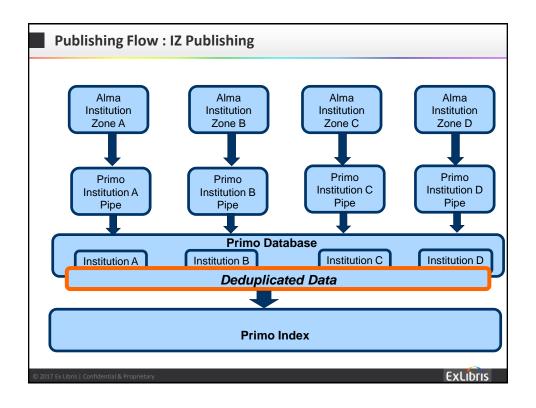

Alma Data Structure: Institution Zone

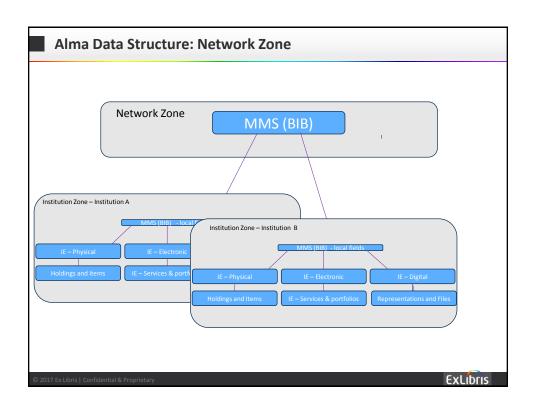

MMS (BIB)

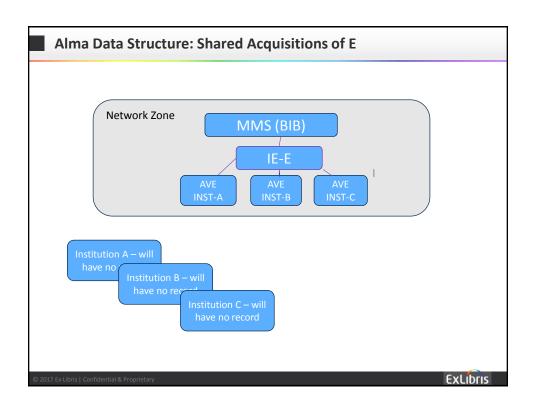

IE – Physical IE – Electronic IE – Digital Holdings and Items Portfolios Representations

