What is happening to the database Women and Social Movements in the United States, 1600-2000 databases?

The database Women and Social Movements in the United States, 1600-2000 (basic edition) from the provider Alexander Street Press is no longer available. In order to maintain accurate and authoritative provider metadata (based on our Knowledgebase collection policy), all titles will be removed from Women and Social Movements in the United States, 1600-2000 (basic edition) database and the database will be hidden in the Knowledgebase on 3/20/19. The database will become a zero-titles database, and no future subscriptions will be possible. (NOTE: The database code is EJI.)

Additionally, the database Women and Social Movements in the United States, 1600-2000 (scholar’s edition) from the provider Alexander Street Press is named incorrectly. The provider has changed the name of database to Women and Social Movements in the United States, 1600-2000.

All clients subscribed to the basic edition should subscribe to Women and Social Movements in the United States, 1600-2000. (NOTE: The database code is AI2.)

These changes will take effect on 3/20/19.

• Before 3/20/19:
  ◦ Women and Social Movements in the United States, 1600-2000 (basic edition) database code EJI
  ◦ Women and Social Movements in the United States, 1600-2000 (scholar’s edition) database code AI2

• After 3/20/19: Subscribe to Women and Social Movements in the United States, 1600-2000 database code AI2

(NOTE: Clients can subscribe to Women and Social Movements in the United States, 1600-2000 (scholar’s edition) with immediate effect)

Action you need to take:

• Update the holdings in your Intota or Client Center profile by subscribing to the new database instead of the old database. For information on how to update your profile, and considerations prior to removing the old database from your profile:
  ◦ Intota users click here.
  ◦ Client Center users click here.

• If you are a 360 MARC Updates client and have requested the custom specification that adds direct URLs or database specific information to MARC records, you can expect to see some change records when you get your MARC records after 3/20/19
