

ExLibris Leganto

The Ex Libris Resource List Solution

Save money
for students
and schools

Enhance
student
success

Improve the
teaching & learning
experience

Maximize the
use of library
collections

In recent years, universities and colleges across the US are undertaking important education affordability initiatives. Schools are consistently looking for means to lower the cost of education for students, as a way to drive engagement and increase retention.

Educational materials represent, in many cases, a significant expense for both students and schools. While these materials are essential to course resource lists, their cost might be an obstacle to student success and effective teaching. Furthermore, resource lists are often inefficient, and contribute to inefficiencies, due to a lack of consistent, automated processes for creating and managing them, as well as disconnected workflows across libraries and campuses.

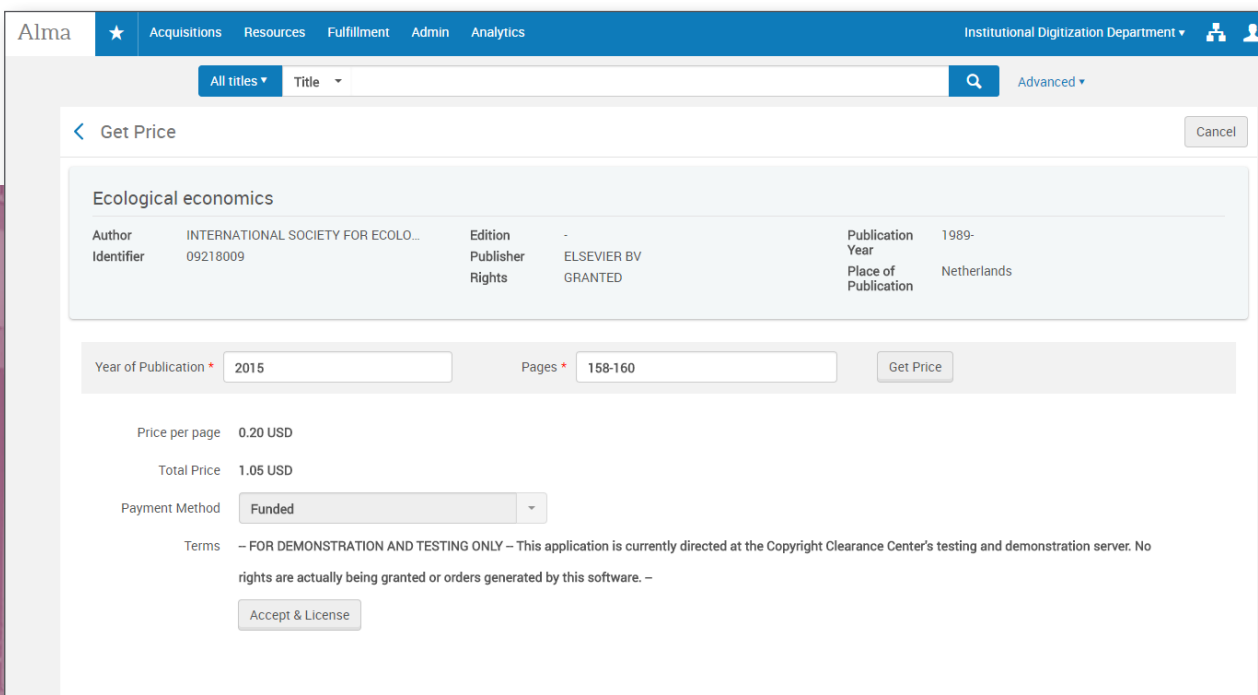

Leganto brings significant savings to students and schools by reducing the cost of educational materials. It provides an end-to-end course resource list solution that helps enhance student success, improve the teaching and learning experience, and maximize the impact of library collections.

Saving Money for Students and Schools

Leganto significantly reduces the cost of course materials for students and schools, and allows institutions to better support affordable learning initiatives.

With Leganto, institutions can:

- Eliminate redundant student costs by maximizing the use of library-owned and subscribed resources.
- Enable low-price pay-per-use models for instructors, students, and the library.
- Provide instructors and librarians real-time insight into the cost of materials.
- Promote the use of alternative, high-quality open educational resources.
- Automate copyright clearance to reduce handling time and minimize manual work.
- Provide administrators and deans analysis of projected savings on course materials.

