RefWorks Version

Question

How do I know which version of RefWorks I am using?

Answer

There are several ways to identify your version of RefWorks.

1. By the URL:
   a. **RefWorks**: [https://refworks.proquest.com](https://refworks.proquest.com) (optionally followed by additional text)
   b. **Legacy RefWorks**: [https://refworks.com](https://refworks.com) (optionally followed by additional text)

2. By the user interface and color scheme: **RefWorks** is primarily blue, while **Legacy RefWorks** is primarily orange.

   ![Legacy RefWorks Interface](image2)

• If you are still unsure which version you are using, please contact your institution’s RefWorks administrator or librarian.
