ExLibris

Publishing Overview – PNX

Why do we transform records?

- Start with different data repositories and different formats
- End result – all records in same format
- Allows Primo to search all records at once
- Consistent display
- Scopes, facets, browse

What do records get transformed into?

- Primo Normalized XML (PNX)

Stages of Publishing – Harvest

Library Catalog → Extract → **Harvest** → Normalize Enrich → Persistence → DEDUP FRBR → Index DidUMean Hotswap

Harvest Methods
Copy
FTP/SFTP
OAI

Copy

- Manually place data on Primo server
- ILS transfers extract to Primo

FTP/SFTP

- Primo picks up extract from ILS
- ILS transfers extract to other server where Primo picks it up

OAI PMH

- Repository configured to respond to Primo's request for data

ExLibris

Stages of Publishing – Normalize

Library Catalog | Extract | Harvest | Normalize Enrich | Persistence | DEDUP FRBR | Index DidUMean Hotswap

Dublin Core → PNX

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Stages of Publishing – Enrich

Library Catalog | Extract | Harvest | Normalize Enrich | Persistence | DEDUP FRBR | Index DidUMean Hotswap

Enrichment

- Ability to add data to PNX not from the source record
- Availability Enrichment (used for non-Ex Libris ILS)
- Library of Congress Classification

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Stages of Publishing – Persistence

Library Catalog | Extract | Harvest | Normalize Enrich | **Persistence** | DEDUP FRBR | Index DidUMean Hotswap

Persistence

- PNX record is 'written' to the database
- Retain a copy of the record in its original format

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Stages of Publishing – DEDUP

Library Catalog | Extract | Harvest | Normalize Enrich | Persistence | **DEDUP FRBR** | Index DidUMean Hotswap

DEDUP

- De-duplication process
- Recognizes multiple copies of the same item
- Displays them as one item with multiple copies/locations

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Stages of Publishing – FRBR

Library Catalog → Extract → Harvest → Normalize Enrich → Persistence → DEDUP FRBR → Index DidUMean Hotswap

FRBR

- Functional Requirements for Bibliographic Records
- Different manifestations of a work
- Different editions, book, video, audio book, etc.
- Displayed as one record with multiple versions – opening multiple versions will show each record separately

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Stages of Publishing – Indexing and Hotswapping

Library Catalog → Extract → Harvest → Normalize Enrich → Persistence → DEDUP FRBR → Index DidUMean Hotswap

Indexing and Hotswapping

- Separate from the normalization process
- Creates index files used for searching
- Hotswapping puts sections of index into place for searching (no downtime!)
- Index and Hotswapping runs on a daily basis

Did You Mean

- Usually run once a week

Data Sources Configuration – DEMO

Data Sources Overview

- Starting point for loading data
- Defines data sources and formats for institution
- Will affect how the data is loaded into Primo
- See Primo Back Office Guide for in-depth descriptions of fields

Adding a new data source

Editing a data source

Deleting a data source

- Can only delete a data source if it's not being used

Primo Back Office > Ongoing Configuration > Pipe Configuration > Data Sources Configuration

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Exercise #2a

Create a data source

- Go to Ongoing Configurations > Pipe Configuration Wizard > Data Sources
- Add a new data source
- Define parameters

See handout for step-by-step instructions

ExLibris

Scope Values Configuration – DEMO

Scope Values Overview

- Default institution scope is automatically created when the Institution was created
- Used to define scope values in the Views Wizard
- Necessary for searching
- More information on Scopes in the Refining Search training

Deleting a scope value

- If the default institution scope is deleted, it will need to be redefined to provide location based delivery

Adding / Editing scope values

- Types of scopes (institution, library, collection)

Primo Back Office > Ongoing Configuration > Pipe Configuration > Scope Values Configuration

ExLibris

Pipes Configuration – DEMO

Add a New Pipe

- Under Pipe configuration, don't see the existing pipes (Define pipe)
- Can also add a pipe from the Pipes List

Pipe Types

- Regular (initial load, ongoing updates)
- Delete Data Source (removing data source from Primo)
- No harvesting – update data source (Renormalize data)
- Delete data source and reload (only used if ongoing updates are full data refreshes

NEW PIPES: *Primo Back Office > Ongoing Configuration > Pipe Configuration > Pipes Configuration*
EDIT EXISTING PIPES: *Primo Back Office > Publishing > Pipes List (top navigation)*

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Pipes Configuration – DEMO

Add a New Pipe

- Define pipe name
- Define source
- Define harvest method
- Date – automatically changes to date pipe was last run (may need to adjust if deleting and reloading data)
- Defining normalization and enrichment sets
- Define last processing stage
- DEDUP and FRBR forcing

NEW PIPES: *Primo Back Office > Ongoing Configuration > Pipe Configuration > Pipes Configuration*
EDIT EXISTING PIPES: *Primo Back Office > Publishing > Pipes List (top navigation)*

© 2017 Ex Libris | Confidential & Proprietary

Pipes Configuration – DEMO

Editing a Pipe

- Go to Pipes List (can add one here, too)

Deleting a Pipe

- In Primo Back Office, can only delete pipes that haven't been used

NEW PIPES: *Primo Back Office > Ongoing Configuration > Pipe Configuration > Pipes Configuration*
EDIT EXISTING PIPES: *Primo Back Office > Publishing > Pipes List (top navigation)*

© 2017 Ex Libris | Confidential & Proprietary

ExLibris

Pipes Configuration – DEMO

Running a Pipe

- Executing a pipe
- Terminating a pipe

History

- Status

Logs

- Log, Harvest Log, Dedup/FRBR logs

Errors

- Show why records weren't loaded

NEW PIPES: *Primo Back Office > Ongoing Configuration > Pipe Configuration > Pipes Configuration*
EDIT EXISTING PIPES: *Primo Back Office > Publishing > Pipes List (top navigation)*

Pipes Configuration – DEMO

***NEW PIPES:** Primo Back Office > Ongoing Configuration > Pipe Configuration > Pipes Configuration*
***EDIT EXISTING PIPES:** Primo Back Office > Publishing > Pipes List (top navigation)*

© 2017 Ex Libris | Confidential & Proprietary

Exercise #2b

Create and run a pipe to load data into Primo

- Go to Ongoing Configurations > Pipe Configuration Wizard
- Create a new pipe
- Run pipe

See handout for step-by-step instructions
