Objectives and Target Audience

Brief Session Description:

- A deeper look into Normalization, FRBR, and DeDup. Specific “recipes” will be shown and used to illustrate best practices.

Session Objective(s)

- By the end of this sessions you will know, understand and/or be able to:
 - Know the secrets to Primo happiness
 - Be able to solve several specific real world issues
 - Begin the journey to becoming a Primo expert

Session Target Audience:

- Experienced Customers
- Systems & Technical Staff
- Familiar with the Primo Normalization Rule Editor

Agenda

1

The Secret

2

DeDup & FRBR

3

Recipes

4

Next Steps and Support Resources

5

Reference

The Secret

The secret keys to Primo happiness

Know your data

Know your NR rules

Know how they interact

A Quote

Pointing the way

Data

Always closely examine your data

- Has your cataloging always been consistent?
- If you changed how you catalog, would it display better in Primo?
- What's more important: cataloging perfection or patrons finding resources?

Rules

Never assume

- Examine the rules slowly and carefully
- Designed by programmers, not librarians
- When in doubt, open a case!

Interaction

Where the rubber meets the road

- Use the NR tester
- Test with your actual records
- Setup a micro test environment

Example One – Dates

<controlfield tag="008">750724m19009999gw

MARC 008

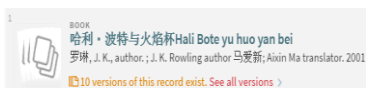

```
<datafield tag="264" ind1="1" ind2="1">
  <subfield code="3">volume 1-8 (A-H) and 9,2 (I)</subfield>
  <subfield code="a">Klagenfurt (Salzburg, Germany)</subfield>
  <subfield code="b">in addition B.G. Teubner,</subfield>
  <subfield code="c">1900-1987.</subfield>
</datafield>
<datafield tag="264" ind1="2" ind2="1">
  <subfield code="3">volume 10 (P: P-Prepress)</subfield>
  <subfield code="a">Leipzig</subfield>
  <subfield code="b">Stuttgart</subfield>
  <subfield code="c">B.G. Teubner,</subfield>
  <subfield code="c">1987-1999.</subfield>
</datafield>
<datafield tag="264" ind1="2" ind2="1">
  <subfield code="3">volume 10 (P: Prepress-Pubertae)</subfield>
  <subfield code="a">München</subfield>
  <subfield code="b">K.G. Saur,</subfield>
  <subfield code="c">2000-2006.</subfield>
</datafield>
<datafield tag="264" ind1="3" ind2="1">
  <subfield code="3">volume 9,1 (I) and 10 (P: Pubertae)</subfield>
  <subfield code="a">Berlin</subfield>
  <subfield code="b">New York</subfield>
  <subfield code="b">De Gruyter,</subfield>
  <subfield code="c">2007-ill,2016gg.</subfield>
</datafield>
```

MARC 264

```
<creationdate>1900</creationdate>
<creationdate>1987</creationdate>
<creationdate>2000</creationdate>
<creationdate>2007</creationdate>
<startdate>19000101</startdate>
<enddate>99991231</enddate>
```

PNX

Example Two – Title

Preferred Record

```
<title>Hali Bote yu huo yan bei</title>
<title>Harry Potter</title>
<title>Harry Potter and the goblet of fire</title>
```

search/title

```
<datafield tag="246" ind1="3" ind2="1">
  <subfield code="a">Harry Potter</subfield>
</datafield>
<datafield tag="246" ind1="1" ind2="1">
  <subfield code="1">Colophon title also in English:</subfield>
  <subfield code="a">Harry Potter and the goblet of fire</subfield>
</datafield>
```

MARC 246

Example Three – FRBR Vectors

Record 1 Alice's adventures in Wonderland

- 100 1_ |a Carroll, Lewis, |d 1832-1898.
- 240 10 |a Alice's adventures in Wonderland
- 245 10 |a Alice in Wonderland.
- 260 __ |a New York : |b H.N. Abrams, |c 1988.
- 300 __ |a [62] p. : |b ill. (some col.) ; |c 28 cm.

