Define Analytics

“Analytics is the use of data, statistical analysis, and explanatory and predictive models to gain insights and act on complex issues”

EDUCAUSE

Why Analytics

Differentiate from competition?

Access to services?

Student experience?

Return on investment?

Impact?

What are users doing?

Measure?

Usage?

Research?

Student feedback?

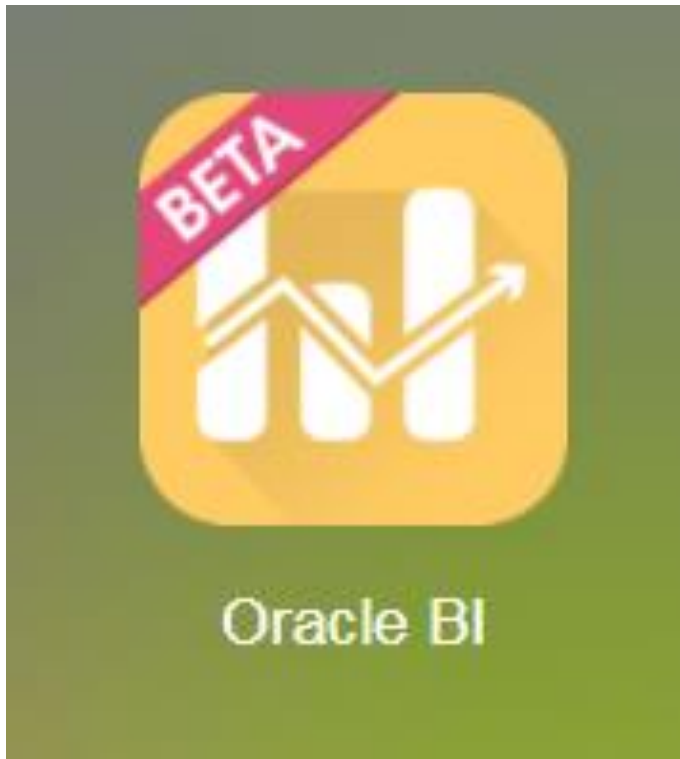

Usage

Latest statistics show that...

3 out of **4**
Australians
make up **75%** of the population
(Cat. no FooL)

REPORTING

ANALYTICS

PURPOSE

Monitoring and alerting

Extracting insights

TASKS

Building, organizing,
“cleaning”

Questioning, examining,
interpreting

OUTPUTS

Canned reports

Customizable ad-hoc responses

DELIVERY

Automated, scheduled

Prepared and presented by analyst

VALUE

Distills information for
analysis, alerts exception

Provides business insights and
recommendations

Menu Clicks

A complex network diagram with numerous nodes and connecting lines in various colors (blue, red, yellow, green) on a light blue background. The lines radiate from several central nodes, creating a dense web of connections.

Mobile moment

This refers to the short instance of time that a mobile user spends to conduct some small task.

That could be checking a bank balance, reading an email, or posting a photo to Instagram.

Google has assessed that consumers have such moments on average 150 times a day.

‘We multitask like never before, and our attention spans are now shorter than that of a goldfish.’

Google has identified four types of people looking for mobile moments:

I Want to Know

I Want to Go

I Want to Do

I Want to Buy

just arrived on campus**

Google/Apple maps good enough?

A young woman with long dark hair and glasses, wearing an orange top, is smiling and raising her right hand in a library setting. She is holding a white book or tablet in front of her. The background shows wooden bookshelves filled with books.

Student Feedback

A young man in a blue and white plaid shirt is standing in a library, holding a book in his left hand and raising his right hand. He is looking towards the camera. The background shows bookshelves and a computer monitor displaying a world map.

Surveys, questionnaires, focus groups?

campusM and Alterline

The Digital Student Journey

2016

- 3 customers – Kings College London, Aston, Lancaster
- Available for between 2-4 weeks
- Push/email/tweets/incentives used to encourage participation

Over 1000 students took the survey.

<http://www.campusm.com/studentdigitallives/>

Scope

Investigating the digital lives of students

How they use technology

How they feel about technology

What makes a good and bad experience

Key findings – technology

Technology is a vital part of students' lives...
especially smartphones and laptops

