What is happening to the database name and title-level URL of database Thieme E-Book Library?

The provider Thieme Medical Publishers has changed the database name and title-level URLs of database Thieme E-Book Library.

Therefore, we will be changing the database name & title-level URLs in the Knowledgebase. The content of the database, and the database ID (R52), will remain the same.

This change will take effect on March 7, 2018:

- Before March 7, 2018:
  
  Database name: Thieme E-Book Library
  
  Title-level linking syntax : http://ebooks.thieme.com/

- After March 7, 2018:
  
  Database name: Thieme MedOne Education
  
  Title-level linking syntax : https://medone-education.thieme.com

Actions you may need to take:

- If you are a 360 MARC Updates client and have requested the custom specification that adds the database name as it appears in the Client Center/Intota to MARC records, you can expect to see some change records when you get your MARC records after March 7, 2018.

- If your library uses a third-party service (such as EBSCO A-Z, etc.), custom scripts to manage data, or other non-ProQuest tools that require the database name to function, you should note the change in ProQuest's database name in order to retain the proper relationship/mapping between those tools.