Record 2 Alice's adventures in Wonderland (in Telugu)

- 100 1_ |a Carroll, Lewis, |d 1832-1898.
- 240 10 |a Alice's adventures in wonderland. |l Telugu
- 245 10 |a Allibillilōkaṃlō ammayikatha |h [microform] = |b Alice in wonderland / |c mūḷaṃ, Lūyī Kerōl ; anukaraṇaṃ, Va. Durgāprasādarāvu.
- 246 31 |a Alice in wonderland
- 260 __ |a Madarāsu : |b Andhragranthamāla, |c [1951]

Record 3 Alice's adventures in Wonderland (the play)

- 100 1_ |a Chorpenning, Charlotte B. |q (Charlotte Barrows)
- 245 10 |a Alice in Wonderland, |c dramatized by Charlotte B. Chorpenning, a play from the library of the Association of the Junior Leagues of America, Inc.
- 260 __ |a Chicago, |b The Dramatic Publishing Company |c [1946]
- 700 1_ |a Carroll, Lewis, |d 1832-1898. |t Alice's adventures in Wonderland

Record 4 Alice in Wonderland (the video)

- 050 00 |a VXB 0196-0197 (viewing copy)
- 245 00 |a Alice in Wonderland.
- 260 __ |c 1999.
- 300 __ |a 2 videocassettes of 2 : |b sd., col. ; |c 1/2 in. viewing copy.
- 710 2_ |a Copyright Collection (Library of Congress)

copyright collection library of congress alice
 in wonderland

DeDup & FRBR

DeDup Identifies records representing the same item

Replaces them with a new unified record

Display comes from a preferred record **selected at creation**

Incorrect deduplication usually due to data issues

FRBR Gathers similar records into a group

All the group members can be seen in Primo

Displays a preferred record **selected when you search**

Incorrect FRBR usually due to what data is being normalized

Preventing DeDup or FRBR

Type 99

- Tells Pipe to do no processing
- **Does not mean “this record should no longer be a DeDup/FRBR member”**

New records

- Normalize with t=99
- Set System Last Stage of the Pipe
 - PERSISTENCE – No DeDup, No FRBR
 - DEDUP – No FRBR
 - FRBR WITHOUT DEDUP – No DeDup

Existing records

- Normalize with t=99
- Run a reload Pipe with Force DeDup and/or Force FRBR enabled
- Disable Force DeDup and/or Force FRBR

Customizing the DeDup algorithm

It can be done

- Requires server access
 - Local
 - Direct-Dedicated
- Very complex

To update existing records

- Run a re-load Pipe for each Data Source
- Enable Force DeDup

Important considerations

- Approved but not Supported
- NR or cataloging changes are usually easier

Transitivity

Dedup & FRBR **not** fully transitive

Depends on order records are processed

Transitive

$$A = B, B = C, A = C$$

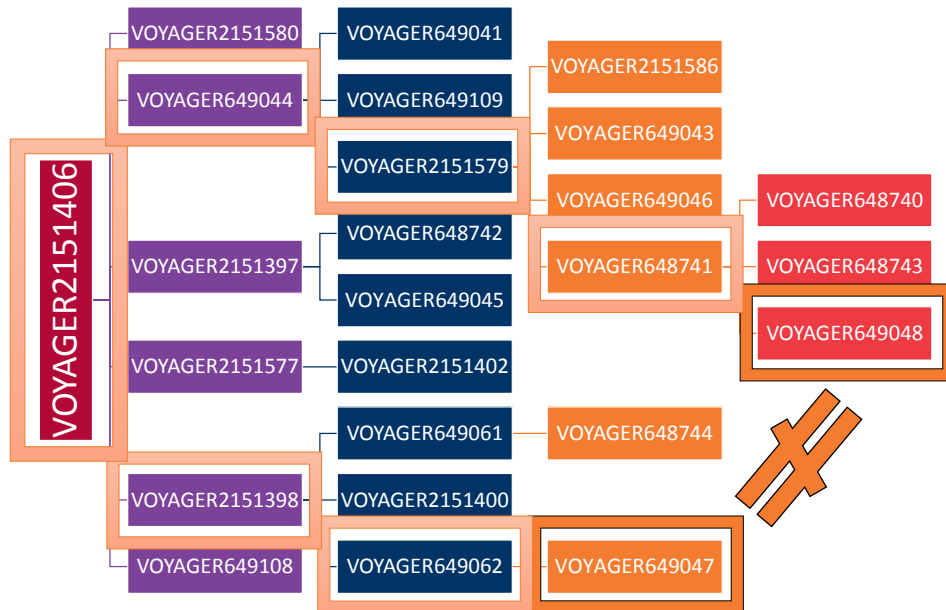

Non-Transitive

$$A = B, B = C, A \neq C$$

Dedup Transitivity Example

- VOYAGER2151406
 - VOYAGER649044
 - VOYAGER2151579
 - VOYAGER2151586
 - VOYAGER648741

No Universal ID – Problem

Fields	Values1	Values2	Points
f1			0
f2			0
f3			0
f4			0

Fields	Values1	Values2	Points
f10	iowa state university college of engineering		
f11	cowles harold a	cowles harold a	125
Points	Upper	Lower	Decision
890	875	null	MATCH