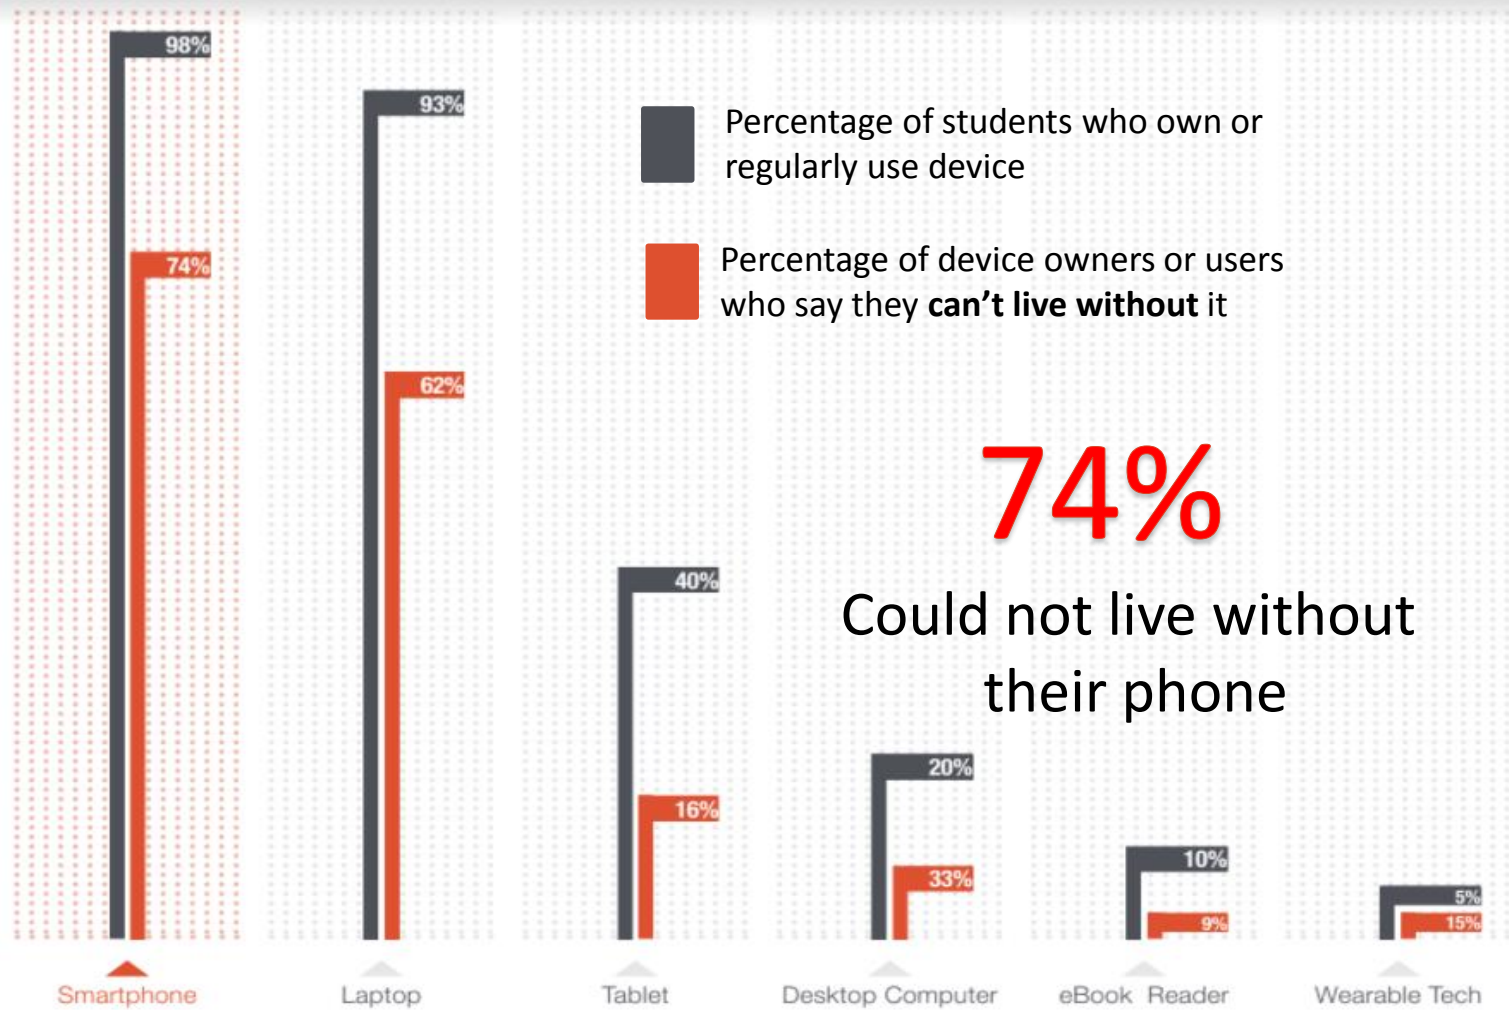

88% say they find it easy to use
new technology

87% acknowledge that
technology is engrained into
their lives

88% would struggle to
complete their studies without
technology

Key findings – device use

Key findings – importance of services

Students were asked which 3 digital services were most important to them

52%

Lecture
recording
and notes

App ranked higher than accessing course timetable (46%),
library catalogue (25%) and the VLE/LMS (24%)

Key findings – campusM

82%

would recommend their campusM app to a friend
or colleague

79%

Agreed that the app saved them time

74%

Says the app allows them to easily find information

52%

Use the app at least once a day

Almost a third could
not manage
without the
campusM app

2017 Survey

7 institutions enrolled – UK and USA

5 finished

2 on-going

Alterline processing results – available later in 2018.
