Serials Solutions: Getting Started

• Product: 360 Core Client Center

What do we need to do to get started with our Serials Solutions services?

This document is designed to get you familiar as quickly as possible with Serials Solutions’ products and services. The information below is not intended to be a complete guide to everything about Serials Solutions; rather, it is a place to begin as you get foundational information on Serials Solutions’ services. Some of the resources below may be especially relevant to the staff in your library who may not be responsible for setting up or maintaining your Serials Solutions services, but would like a quick introduction.

This document has three sections; click the section title here to jump straight to that section:

• Getting Ready
• Getting Set
• Go!

Getting Ready

Before the discussion of any Serials Solutions service can begin, it is important to understand 360 KB and its role. 360 KB is Serials Solutions’ knowledgebase of authoritative e-resource metadata. The Serials Solutions staff of data specialists and catalogers work closely with publishers and content providers to collect and correct bibliographic metadata that accurately connects patrons to content, and helps you control your electronic collection.

The effectiveness of your Serials Solutions subscriptions relies on you using the Client Center to tell Serials Solutions about your electronic resources so that your patrons are presented with appropriate resources via your Serials Solutions subscriptions.

Learn about 360 KB: If you are unfamiliar with 360 KB, we encourage you to take some time with the options below to learn more about it:
