
Leganto Release Notes - February 2019

Main Enhancements

Reading List Set Changes

In the March release, a significant infrastructure change will be applied to reading lists. This change will greatly improve the reading list search function, for example, by allowing you to use facets for the list. All logical reading list sets that made use of the **Course Start Date** and **Course End Date** fields in their set definitions will be affected. Although you will be able to continue use your existing sets, it is recommended that you recreate your logical sets following the March release.

Transport Layer Security (TLS) Support

TLS is a cryptographic protocol that provides authentication and data encryption between different endpoints (for example, the user's desktop and the application server). Various vulnerabilities (such as POODLE and DROWN) have been found in TLS versions 1.0 and 1.1 in recent years.

To avoid security vulnerabilities and to align with industry standards, Ex Libris is removing its support for TLS 1.0 and 1.1 in Alma, Leganto, and Primo. This will occur on all sandbox environments as of the March release (February 17th, 2019) and on all production environments as of the May release (May 5th, 2019). Effective May 6, 2019, Ex Libris will support only TLS 1.2 or later.

You can find additional information on TLS at:

- https://en.wikipedia.org/wiki/Transport_Layer_Security
- <https://www.thesslstore.com/blog/apple-microsoft-google-disable-tls-1-0-tls-1-1/>
- <https://www.zdnet.com/article/chrome-edge-ie-firefox-and-safari-to-disable-tls-1-0-and-tls-1-1-in-2020/>
- <https://blog.mozilla.org/security/2018/10/15/removing-old-versions-of-tls/>

New Premium Sandbox Policy

February 2019 Alma

Ex Libris is updating the premium sandbox policy for all of the products that run on the cloud platform (Alma, Primo VE, Leganto, and Esploro) and upgrading the premium sandbox environment's underlying technology. For detailed information on the new policy, see [Ex Libris New Premium Sandbox Policy: Frequently Asked Questions](#).

As a result of the new policy, the Sandbox Management page in the Alma configuration menu and the sandbox widget on the Alma home page were removed. Instead, in your production environment, there is now a link to your premium sandbox from the **Help** menu.

Premium Sandbox Link in Help Menu

In your sandbox environment, the date of the last clone from production appears.

Date of Clone from Production

Reading List Syllabus

February 2019 Leganto

When enabled by your library, you can now add a syllabus as a URL, a file, or both to a reading list in Leganto.

A screenshot of the Leganto reading list creation form. The form has a title field with 'History', a description field, a 'Reading List Status' dropdown set to 'Being Prepared', and a 'Creative Commons license' dropdown. Below these are fields for 'from- Start date' and 'To- End date'. At the bottom, there is a 'Syllabus URL' field (highlighted with a red box) and an 'Upload file' button. On the right side, there are 'SAVE' and 'CANCEL' buttons.

Edit Reading List

The **Syllabus URL** field and an **Upload File** link now appear when editing a reading list (select **Edit** at the top right while viewing the list). To add a URL, enter the full URL after **Syllabus URL** (example, `http://www.example.edu/syllabus`). To remove the URL, simply delete it from the field. To add a file, select **Upload File**, drag and drop the file or browse for the file. To remove the file, select the garbage can icon beside the file name.

Students have the option to view the syllabus by clicking **View** (for a URL) **Download** (for a file), or both, depending on which one(s) you added.

Reading List

If instructor rollover is enabled, then, when an instructor rolls over a list, the instructor can select whether to copy or delete (Reset) the syllabus.

Instructor Roll Over

Configuring Reading List Syllabus Feature

February 2019 Alma

To support reading list syllabuses, the following changes were made in Alma:

- To enable this feature, set the parameter **enable_syllabus** to **true**. See [Enabling Reading List Syllabuses](#).
- **<syllabus>** in the Reading List API contains a link to the URL and/or to the uploaded file.

```
<syllabus>
  <url>www.example.edu</url>
```

```
<file>http://s3.amazonaws.com...</file>
</syllabus>
```

- The option of whether to copy syllabuses was added to the Course Loading integration profile.

Disabling Availability Links

February 2019 Leganto

When enabled by your library, you can disable links from appearing to students in the Links and Availability section for a citation. You can independently disable or enable (when available):

- Each electronic link
- The uploaded file
- The source URL, which is citation's web site
- Each digital representation
- All physical availability as a group; you cannot disable or enable specific holdings.

Citation Page

Configuring Disabling Availability Links Feature

February 2019 Alma

To allow instructors (and librarians) to disable citation availability links, set the parameter **instructor_manage_citation_available_links** to **true**. See [Configuring Whether Instructors Can Disable Availability Links](#).

Configuring Citation Information Appearing on the Reading List Page

February 2019 Alma

You can configure how citations appear on the reading list page in Leganto in the Brief Citation Format mapping table. You can configure one or two rows to display each citation according to its material type. When a user views citations in compact view, only the first row appears.

The formatting uses a powerful formatting string based on JSON.

