How to change the title of a report in an Analytics dashboard

- **Product:** Alma
- **Product Version:**
- **Relevant for Installation Type:**

**Description**

In an Analytics dashboard we include a list of reports.

Is it possible to change the titles of the reports without changing the filenames of the reports? Meaning, only the sections in the dashboard should be renamed while we want to retain the names of the reports themselves.

**Resolution**

By default the report title is displayed. You need to display the section title instead of the report title, and the section title can be changed to anything you like.

See the attached a document explaining the process in detail.