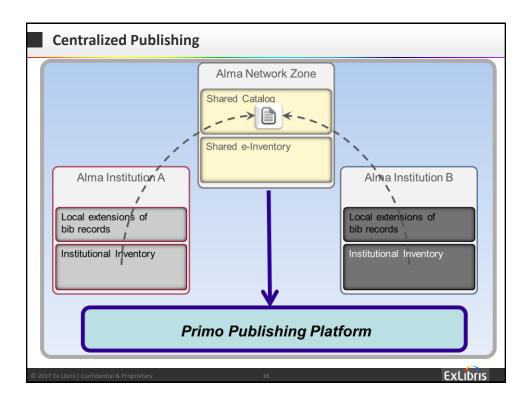

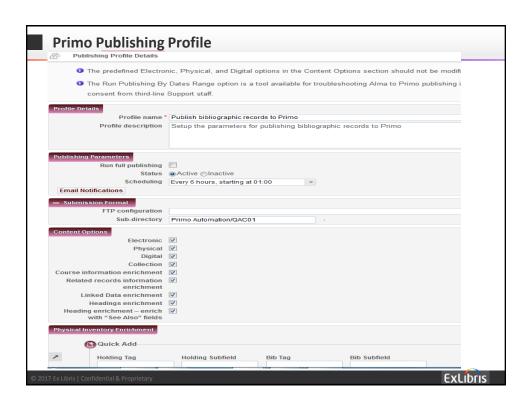

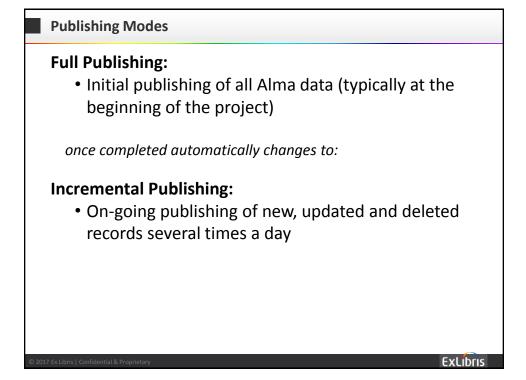

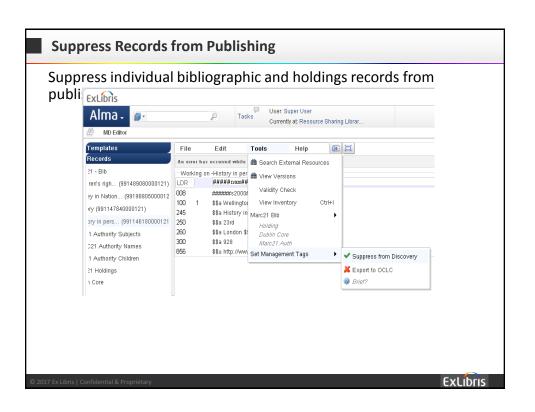

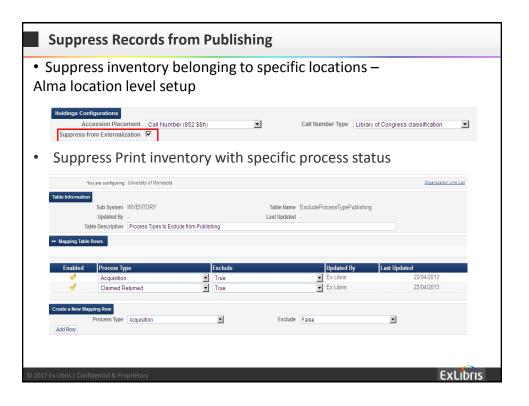

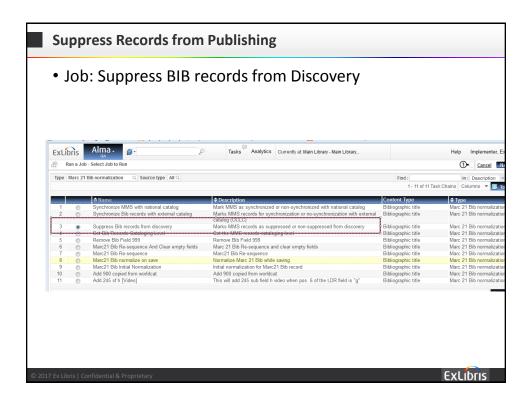

ExLibris

Publishing sets of record ad hoc In principle any change that affects the content of the published record should trigger standard re-publishing This job can be useful if you want to change the content of published records. For example - add Course Reserve information to Primo In Publishing Profile → check "Course Information" Create set of records linked to a course Run job Publishing Start | Titles | Publishing | Profile | Publishing |

Publishing in Primo

- Data source
 - IZ publishing one per Alma institution
 - Centralized publishing single data source
- Normalization rules → PNX
 - Use the Alma MARC/DC Template as basis for creating your own rules
- Pipe
 - Regular
 - · "Update pipe"
- Dedup important to dedup based on MMS

© 2017 Ex Libris | Confidential & Proprietary

23

ExLibris

Deduping Alma Records

- Dedup based on MMS to merge E/P/D linked to same MMS
- MMS added to C5.
- Match on C5 is first step in dedup process
- If you want to disable dedup keep match on C5 and disable creation of other keys

© 2017 Ex Libris | Confidential & Proprietary

Key Fields: IZ vs Centralized Publishing

Field	IZ publishing	Centralized publishing
Record ID (in header) This becomes the basis for the PNX record ID	IE of inventory	IE of NZ
MMS	Included in 001	Added to MMS field Per institution
Institution	INST	INST \$\$a
Inventory type	INT	INST \$\$b (INST \$\$c= IE of institution)
Local field		Institution added to \$\$A

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Key Fields

- AVA physical inventory per location
 - \$\$a Institution code
 - \$\$b Library code
 - \$\$c Location display name
 - \$\$d Call number
 - \$\$e Availability available, unavailable, or check_holdings).
 - \$\$j Location code
 - \$\$k Call number type
 - \$\$p priority

© 2017 Ex Libris | Confidential & Proprietan

Key Fields

- CNO course information
- ECT indicates if the record is a database
- PLK links between records
- Cross-references can be included in Author and Subject fields
- AVD for D inventory. Not used OTB
 - \$\$a Institution code
 - \$\$b Representation PID
 - \$\$c Representation type: REPRESENTATION or REMOTE_REPRESENTATION
 - \$\$d Remote repository name (if this is a remote representation)
 - \$\$e Representation's label
 - \$\$f Public note
- AVE for E-inventory acquired centrally
 - \$\$i contains a single e-resource's Available for institution code
 - \$\$c contains a single e-resource's Available for campus code
 - \$\$I contains a single e-resource's Available for library code