The screenshot shows the 'Get Price' interface in the Alma system. At the top, there is a navigation bar with 'Alma' and menu items: 'Acquisitions', 'Resources', 'Fulfillment', 'Admin', and 'Analytics'. The user is logged in as 'Institutional Digitization Department'. Below the navigation bar, there are filters for 'All titles' and 'Title', and a search icon. The main content area is titled 'Get Price' and features a 'Cancel' button. The book details for 'Ecological economics' are displayed in a table:

Author Identifier	INTERNATIONAL SOCIETY FOR ECOLO... 09218009	Edition	-	Publication Year	1989-
Publisher	ELSEVIER BV	Rights	GRANTED	Place of Publication	Netherlands

Below the table, there are input fields for 'Year of Publication' (set to 2015) and 'Pages' (set to 158-160), with a 'Get Price' button. The pricing information is shown as:

- Price per page: 0.20 USD
- Total Price: 1.05 USD
- Payment Method: Funded

Terms: -- FOR DEMONSTRATION AND TESTING ONLY -- This application is currently directed at the Copyright Clearance Center's testing and demonstration server. No rights are actually being granted or orders generated by this software. --

An 'Accept & License' button is located at the bottom of the interface.

Improving the Teaching and Learning Experience

Leganto helps instructors build resource lists that are interactive, relevant, and easily accessible. With streamlined workflows for list creation, maintenance and sharing, Leganto saves instructors time and enables them to collaborate with peers, as well as to draw upon the expertise and assistance of library staff.

With Leganto, instructors can:

- Create structured, annotated resource lists that include all types of materials.
- Add materials from multiple sources – libraries, scholarly sites, online bookstores, or websites.
- Obtain immediate copyright clearance or purchase resources through a self-service feature.
- Leverage analytics and reports to gain insight into the materials that students use.
- Enrich resource lists, drawing on automated recommendations of related content.
- Easily keep lists up to date from year to year.

Build structured resource lists and gain insight into what materials students use

Easily license materials

Strengthening the Library's Role in Teaching & Learning

Leganto enhances the library's contribution to teaching and learning, which strengthens the partnership between the library, instructors and students.

With Leganto, librarians can:

- Collaborate with instructors to develop effective and up-to-date resource lists.
- Increase the use of library resources and subscribed collections.
- Provide course materials more efficiently and readily scale up to support more courses.
- Monitor resource lists, and initiate acquisitions, subscriptions and digitization processes.
- Analyze resource use to optimize collection development and demonstrate the library's impact.
- Expedite copyright clearance with automated licensing and flexible royalty payment options.

Enhancing Student Success

Leganto contributes to student success and fosters meaningful learning by providing easy access to course materials and facilitating interactions.

With Leganto, students can:

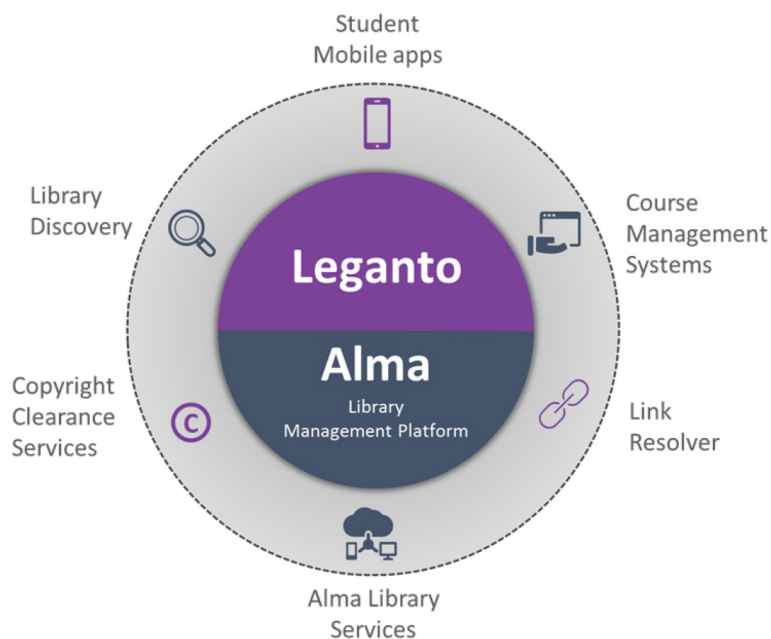

- View all course materials comfortably on any device.
- Access online materials, see availability and location data, and request physical items.
- Purchase a single reading instead of an entire coursepack.
- Collaborate and share views, feedback, and questions with classmates and instructors.
- Discover materials suggested by peers.
- Gather resources into a personal repository and propose adding them to reading lists.

Integration with Your Campus Solutions

Leganto seamlessly integrates with the institutional environment. It transforms resource lists into streamlined experiences that accelerate adoption and reduce maintenance demands.

With Leganto, IT teams can:

- Seamlessly integrate Leganto with all major course management systems.
- Leverage the investment in Alma and Primo to improve teaching and learning.
- Support complex scenarios, such as courses combining registered and unregistered students.
- Rely on a proven cloud infrastructure that is both robust and scalable.
- Comply with the most up-to-date standards of security and high availability.

About Ex Libris

Ex Libris, a ProQuest company, is a leading global provider of cloud-based solutions for higher education. Offering SaaS solutions for the management and discovery of the full spectrum of library and scholarly materials, as well as mobile campus solutions driving student engagement and success, Ex Libris serves thousands of customers in 90 countries.
