
Leganto August 2018 Instructor Highlights

New Release Notes Format

The Leganto release notes were enhanced to include an entire calendar year of releases. Use the JavaScript tools at the top of the page to search by release, category (Leganto or Alma), and free text search that includes Salesforce case numbers and resolved defects.

Instructors will be primarily interested in Leganto features, which now includes resolved defects.

October Sneak Peak

September is a maintenance release.

- New facets and enhancements on the Reading List Tasks List page.
- Enhanced integration with the UK's DCS.

Main Features

Instructor Course Rollover (Leganto)

August 2018 Leganto This feature must be enabled by your library.

When enabled, course rollover enables you to use existing reading lists for the next semester or academic year. A course rollover is different from assigning an existing reading list to a new course or duplicating an existing list and assigning the new list to a new course: in addition to copying a citation's metadata and uploaded files, a course rollover ensures the transfer or reset of copyright records and data associated with the citations (such as tags, statuses, notes, and discussion threads), as defined by the library, from an existing reading list to the new one.

Rolling over a reading list does not change the **old** reading list.

A new reading list status, **Rolled Over** (code **RolledOver**), was added and can be used for rolled over reading lists (see the table, below).

For general information about Leganto course rollover and important information about handling links to the old and new lists, see [Links to Leganto Reading Lists](#) in Leganto Course Rollover.

To roll over a reading list (when enabled):

1. Select **Roll Over list** in a reading list ... menu. The Roll Over dialog box appears. The dialog box appears slightly differently if you are an instructor or a librarian.

Roll Over Dialog Box, Before Selecting a Course - Librarian

- If you are an instructor, select one of your courses from the drop-down list. If you are a librarian, enter/select a course.

The Roll Over dialog box refreshes with the available data operations that you can configure. Your library can enable or disable which of these options appear and the default values for each option. The values of any options that don't appear are configured by your library and cannot be changed.

Roll Over Dialog Box, After Selecting a Course - Librarian

- Select the desired method of handling each data operation, as follows.

Rollover Operations

Operation	Values	Notes
Do you want existing permalinks to point to the new list once the list is published?	<ul style="list-style-type: none"> Yes No 	<p>When set to Yes, all existing permalinks point to the new (target) reading list after the rollover. There is no way for instructors and students to use these same permalinks to access the old (source) reading list. To ensure consistency, manually remove all permalinks for existing (and past) courses.</p> <p>When set to No, all existing permalinks continue to point to the old (source) reading list. You must create new permalinks to point to the new reading list.</p>

Operation	Values	Notes
Due dates	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , the due dates of all citations are cleared.
Citation statuses	<ul style="list-style-type: none"> ◦ Recalculate ◦ Copy 	When set to Recalculate , Leganto recalculates the statuses as if the citations are newly created, as configured by the library.
Library-Internal tags	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , tags of these type in all citations are removed.
Reading list status	<ul style="list-style-type: none"> ◦ Copy ◦ Reset ◦ Rolled Over 	<p>When set to Reset, the new reading list status is Being Prepared.</p> <p>When set to Rolled Over, the new reading list status is Rolled Over.</p>
Reading list collaborators	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , all owners and collaborators, except for the instructor performing the rollover, are removed from the new list. The instructor remains as an owner of the new reading list.
Public tags	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , tags of these type in all citations are removed.
Public note	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	
List and section dates	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , all of these dates are cleared. (Copy is not recommended when performing a rollover.)
Student discussions	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Copy , student names in the discussion are anonymized.
Copyright approvals	<ul style="list-style-type: none"> ◦ Recalculate ◦ Copy ◦ Reset 	<p>When set to Recalculate, Leganto recalculates the copyright statuses as if the citations as newly created, as configured by the library.</p> <p>When set to Reset, Leganto resets the copyright statuses of all citations to their initial values as configured by the library.</p> <p>For information about the difference between these two options, consult with your library.</p> <p>When set to Copy, the copyright statuses are copied, as is, to the new list.</p>
Instructor-Library tags	<ul style="list-style-type: none"> ◦ Copy ◦ Reset 	When set to Reset , tags of these type in all citations are removed.