Delivery in Consortia – Points to consider

- Cross-institution dedup can result in records with mixed institution inventory.
 - Do we take this inventory into account?
- Institutions can search each other's records.
 - What kind of delivery can be offered if the institution itself has no inventory at all?
- What is the "active" institution?
 - For P (Get It) → directed to the owner of the inventory. Initial request always to institution of the view
 - For E (View It) → directed to the institution of the user
 - For D (View It) → directed to the owner of the inventory.
 - May change with the new "Shared-D" option

© 2017 Ex Libris | Confidential & Proprietary

Flag	Configured in	Description	Note
Always Prefer Online Resources in Multi- Institution Records	General Configuration	If institution has P inventory – take electronic inventory of other institutions in account?	If set to "Y" you probably also need to set up restricted delivery scopes
Shared User Database & Resource sharing	General Configuration	This means that users can place requests in other institutions It also means that if the institution only has electronic inventory, the P inventory of other institutions will be taken into account	
Sort by locations by user institution / Include only locations of the view	View Wizard	Display/do not display locations from other institutions	

Alma Collaborative Networks: Resource Sharing

- Description: Users always request from their home libraries
- Setup in Primo:
 - · Shared scopes
 - Inventory from other institutions is suppressed
- Flags:
 - Always Prefer Online Resources in Multi-Institution Records → N
 - Shared User Database & Resource sharing → N
 - Locations → Include only locations of the view

© 2017 Ex Libris | Confidential & Proprietary

41

ExLibris

Alma Collaborative Networks : Fulfilment Network

- Description: Users request from owning institution directly
- Setup in Primo:
 - · Shared scopes
 - · Inventory from other institutions is not suppressed
- Flags:
 - Always Prefer Online Resources in Multi-Institution Records → Y
 - Shared User Database & Resource sharing → Y
 - Locations → Sort by user institution

ExLibris

Identifying Patrons

- Users sign-in to Primo (PDS or Primo Authentication Manager)
- Users place requests in Alma how does Alma identify the user?

 PDS/Primo Authentication URL should be added to: Administration > General Configuration > Configuration Menu > General Configuration > Other Settings > primo_pds_url

2017 Ex Libris | Confidential & Proprietary

Key Concepts in Primo Delivery

- Availability
 - P based on circulation status
 - E restricted / not restricted → based on restricted delivery scopes
 - D restricted / not restricted → based on restricted delivery scopes
 - Primo Central based on full-text availability
- Delivery:
 - GetIt 1 main delivery option
 - GetIt 2 secondary delivery option
 - Delivery is defined per "Delivery Category" and "Availability status"

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Delivery Categories

- Local Data ingested from Alma:
 - P inventory → Alma-P
 - E inventory → Alma-E
 - D inventory → Alma-D
- A record will be assigned up to two delivery categories so that both electronic and physical are represented.
 - · Every delivery category will be represented in availability status
 - · Every delivery category will be assigned a Get It 1
 - · In consortium member inventory is taken into account
- Primo Central records: Remote Search Resource

2017 Ex Libris | Confidential & Proprietary

Physical Availability and RTA

- Based on status in AVA (\$\$e): available, check_holdings, unavailable
- · Retrieved in real time using "RTA" in same format as published record
 - > Alma normalization rules set must be defined in "Real-Time Availability (using normalization rules)"
- · Calculated availability status relative to institution of the view
 - If at least one AVA = "available" → available_in_maininstitution
 - If at least one AVA = check holdings" → check holdings in maininstitution
 - · If unavailable
 - "unavailable in maininstitution more" → member institutions have holdings
 - "unavailable_in_maininstitution_nomore" → members do not have holdings
 - If does not exist → does_not_exist_in_maininstitution
- Labels are defined in "Calculated Availability Status"
- · Display of "Best Location"
 - Determined based on location that matches status and then priority in AVA \$\$p

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Availability for E/D - Restricted Delivery Scopes