For more information, see [Configuring Citation Information Appearing on the Reading List Page](#).

Configuring Leganto for New RefWorks

February 2019 Leganto

When enabled by your library, you can select between new and legacy RefWorks when configuring RefWorks in the user menu.

The screenshot shows the 'User Settings' interface. It has three main sections: 'Social' with a 'Connect to Facebook' button, 'Notifications' with a checked 'Receive notifications by email' checkbox, and 'Citation Managers'. Under 'Citation Managers', there are three tabs: 'RefWorks', 'Zotero', and 'Mendeley'. The 'RefWorks' tab is active and contains two radio buttons: 'Legacy RefWorks' (which is selected and highlighted with a red box) and 'New RefWorks'. Below the radio buttons are three input fields: 'RefWorks Username: e', 'RefWorks Password:,', and 'RefWorks Folder Name (Optional):'. At the bottom of the form are 'CANCEL' and 'SAVE' buttons.

User Menu

Configuring New RefWorks Feature in Leganto

February 2019 Alma

To enable Leganto users to integrate with new RefWorks, enter a valid code in **refworks_group_code** and set the parameter **new_refworks** to **true**. See [Enabling RefWorks](#).

Additional Enhancements

- **February 2019 Fulfillment - Course Reserves SF: 00501401**
You can now remove a specific type of alert when removing alerts on the Edit Citations or Edit Reading List pages. See [Removing Alerts](#).
- **February 2019 Alma SF: 00520996 00578673**
If you are a Primo VE customer, you can force the physical availability request pane on the citation page to look more like it does in Primo VE (according to your Primo VE configuration). Set the parameter **primove_getit** to **true**. See [Configuring Whether Physical Availability Matches the Primo VE Configuration](#).

Primo VE (New) Request Form

- **February 2019 Leganto**
 All mandatory fields in Leganto are now marked with a red asterisk, for example:

Create Citation

- **February 2019 Alma SF: 00589660 00611469 00620272 00622058**
The enable/disable toggle switches on the Instructor Rollover Operations table (see [Enabling Instructor Rollover](#)) now affect only instructors; librarians always see all operations.
- **February 2019 Alma**
When available, holdings information now appears for physical items returned by a Leganto search.

Holdings Information in Search Results

Resolved Issues

- **Feb 2019 Fulfillment - Course Reserves / Collaborative Networks SF: 00534522 00540034 00542508 00598079 00610314 00633268**
There were several issues regarding adding citations from other members in a Network Zone. These were fixed.

- **Feb 2019 Fulfillment - Course Reserves SF: 00589127 00590416 00586659**
When MMS ID appeared as a column on the Edit Reading List page, selecting the citation title opened the incorrect citation. This was fixed.
- **Feb 2019 Fulfillment - Course Reserves SF: 00608510**
In some cases, a reading list with Complete status appeared in the Reading Lists Task List page as Ready for Processing. This was fixed.
- **Feb 2019 Fulfillment - Course Reserves SF: 00618618 00625146**
Facets did not appear on the Edit Reading List / Edit Citation pages for certain customers. This was fixed.
- **Feb 2019 Fulfillment - Course Reserves SF: 00565182**
1) The Reading List Bulk Update job now properly deletes lists, instead of archiving them. 2) The ability to "assign to" when deleting lists with this job was removed. 3) Archive is now an option when changing the list status when using the job.
- **Feb 2019 Leganto SF: 0059060**
Alma items added to Leganto My Collection from Primo did not contain links. This was fixed.
- **Feb 2019 Alma SF: 00579316 00625144 00638849**
The course creator and creation date in the info icon pane changed when the course was modified by a librarian in Alma. This was fixed.
- **Feb 2019 Leganto SF: 00610173 00612453**
In some cases, the first references were missing when exporting a reading list to PDF. This was fixed.
- **Feb 2019 Alma SF: 00618147**
There was no way to change the error message that was received when coming from the LTI and the user was not found. This was fixed by adding the message to the label configuration page.
- **Feb 2019 Alma SF: 00615467**
A citation's content type changed from Book Chapter to Book when manually creating the citation. This was fixed.
- **Feb 2019 Leganto SF: 00602058**
Cite It! appeared on mobile devices, although it is not supported for mobile devices. Cite It! no longer appears on mobile devices.
- **Feb 2019 Leganto SF: 00603781**
Leganto users received the error "Access limit exceeded. Blocking user." in some cases. This was fixed.
- **Feb 2019 Alma SF: 00583916 00611023**
The librarian assigned to a reading list was not reset when an instructor duplicated or rolled over the list in Leganto. This was fixed.
- **Feb 2019 Leganto SF: 00612449**
Sorting lists by course name or course code did not work as expected. This was fixed.
- **Feb 2019 Leganto SF: 00623627**
Set Complete appeared as an action for a citation even in 1) student view and 2) when the list was locked. This was fixed.
- **Feb 2019 Leganto SF: 00595122**
Instructors were notified when students created or deleted private tags. This was fixed.