No Universal ID is the single most common reason records incorrectly dedup

DeDup requires 875 points to match

- No values adds 0 points
- Mismatch adds -325 points
- $890 - 325 = 565 \Rightarrow$ No Match

No Universal ID – Solution

Rule group: dedup_f1

Source: PNX Value: control/recordid

Conditions logic: True Conditions relation: And

Condition 1 - Logic: True Value: dedup/t

Condition 1 - Source: PNX

Condition1 - Routines: General Parameter: Routine: Check string equals string

Condition 2 - Logic: False Value: dedup/f2

Condition 2 - Source: PNX

Condition2 - Routines: General Parameter: Routine: Input exists

Condition 3 - Logic: False Value: dedup/f3

Condition 3 - Source: PNX

Condition3 - Routines: General Parameter: Routine: Input exists

Condition 4 - Logic: False Value: dedup/f4

Condition 4 - Source: PNX

Condition4 - Routines: General Parameter: Routine: Input exists

Use control/recordid!

The "false/Input Exists" logic is the key

No Universal ID – Solution (cont.)

The Alchemy of DeDup

DeDup 101

Has the
<dedup>
section
changed?

Does
<dedup/t>
have a value of
99?

Does any record
have a matching
<dedup/c5>?

Does a **Quick
Match** give **850**
points?

Does a **Full
Match** give **875**
points?

DeDup 102 – Quick Match

Fields for Comparison	Result	Points
UnivID <dedup/f1>	Match on valid UnivID	200
UnivID_invalid <dedup/f2>	Match on invalid UnivID	50
	Match between valid and invalid	100
	Field present in both records but no match	-320
	Either record or both records missing	0
ISBN <dedup/f3>	Match between valid ISBN	85
ISBN_invalid <dedup/f4>	Match between invalid ISBN	10
	Match between valid and invalid	30
	Field present in both records but no match	-225
	Either record or both records missing	0
Short-Title <dedup/f5>	Exact match on first 25 characters	450
	Non match	0
Date <dedup/f6>	Exact match	200
	+/- 2 years	-25
	No match	-250
	Value missing	0

DeDup 102 – Quick Match Example

HANDLER	CDLID	Fields	Values1	Values2	Points
		f1	95022038	95022038	200
		f2			200
		f3	0415135168;9780203206614	9780203206614;0415135168	200
		f4	9780415135160		200
HANDLER	CDLShortTitle	Fields	Values1	Values2	Points
		f5	financialsystemunderdeconomy1	financialsystemunderdeconomy1	450
HANDLER	CDLDate	Fields	Values1	Values2	Points
		f6	1996	1996	200
THRESHOLD	tr1	Points	Upper	Lower	Decision
		850	850	0	MATCH

DeDup 103 – Full Match, Part 1

Fields for Comparison	Result	Points
UnivID <dedup/f1>	Match on valid UnivID	200
UnivID_invalid <dedup/f2>	Match on invalid UnivID	50
	Match between valid and invalid	100
	Field present in both records but no match	-320
	Either record or both records missing	0
ISBN <dedup/f3>	Match between valid ISBN	85
ISBN_invalid <dedup/f4>	Match between invalid ISBN	10
	Match between valid and invalid	30
	Field present in both records but no match	-225
	Either record or both records missing	0
Date <dedup/f6>	Exact match	200
	+/- 2 years	-25
	No match	-250
	Value missing	0

DeDup 103 – Full Match, Part 2

Fields for Comparison	Result	Points
Full-Title <dedup/f7>	Exact match	600
	Either title contained within the other title	350
	Either title shorter than nine characters	0
	Matching keywords	450 x (% of matching words)
	Matching keywords in order	450 x (% + 50)
	Non-match	-600
Country of Publication <dedup/f8>	Exact match	40
	Either one missing	0
	Non-match	-205
Pagination <dedup/f9>	Match exactly and value > 10	100
	Match exactly and < 10	50
	Match within 10 and both are value > 10	50
	Match within 10 and either < 10	20
	Non-match (by more than 10)	-225

DeDup 103 – Full Match, Part 3

Fields for Comparison	Result	Points
Publisher <dedup/f10>	Exact match	100
	Either missing	0
Main Entry <dedup/f11>	Exact match	125
	Both main entries missing	75
	Half (or more) of the main entry keywords are common and <u>in the same order</u>	$80 \times (\% \text{ common keywords}) + 10$
	Half (or more) of the main entry keywords are common, but are <u>not in the same order</u>	$80 \times (\% \text{ common keywords})$
	Present in one record but missing in the other	-25
	Non-match	-200

DeDup 103 – Full Match Example