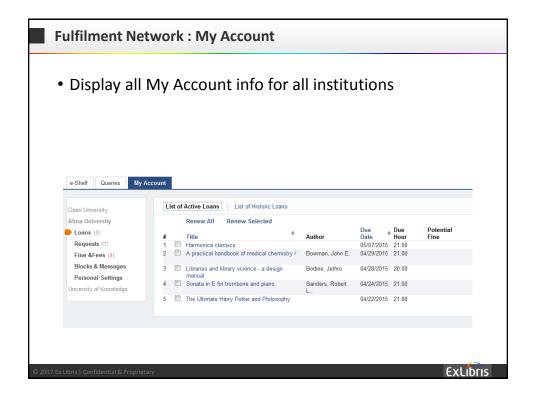

- Tag on PNX to indicate access is restricted if user does not meet conditions the status will be "restricted"
- How to setup?
 - Define as scope of type "Delivery" → Scope Values definition
 - Add to the normalization rules → in Delivery section
 - Defined allowed users → "Restricted Delivery Scopes"
- Can be used in the following scenarios:
 - Shared scopes include "E" inventory from member institutions
 - View It will not offer services except for GES.
 - Based on availability status "Restricted" GetIt1 can be changed to "Get It"
 - Example (BIBSYS)
 - For D inventory with access restrictions. From main institution or member institutions.

© 2017 Ex Libris | Confidential & Proprietary

4

ExLibris

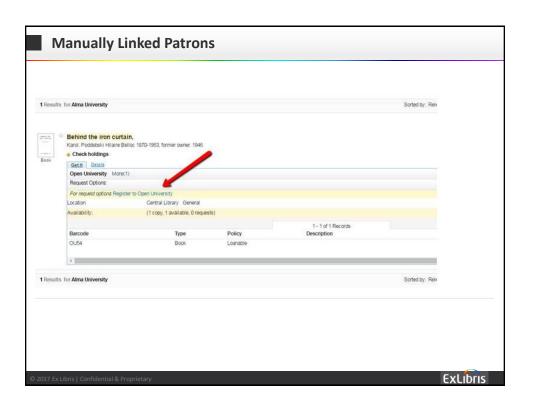

Fulfilment Networks – What is Required? In Alma: Define fulfilment network and policies In Primo: Dedup across institutions Create shared scopes Users can access Get It of member institutions

Fulfilment Network: My Account - Configuration

- By default Alma creates a user in the member institution (i.e. not the user's home institution) when the user accesses Get It for a member institution
- Customer Parameter: uresolver remote register
 - Fulfilment Configuration → General → Other settings. Values:
 - Auto always created. Default
 - · None user not created at all
 - Manual user must indicate he wants to create a user in member institution
 - Must be defined in the member institution not the home institution

© 2017 Ex Libris | Confidential & Proprietary

Delivery Setup in Primo

- Delivery mapping tables
 - MT: GetIt Link 1/2 Configuration
 - MT: Templates
 - CT: Calculated Availability Status

Delivery Setup in Alma

- View it and Get It skins
- Labels
- Display Logic
- General Electronic Services
- Physical inventory
 - Holdings record display
 - · Location priority
 - · Item sort routines

- Electronic inventory
 - · Order of services
 - · Direct Linking
 - Related Services
 - License display
- Digital inventory
 - Max number of representations

2 2017 Ex Libris | Confidential & Proprietar

View it and Get It skins

- · Defines CSS for the View it and Get It
- Administration → General Configuration → User Interface Settings → Delivery System Skins
- Skin ID should = Primo View ID
 - Else the skin ID needs to be added to the Viewit and GetIt delivery templates
 - Classic/New UI flag indicating if skin is for classic or new
 - Can be problematic if same view is used since the templates are shared between classic and new UI
 - · Solution: create separate views.
 - Future: Alma will enable single Skin ID for both classic and new

Course Reserves

- Generally set up as a separate search scope/tab
- Facets per course name, instructor, department
- Search indexes per course name, instructor, department
- Example

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Setting up Course Reserves - Alma

- CR data must be enabled in the Primo Publishing Profile
- · CNO includes:
 - \$\$b Start date
 - \$\$c End date
 - \$\$e Department name
 - \$\$f Department code
 - \$\$g Course instructors
 - \$\$j Course name
 - \$\$k Course code and section
 - \$\$I Academic department
 - \$\$0 Searchable IDs
 - <u>Note</u>: CNO field is published for active courses only. Alma process
 'Activate/Deactivate Courses' must run daily in order to activate and deactivate courses. Should be enabled by the customer.

