How to set the 008 field in a derived authority record

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 18.01

**Desired Outcome Goal:**
In GUI cataloging module in a bibliographic library when doing "edit > derive new record" and "Create a new record in the Authority DB", a new record opens in authority library. Among other fields field 008 is opened. Where is it from? How can I change pos. 15-17?

**Procedure:**
This field comes from xxxnn/tab/tab_tag_text, which is defined as "Definition of default tag values when creating system records". In the above case, it comes from xxx10/tab/tab_tag_text in the authority library (because we are talking about an authority record). You can change it as desired in this table.

**Category:** Cataloging (500)

**Subject:** Authorities (500)