4. When you are done, select **Roll Over** and select **OK** in the confirmation dialog box. The list is rolled over to the selected course; the name of list is appended with (Rolled Over), for example Algebra Syllabus (Rolled Over).

Reading List Sorting Enhancements

August 2018 Leganto SF: 00463479 00343562 00404230

- **Course Code** was added as an option when sorting on the My Lists page. When selected, reading lists appear in descending order by course code. For reading lists associated to multiple courses, the first course code that was associated to the list is used for the sort order. Reading lists without a course code appear last, sorted by last updated (descending). The default sorting order is set by your library.
- You can now filter lists by course code on the My Lists page. When accessing Leganto from the CMS, the list is pre-filtered by the relevant course. In addition, only the reading lists of the relevant course appear to students.

My Lists Page

Total Pages

August 2018 Leganto SF: 00520052

When enabled by your library, the sum total of all pages of all citations appears at the top of a reading list and each section. The total includes the total pages of each citation that has pages defined. The total is determined from the **Start Page** and **End Page** fields; if either of these is not defined, the total is determined from the **Pages** field. Citations without pages, or whose pages cannot be parsed by Leganto, are not included in the total.

Total Pages for Reading List

Total Pages for Section

The total pages for a citation also appears on the citation page. When the total number of pages is entered manually, it appears as usual, for example: 11. When the total number of pages is calculated from the start and end page, it appears in parentheses, for example: (10). When both numbers are available, they appears with the manually added number, followed by the calculated number in parentheses, for example: 11 (10).

Resolved Issues

- August 2018 Leganto SF: 00524234
Cite It! did not take any data from Scopus. This was fixed.
- August 2018 Leganto SF: 00520720
Books and book chapters added to a reading list from Primo were missing their **Volume** field value. This was fixed.
- August 2018 Leganto SF: 00501427
Tooltips were added for citation sort options in Leganto.
- August 2018 Leganto SF: 00409826
Dedup records added from Primo did not always present the same availability as in Primo. This was fixed. Note: 1) This fix is currently only for non Primo VE customers. 2) This fix is only for newly added records from Primo. Existing records added from Primo must be deleted and added again.
- August 2018 Leganto SF: 00547540
Using Cite It! on Primo did not take the ISBN or complete a resource locate. This was fixed.
- August 2018 Leganto SF: 00548585
The tooltip for deleting a digitization request was partially hidden. This was fixed.
- August 2018 Leganto SF: 00550511
The **Add module instructors as collaborators** checkbox did not work in Chrome. This was fixed.
- August 2018 Leganto SF: 00552536 00557673
Adding a public note when editing a citation did not save or display the note. The note showed up inconsistently when subsequently editing the citation. This was fixed.
- August 2018 Leganto SF: 00549553
In Leganto, sometimes searching a Primo scope resulted in a **Service Unavailable** message. This happened when searches took longer than ten seconds. This was fixed by raising the timeout to fifteen minutes.
- August 2018 Leganto SF: 00531266
After deleting a citation, the repository item was not detached from the course. This was fixed.
- August 2018 Leganto SF: 00562709
Records pushed from the Primo new UI to My Collection in Leganto user do not appear in Leganto. This was fixed.
- August 2018 Leganto SF: 00568545
When using the link from Moodle to create a reading list, the new reading list was attached to the wrong course. This was fixed.

- August 2018 Leganto SF: 00572173
The **Add** button was hidden behind icons in the Find List page for screens under a certain resolution. This was fixed.
- August 2018 Leganto SF: 00572072
The citation upload file declaration appeared as a code, instead of its description, in the Citation Details page. This was fixed.
- August 2018 Leganto SF: 00553515
In Internet Explorer, permalinks to courses did not work when they contained special characters. This was fixed.