2017 Ex Libris | Confidential & Proprietary

77

Setting up Course Reserves – Primo

- Alma MARC Template includes rules for adding:
 - Display Course Reserves Info
 - Facets Course ID/Name, instructor, department
 - Search Course ID/Name, instructor, department
 - > Add \$\$I with the institution to prevent cross-institution display
- Add search scope for Course reserves
 - <institution code>_CR added in OTB rules. Needs to be defined as a scope value
- Add search scope and tab with Course facets/indexes to your view

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Course Reserves - "CR_RESTRICTED"

- Records that are cataloged specifically for course reserves can be tagged as being "CR RESTRICTED"
- This tag will be added to the local field defined in Resource Management -> Resource Configuration -> Configuration Menu
 - -> Other Settings

CR_RESTRICTED in Primo

- Used to create a "Restricted Search Scope" and limit discovery to registered users (on campus or signed-in)
 - Define scope as being "Restricted Search"
 - Define scope in Search/Restricted Search Scope
 - Define allowed users in Restricted Search definitions
- Can be used to prevent these records from being discovered in main institution scope
 - Add a condition to main institution scope (or create a new one)
 - · False / CNO exists
 - AND
 - False / <local field>="CR_RESTRICTED"

© 2017 Ex Libris | Confidential & Proprietar

ExLibris

Linked Records

- Typical examples from traditional library resources:
 - Earlier/later title for journals (tags 780/785)
 - Analytics parts of a whole (tags 773/774)
- Example (Manchester)

© 2017 Ex Libris | Confidential & Proprietary

Linking Data in Records Harvested from Alma

- Links in Alma are created based on MARC data
- A daily job creates a table of relationships from the data – using the MSS ID as link
 - For example
 - 773 / 774 PART_OF / CONTAINS

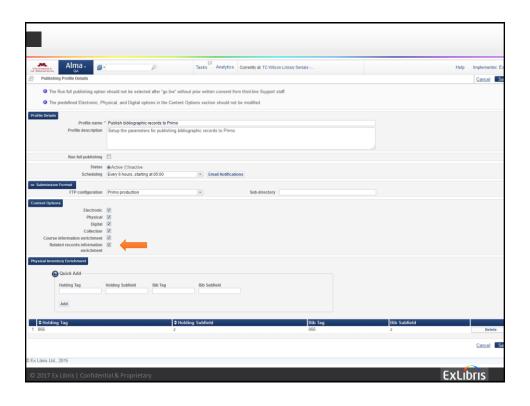

© 2017 Ex Libris | Confidential & Proprietary

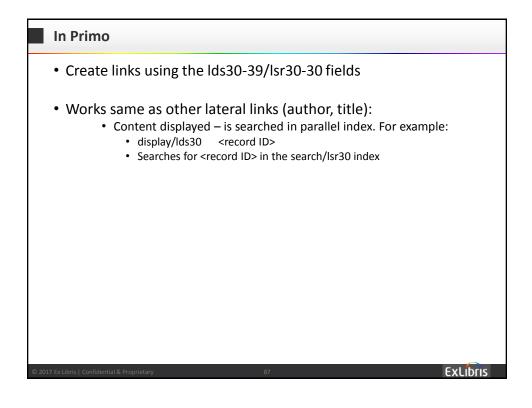

ExLibris

Linking Data in Records Harvested from Alma

- PLK created for export to Primo:
 - \$a type
 - \$b MMS
 - To include PLK fields the option "Related Records information" must be checked in the Primo Publishing Profile

© 2017 Ex Libris | Confidential & Proprietary

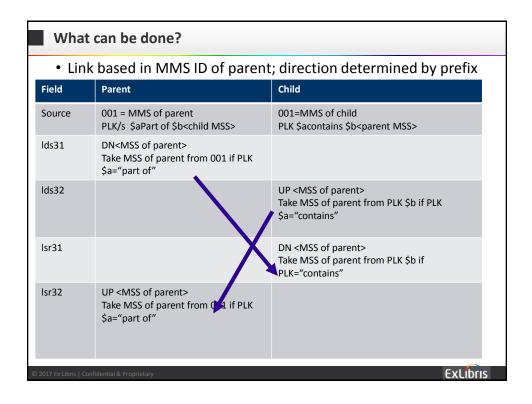

Using lds30-9/lsr30-9: Setup

- Documentation:
 - Technical Guide > Additional Configurations > Creating Lateral Links for Local Fields
- Setup:
 - Search Engine Configuration Results Threshold Number of active local fields in search section
 - Increase and deploy Search Engine Configurartion
