Primo Analytics

What are Analytics?

- Allow us to build, customize, and run reports on Primo activities
- Built on Oracle Business Intelligence (OBI)

Getting to Primo Analytics

- **Primo Back Office > Primo Analytics**
- Opens in a new window in OBI
- Default page opens to Catalog

Access

- Anyone with institution-level Back Office Access (or higher)

Primo
Analytics

- Go to Primo FE
- Open Development tools (F12 in Chrome)
- Switch to **Network** tab
- Search for **beacon**
- Preform an action
- Check **Query String Parameters**

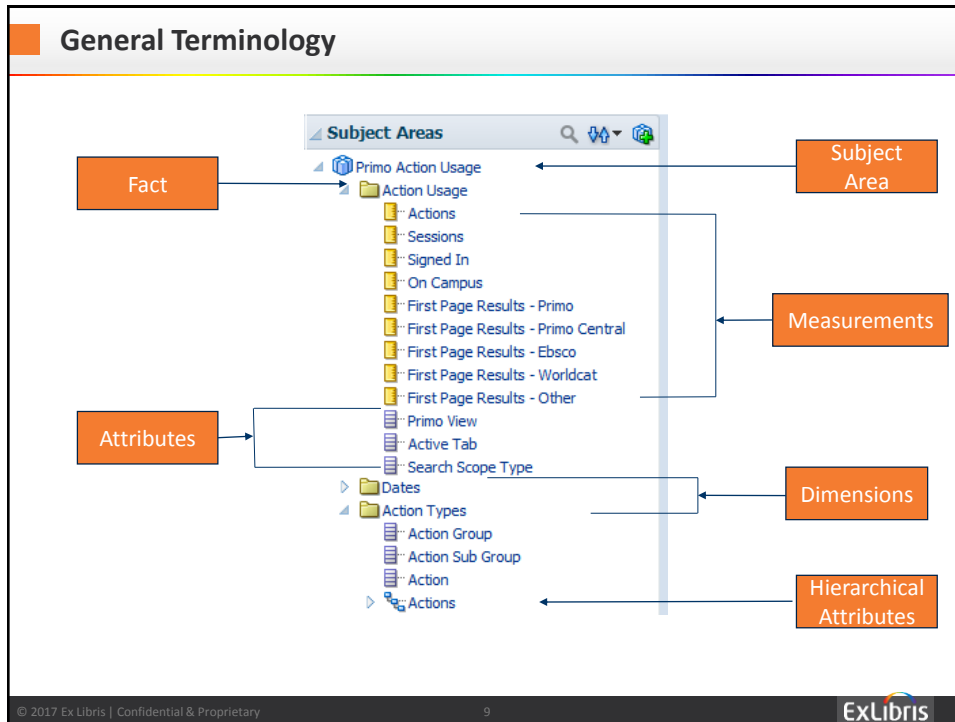

Action Identification

The screenshot displays the ExLibris Primo search interface. The search bar contains 'chicago' and the results show 146,863 items for 'Blended'. Below the search results, the Chrome DevTools Network tab is open, showing a request named 'beacon'. The 'Query String Parameters' section of the request is expanded, revealing the following parameters:

```

At the bottom of the Network tab, it indicates '1 / 65 requests | 2.6 KB / 248 KB transferred'.

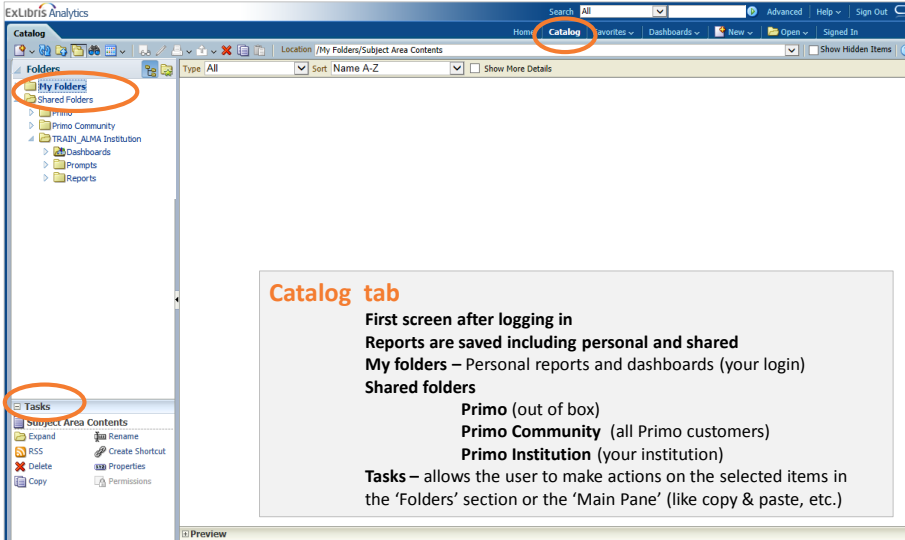

General Terminology

| Term | Term Description |
|------------------------|--|
| Subject Area | Data in Primo Analytics that is organized into subject areas such as Primo Action Usage, Primo Facet Usage, Primo Popular Searches. Subject areas contain folders, measure columns, attribute columns, and hierarchical columns. |
| Fact Table | Consists of the measurements, metrics, or facts related to a business process and contains the core part of the subject area. |
| Dimension | Tables that contain descriptive attributes (or fields) that are typically textual fields or discrete numbers behaving like text. |
| Measurement | A column of data in subject areas that holds a simple list of data values that can change or can be counted or aggregated in some way. |
| Attribute | A column in subject areas that holds a flat list of values that are also known as members. |
| Hierarchical Attribute | An attribute holds data values that are organized in a hierarchy. This kind of attribute is displayed using a treelike structure. Individual members are shown in an outline manner, with lower-level members rolling into higher-level members. |
