2 - Disclaimer

This report is provided to Ex Libris Ltd. If this report is received by anyone other Ex Libris Ltd. The recipient is placed on notice that the attached report has been prepared solely for use in connection with Ex Libris Ltd. and this report and its contents may not be shared with or disclosed to anyone by the recipient without the express consent of Ex Libris Ltd. and KPMG Somekh Chaikin. KPMG Somekh Chaikin shall have no liability for the use of this report by anyone other than Ex Libris Ltd. and shall pursue all available legal and equitable remedies against recipient, for the unauthorized use or distribution of this report.

3 - Purpose of this Document

The Privacy Impact Assessment (PIA) is a process that identifies what impact a project, initiative or general collection, and use of information might have on the privacy of individuals. A PIA is a point-in-time assessment, and the resultant report and other outputs should be revisited as changes occur to the processes that were originally assessed.

This PIA includes a brief description of the data processed in the Research Professional service, the privacy impact, and the measures Ex Libris is taking in order to manage the risks involved.

4 - Main Findings and Conclusions

We have reviewed the privacy risks regarding Research Professional and the privacy and security controls designed to mitigate those risks.

It should be noted that Ex Libris is a data processor, therefore, some of the personal data-relating processes are the responsibility of the data controller (Ex Libris customers), such as consent management.

Personal data in Research Professional is limited in nature and the inherent risks resulting is low. The privacy controls designed and implemented comply with GDPR requirements relating to the business processes of Research Professional.

After reviewing all material GDPR aspects, the privacy risks, and implemented controls, any residual risk that we found was minimal. Our impression is that Ex Libris efforts in implementing GDPR requirements are well managed, resulting in a good level of compliance. Ex Libris has also appointed a Data Protection Officer (DPO).

One of the main principles of GDPR is Privacy by Design, which means promoting privacy principles throughout product and process development from the start, and maintaining this while products and services are developing. In order to maintain compliance, Ex Libris will need to continue their practice of making the privacy of its customers a core value, and lead by example for other SaaS vendors in the market.
5 - Scope and Plan

This PIA scope is the Research Professional service, where Ex Libris is the data processor. The purpose for data processing is to provide the ability to find and win research funding opportunities for Ex Libris customers.

6 - Data Elements

*Data needed for processing* – information about the data subjects (Research Office patrons) are provided by the Ex Libris customer (Research Office authority). Additional personal data updates are done by the Research Office staff when needed, and the processes involved are the sole responsibility of the Research Office, which is the data controller.

Following is a list of data elements related to the data subject (patron), processed by Research Professional. None of the data elements is encrypted in the database. All of the data elements are related to the patron:

First Name; Last Name; E-mail; Department; Role.

6.1 - Data Sharing

Information is not shared by Ex Libris with any third party organizations or individuals. The Ex Libris customer determines how and what information is shared with third parties. Notice about information collection and sharing is detailed in: [https://www.exlibrisgroup.com/privacy-policy-1-2/](https://www.exlibrisgroup.com/privacy-policy-1-2/)

6.2 - Data Flows

Data is collected and provided by the Research Office (data controller), which provide Research Office information for the researcher (data subjects), and import this data into Research Professional.

Data is not transferred by Ex Libris to any third party, except as authorized or initiated by the Ex Libris customer.

7 - Risks and Controls

Data processing involves high volume activities involving a large number of people or a larger percentage of the relevant population. The sensitivity of the information collected about individuals (patrons) is low. None of the data elements are considered special category (GDPR Article 9).
Specific risks and controls:

8 - Privacy Management Framework

8.1 - Governance

Ex Libris is ISO 27701 (privacy information management system) certified. Adherence to the framework is the responsibility of Ex Libris DPO, Ellen Amsel. This includes the product development lifecycle and privacy processes implemented throughout Ex Libris.

8.2 - Privacy Policy

Ex Libris privacy policy, relating to Research Professional, is published in: https://www.exlibrisgroup.com/privacy-policy/ and managed by the DPO.

8.3 - Security
Ex Libris has implemented a multi-tiered security model that covers all aspects of our cloud-based systems. The security model and controls are based on international standards, such as ISO/IEC 27001:2005 and ISO/IEC 27002, the standards for an information security management system (ISMS). The full list of Ex Libris ISO certifications can be found here.

Information security policy is clear and published in:

Security controls include:

- Physical security
- Operational security
- Network security
- Intrusion prevention
- Application security
- Access control
- Asset management
- Backup controls
- Privacy management
- Risk management and compliance

8.4 - Third Party

Ex Libris uses one vendor, AWS, for Research Professional and monitors the security controls using their SOC2 (Type 2) audit report.

Personal data is not shared by Ex Libris with any third parties, except as authorized or initiated by the Ex Libris customer.

8.5 - User Rights

Data is collected and provided by Research Office management - data is processed according to the data processing agreement, and researcher (end user) consent is the responsibility of the Research Office (the data controller).

Ex Libris provides their customers with processes and tools to allow patrons the ability to access and correct their personal data, and to delete their personal information in accordance with the Research Office Institution's policies. This is performed by the Research Office staff, using the Research Professional interface. Any patron wishing to make a comment or complaint regarding their own information can contact the Ex Libris DPO.
8.6 - Consent

Consent is managed by the customer (Research Office), who is the data controller.

8.7 - Training & Awareness

Ex Libris is managing a privacy awareness training program, as well as a security awareness training program. Additionally, specialized Privacy by Design training has been conducted specifically for GDPR.

8.8 - Incident Handling

Ex Libris has constructed incident response and notification procedures. Procedures include breach notification policy and the involvement of the DPO in case of a data breach.

8.9 - Privacy by Design

Ex Libris has implemented Privacy by Design processes, which involve the DPO and privacy concerns from the beginning of product development and through change management.

8.9.1 - Data minimization

The information collected by Research Professional (specific data elements listed above) is limited to the information necessary, relevant and proportionate to the purposes of the system use. Only personal data which is necessary for the processing is collected.

8.9.2 - Data retention

Data is never deleted from Research Professional unless an individual asks to erase the information.

Research Professional allows the research management to delete historical data, when this is not needed, in order to implement their own data retention policies.
9 - Record of Changes
